Guidebook to Taiwan Transportation Equipment Guide (TTG)

2016-05 Edition

TTG literally contains Taiwan's best suppliers of auto parts and accessories. If you're looking for well-made, competitively priced cast and forged parts, brakes and components, auto body parts, electrical parts, and repair tools etc., you can't go wrong with TTG. Multinationals and SMEs have relied on this buyer guide for years. 3 Issues per year (Feb., May, Sept.)

Automechanika Shanghai 2016 Highlights Fringe Programme Events

Broad list of business and brand-building events to be held this year

By STEVE CHUANG

Automechanika Shanghai 2016 has an extensive list of top-notch industry events over the four-day show. It has become the annual go-to event for information exchange, marketing, trading and education within the international and Chinese markets for automotive professionals. Unique fringe programme events also add value to the four main industry sectors: Parts & Components, Electronics & Systems, Repair & Maintenance and Accessories & Customising.

The last 11 editions of Automechanika Shanghai have earned the show a reputation for being a renowned and highly professional trade fair with high-quality products, globally-recognized brands and an ever-increasingly diverse fringe programme. The events held during the show are meticulously chosen as modern and time-efficient automotive industry issues. Recognizing the automotive needs of today, finding solutions plaguing the modern vehicle and presenting the developing trends in the industry are the objectives of the fringe programme events being held.

This year's fringe programme is brimming with timely and applicable events and an award ceremony for Chinese auto parts and components suppliers. In collaboration with the Auto Business Review and Betone Business Consulting Company, Automechanika Shanghai will present the "Ling Xuan Award – China Automotive Parts & Components Annual Contribution Award". This award promotes and encourages innovative R&D results by Chinese auto parts and components suppliers. Highlighting these outstanding suppliers, the award aims to boost communication, networking and cooperation between manufacturers and local auto parts and components suppliers. It also enhances suppliers' attention on R&D, connecting them with automotive manufacturers, thus expanding business internationally.

Organizers of Automechanika Shanghai are constantly striving to boost the show and offer new events regarding the latest technologies and programmes within industry sectors. As a result, the show has become one of the best platforms for developing business and building brands within the automotive network. Additionally, Automechanika Shanghai is also a prime location for information and technology exchange, becoming educated or instructing others about the latest developments in the industry and providing an optimal environment for marketing brands and new products through the extensive list of fringe programme events.

Collaborating with many industry associations, leading enterprises and professional media, the extensive network of the organizers will allow for several topics to be discussed during the four-day show, including new changes and compositions of the industry developments. In addition, policy and industry market influences on supply chain management, channel transformation, industry differentiation and integration will be examined.

These events provide the opportunities to deepen exchange of information and promote the overall transformation and upgrading within the industry. Events include the AIAG Auto Parts Purchasing Leadership and Suppliers Summit, which is co-organized with the Automotive Industry Action Group, where several leading suppliers will be invited to the event, including purchasing department representatives and management from Borg Warner, Bosch, Delphi, Federal Mogul, Fiat-Chrysler, Ford, GM, Jaguar Land Rover, Johnson Controls, Lear, Magna, Mercedes-Benz, Volvo and other OEMs and Tier 1s to speak about the sourcing strategy, needs and quality requirements as well as the supply chain development trends for suppliers in Asia. Also, the Automotive Aftermarket Summit 2016, which is co-organized with the Automotive Aftermarket Suppliers Association (AASA), will discuss how parts distributors restructure their product mix and standardise their services to meet repair shops' development needs in terms of business expansion; overseas case studies; an analysis on the US and China aftermarket situation; as well as a panel discussion on the future trends in the global automotive aftermarket. In addition, the International Automotive Congress 2016, co-organized with the Vogel Automotive Media Group and the Institut für Kraftfahrzeuge (ika) RWTH Aachen University, will discuss E-mobility, Powertrain, Intelligent Vehicle, Electric Drive System, EPS Boost ADAS, etc.

E-mobility and Connected mobility are the key trends of the industry and the Electronics & Systems sector covers a broad reach, encompassing all elements of this hot market topic. This year, connectivity, alternative drives, automated driving and mobility services will be amplified during the show. The Connectivity zone will be featured in Hall 4.1.

