Taiwan's machine tool manufacturers mostly experienced a buoyant month in January (photo courtesy of UDN.com).

Taiwan's Machine Tool Makers Generally See Rosy Revenue in Jan.

Gradually shaking off the sales doldrums, Taiwan's major machine tool makers mostly witnessed revenue rebound significantly in January.

By Steve Chuang

Among them, Awea Mechantronic Co., Ltd., specialized in various CNC and 5-axis milling machines, posted combined revenue of NT$291 million (roughly US$9.47 million) in the month for a year-on-year surge of 15.92 percent, and attributed the encouraging results to strong demand of customers from various sectors, particularly precision machining and aerospace industries, worldwide.

With unfilled orders worth US$1.5 billion (US$48.79 million) on hand now, which continually came from clients in China, the U.S., S. Korea and Europe, Awea confirmed that it has seen its order visibility extend to June, to assure itself of robust performance in the months to come.

Coincidentally, Kao Fong Machinery Co., Ltd., engaged in horizon, vertical and double-column machining centers, finished January

with combined revenue of NT$185 million (US$6.01 million), sharply rising by 25.06 percent from last January.

Explaining the impressive revenue turnaround, Kao Fong's executives noted that the influx of orders to the company has turned steady since the second half of 2016, and even accelerated after the Chinese New Year break, especially those from the U.S., China and Europe. Presently, this maker holds orders worth some NT$700 million (US$22.77 million), with production lines already booked through May.

Meanwhile, Quaser Machine Tools Inc., working on various machining centers, scored combined revenue of NT$128 million (US$4.16 million) for January, representing a whopping growth of 33.43 percent over last January, to which, the firm owed partly to surging orders received, and partly to deferred incomes received last December being reported in the month. For the moment, the company's order visibility has extended to up to three and a half months.

Taiwan Takisawa Technology Co., Ltd., dedicated to turning machines, reported combined revenue of NT$187 million (US$6.08 million) for January, soaring 6.81 percent year on year, with the order visibility of around 2-3 months. CENS

Machine Tools, Vertical Machining Centers, Bed-Type Universal Milling Machine

CNC Bed-type Universal Milling Machine

Bed-Type Universal Milling Machine

Vertical/Horizontal Universal Milling

About Us Established since 1988, we are a machinery manufacturer in Taiwan expert in making medium size heavy duty Bed-type Milling Machine and Vertical Machining Center. Our main products are : Bed-type Universal Milling Machine:Equipped with swivel head, In which the rotating cutter can be oriented vertically or horizontally, increasing the flexibility of the machine tool. The sturdy bed-type structure make possible a heavy duty milling deepth of average 5mm / Milling Cut ø160 mm. Bed-type Vertical Milling Machine: Equipped with powerful Vertical Head, this machine is specially designed for your vertical milling demand. It makes a deep heavy milling of 8mm / Milling Cut ø160 mm Bed-type Horizontal Milling Machine: Special in face milling. Vertical Machining Center:With 8000 rpm spindle, high grade Meehanite structure, four square ways or double linear guide ways providing for superior ...

P-ONE MACHINERY CO., LTD.

Vertical Machining Centers, Horizontal Machining Centers

Founded by several professional technicians with experiences in Machine Tools for over 20 years, P-One Machinery Co., Ltd., is a professional, innovative and high-quality insisted manufacturer. P-ONE has successfully researched and developed various products with specific features so far and won high opinions from all walks of life by overcoming all difficulties. Satisfaction and quality are not only our promises and responsibility to customers, but also the main goals that all members at P-ONE strive for. Welcome to visit our factory for demonstration to know more details of our machines. We'll provide our sincere services with excellent quality, most reasonable prices and most punctual delivery.

HG TECHNOLOGY CO., LTD.

High Speed Cutting & High Hard Cutting, Ball Nose End Mills Series, End Mills Series, Materials Cutting Series

HG Technology Co., Ltd., located at Changhua, Taiwan, dedicated to developing, designing, producing, and marketing cutting tools, comprises professionals with sophisticated processing experience that provide extensive services and ensure total customer satisfaction. Our service range extensively covers 3C, semiconductor, medical care equipment, aerospace, and precision molding industries. HG Technology continuously develops more advanced processing technologies based on the enterprise philosophy of extending the lifespan of tools, increasing work efficiencies, minimizing production costs in terms of wear and tear of tools, and maximizing customer benefits. For HGT Carbide End Mills, from material to finished products, HG Technology insists on utilizing the processes provided by the original European manufacturers for the production. We only use high quality and stable German Carbide Rods,

DOPLAS ENTERPRISE CO., LTD.

Extruder, extrusion equipment, plastic recycling equipment, plastic recycling machine, blown film, recycling, recycling equipment

Doplas Enterprise Co., founded in 1995, is one of Taiwan's leading manufacturers of various kinds of plastic extruders, operating a plant in Tainan County, southern Taiwan with a land area of 19,800 square feet. At present, the company's major product lines include plastic-waste recycling machines, high-speed blown film making machines, LDPE/PE/ABS sheet-making machines, two-stage venting recycling machines, strapping tape making machines. The company is capable of rolling out 50 to 60 machines per year. The company says its machinery products feature high productivity, laborsaving, long durability, and easy operation, and are sold under its own brand of "DOPLAS" At present, more than 90% of the firm's total output is exported, mainly to Latin America, the Middle East, and Southeast Asia.

Blown-Film Making Machines

KANG CHYAU INDUSTRY CO., LTD. 42

KANG CHYAU INDUSTRY CO., LTD.

High-speed Inflation Machine, Plastic Bags Making Machine, Blown-film Making Machine, HDPE/LDPE/LLDPE Plastic

Since its founding in 1988 Kang Chyau Industry has worked constantly to bring out new and innovative products and offer customers a wide range of choices. After more than a decade of work our products are now sold in 62 countries around the globe, a true measure of our success in the market. Kang Chyau uses only the finest equipment and materials to ensure that all of our products will be of the highest quality. For example we use SKF ball bearings from Sweden for our main spindles and magnetic switches from Telemecanique of France. Each blow molding machine is equipped with an electronic length counter and an accumulated time meter. In addition, all main output shafts are precision ground for exceptional stability and quiet operation. We are experienced producers of turn-key plants for plastic bag manufacturers, and our broad range of models and acce ...

Plastic Injection Molding Machines

TA AI MACHINERY CO., LTD. 44

TA AI MACHINERY CO., LTD.

Vertical Type Plastic Injection Molding Machines AC/DC, Computer Cable Injection Molding Machines

Our company is a main manufacturer of vertical type plastic injection molding machine established in 1981. Our customers cover more than 30 countries worldwide, include the biggest manufacturer of computer connecter and cable is FOXCONN, they bought over 200 sets of plastic molding machine from us. The molding machine used for making Power Plug, Computer cable, Adapter, Connector, Key, Plastic Zipper, Frame of Glasses, Scissors, Knife handle, Tooth Brush handle, PE tube head jointing, antennas for Cellular Phone, Electronic Parts, Filter, Artificial Flower, PU parts and various products needs insert metal into plastic, it can used for wide range application. Our machine widely used in injecting all kind of thermopl ...

WELL LIH INDUSTRIAL CO., LTD.

Temperature Controller, Chiller, Vertical Injection Molding Machine, Injection Molding Machine, Mold Temperature Controllers

High oil circulation temperature controller

WEI CHI was established in 1987, specialized in producing, temperature controllers and chillers. Based on continuous research, development and innovation, we upgraded quality of temperature controllers and chillers to the highest standards. Nowadays, WEI CHI has become the leading manufacturer in the field. In order to expand business and provide superior service to customers, we invested China operation at Guangzhou in 2001. set up service center at Suzhou in 2002. Meanwhile, we started involving the manufacture of auxiliary equipment for injection molding industry at Suzhou in 2009. WEI CHI has successfully developed wide variety on temperature controllers-icluding high precision models for controlling ± 0.1 °C, large models up to 4Hp, multi-combination models up to 4-in-1, high temperature models up to 350°C . All these can totally ach ...

CAREER INDUSTRY CORP.

Paper Tube/Core Winder, Paper Tube/Core Re-cutter, Paper Can Production Machines, Slitting and Rewinding Machines

Slitting Machine

Career is the leading supplier of paper tube making plant located in Taiwan. We are the only one who is capable of integrating the manufacture of turnkey plant with quality and reliable paper tube production equipments and other related machines made in Taiwan or made in China. We can also provide the knowledge of paper tube production as well as the raw materials. In 30 years of operation, we have great experience in this business field and have successfully installed hundreds of production equipment in 29 countries worldwide.

CHENTA PRECISION MACHINERY IND. INC.

Worm Gear Speed Reducer, Helical Gear Speed Reducer, Hollow Shaft Speed Reducer, Gear Motor, Paddle Wheel

In 1960, Mr. Mao Cheng Chen, president of the company, and two colleagues in the department of Mechanical Engineering at Tainan Engineering College (predecessor of Cheng Kung University) established a company called "Chen Ta Machinery Works". It was named "Chen Ta" in honor of their Alma mater, Cheng Kung University (called Chen Ta in short) Chen Ta Machinery Works specialized in machining jobs such as grinding/re-building of the crankshafts of automobile and vessel engines, cylinder overhaul, and diesel tuning. Due to the excellent technique and cordial service, the company name was soon well known and the business became prosperous. In 1971, Chen Ta Machinery began a partnership with Mitaka Koki, and Jen Wu M ...