The Connected Mobility Roadshow Shanghai is a unique event and is part of the Connected Mobility Roadshow three-city tour starting at Automechanika Frankfurt in Germany in September. The event will be held in Shanghai on 1 December and highlight three main themes: Connected Cars, Connected Data and Connected Customers. Renowned speaker Mr Aloke Palsikar, Senior Vice President & Global Head of Manufacturing Vertical Head Tech Mahindra will present "Connected Car Data Monetisation – the Next Frontier" and Mr Nicklas Raask, Senior Director Asia Pacific IT of Volvo

Car Group will examine the topic of "Customer in the Driver's Seat on the Digital Journey". Other topics of discussion include digital disruption in the automobile industry, developments in the field of connected cars and the consequences of these trends on society. The third city to host the Roadshow will be Austin, Texas in the US in the coming year.

The SAE 2016 Vehicle Electrification and Connected Vehicle Technology Forum will be held at Crowne Plaza Shanghai. During the forum, engineers engaged in design, development and research of advanced automotive powertrains, vehicle electrification and vehicle connectivity will provide attendees the opportunity to learn about technological advances, challenges and solutions encountered within the mobility industry. Presentations will discuss the controls of electrified drivetrains, the integration of connectivity, autonomy and the impacts of the various systems. This forum will be presented by experts from OEMs, integrators, 1st and 2nd tier suppliers and academia.

The Repair & Maintenance sector will have a comprehensive educational platform with presentations and training activities, which are primarily targeted toward repair shop managers and technicians. The repair and maintenance terminal chains will be at the show to interact with procurement and supply chains to continue information exchange, business development and expansion. The Time of After Tax-for-Free Reform DRP (Direct Repair Program) Industry Summit, co-organized by China Automotive Maintenance and the Repair Trade Association, will focus on the new market opportunity after tax-for-free reform in DRP. The summit will offer after-sales maintenance service providers with policies and procedures of DRP implementation by insurance companies. In addition, speakers will share insights on international car insurance and maintenance, explore upcoming repair techniques, as well as business development directions.

Falling within the Accessories & Customising sector, the fringe programme will include product presentations and seminars related to the changes and interpretations of the industrial policy of automobile customization in China. Many brand exhibitors, including Amsoil, Bilstein, Liqui Moly and Valvoline, will present new techniques, technologies and applications of their latest lubrication products. These brands will focus on high performance automobile engines to increase the power of sports car and motor racing engines. In addition, professional visitors will also enjoy participating in interactive activities enhancing their experience. The AUTOHAUS CHINA 6th International Dealer Summit 2016 will examine topics including Dealers' After-sales Service Transformation under New Market Environment, and Used cars.

Among the long list of other fringe programme events planned throughout the four days of Automechanika Shanghai 2016, there will be:

- Automotive Aftermarket Top 100 Chain Store Development Forum; China Aftermarket Top 100 Terminal Store Awards Ceremony 2016 (co-organized with AC Auto)
- China Auto Parts Remanufacturing Products Presentation (co-organized with The Remanufacture Committee of China Association of Automobile Manufacturers)
- China Auto Repair and Maintenance Conference 2016 (co-organized with Automotive Service World)
- International Market Development Forum of China Commercial Vehicle and Engine Parts 2016 (co-organised with China Commercial Vehicle Parts Market Federation)
- The Summit: Merger and Acquisition Strategies for Chinese Automotive Corporations in the Overseas Markets; and the Overseas Projects Roadshow (co-organized with Shanghai Anting Auto and Parts Export Base Development Co Ltd)
- Top 10 Engine Award Ceremony 2016; China Engine Technical Conference (co-organized with Auto & Sports)

For more information about participating in the fringe programme events, please contact: Ms. Mathilda Song at mathilda.song@china.messefrankfurt.com or Ms. Yvonne Dai at yvonne.dai@china.messefrankfurt.com.

Automechanika Shanghai is returning to the National Exhibition and Convention Center, Puxi, Shanghai from November 30 through December 3, 2016 and is expected to welcome 5,700 exhibitors and 120,000 visitors. It is organized by Messe Frankfurt (Shanghai) Co Ltd and the China National Automotive Industry International Corporation (CNAICO). It is one of 16 Automechanika fairs held in Africa, Asia, Europe and North, Central and South America. For further information about the Shanghai show, please visit www.automechanika-shanghai.com or contact Messe Frankfurt (HK) Ltd, +852 2802 7728 / auto@hongkong.messefrankfurt.com. [CENS](#)

Automechanika Shanghai 2016 will continue to feature fringe programme events to help participants keep up to date on advances in automotive technologies (photo courtesy of show organizer).

INAPA 2017 to Serve as Marketplace to Bridge the Automotive Players in ASEAN

Show is expected to host over 1,100 exhibitors and attract some 35,000 trade visitors

By STEVE CHUANG

The Indonesia International Auto Parts, Accessories and Equip Exhibition (INAPA) keeps getting bigger. That's a good indication that the auto parts industries are growing bigger and it's clearly proven by the increasing numbers of key industry players such as OEM and aftermarket attracted to this event. INAPA 2016 attracted 1,003 companies represented from 19 countries across the different sectors of the show with 25,920 trade attendees from over 31 countries in 4 days. The show drew the overwhelming praise and it has further proved the event as The ASEAN Largest International Trade Show for Automotive Industry.

Huge Potential to Explore

Few would question that ASEAN is a powerhouse for the automotive industry in Asia and beyond with very promising prospects for the coming years. It presents the double interest of having large markets with important sales growth potential and important automotive manufacturing hubs to produce for Asia and the world.

Indonesia with over 260 million of population (40% percent of the total ASEAN population), growing income per capital, and rising middle class has significantly made the country as a potential market for global automakers. Some of auto-makers have realized the construction of new assembly plants that would roll out new models. They are aimed at tapping the fast-growing Indonesian middle class. In 2016, Indonesia's economy is predicted to grow positive and auto sales is expected to grow high and reach 1.2 millions of unit.

Indonesia has a fascinating development in automotive industry because the country is predicted to be the ASEAN's largest automotive production in 2019 with total vehicle production reaching up to 2.3 million. As a result, Indonesia will become one of top 10 world's auto largest markets. This development is triggered by Indonesia's economic growth which is stable, the automotive sector which increases the investment as well as the enactment of the regulation that supports the growth of the automotive market.

The Gathering Together of Top-end Suppliers and Targeted Buyers

Continuing its great success, The 9th edition of INAPA 2017 is returning for the 9th edition which will be held on March 29 through April 1 at Jakarta International Expo (JIE expo) Kemayoran Jakarta, Indonesia.

The show is forecast to attract more than 1,200 exhibiting companies and 35,000 trade visitors. INAPA is the renowned show for the ASEAN's automobile manufacturers (OEM buyers), auto components manufacturers, auto suppliers, wholesalers, distributors, importers, exporters, governments and insiders in automotive business to gather for discussing the business and finding the latest information.

Furthermore, it is now widely recognized as one of the ASEAN's most comprehensive platforms to observe product trends, as well as new technologies and ideas in the automotive industry across the world and in particularly in Asia. The exhibition is the ideal platform to explore the business and to connect with key industry players.

Highlights of INAPA 2017:

- Over 1,100 companies from more than 25 countries
- Main Zones:
 1. Parts & Systems Zone: Bike, Car, Commercial Vehicle and Heavy Equipment
 2. Tyre & Auto Rubber Zone
 3. Auto Tool + Hardware and Fastener Zone
 4. Automotive Manufacturing (Die & Molding, Welding, Coating and Auto Electronics)
 5. Bus, Truck and GPS Tracking Systems
- Exclusive seminar by the Association and Technical seminar / Presentation by Exhibitors
- Total Size Area: 50,000 sqm, the show will be expanded up to 35% of bigger scale.

In addition to INAPA 2017, Automotive Manufacturing Indonesia 2017 will focus on industrial robotics, mold & die, coating, welding & cutting and auto electronics, while Hardware + AutoTools Indonesia will present the latest technology, innovation, and new product of hardware and auto tools for automotive industry. Both new sections will be impressively attractive for automobile professionals to explore the latest technology and innovation for automotive industry's development. [CENS](#)

INAPA 2017 is expected to attract over 1,100 exhibitors and 35,000 trade visitors (photo courtesy of GEM Indonesia).

Major players in the global automotive and related industries will be present at the show (photo courtesy of GEM Indonesia).

INAPA has been well recognized as the largest, most important trade fair for automotive and related industries in the ASEAN bloc (photo courtesy of GEM Indonesia).

A positive buying atmosphere felt everywhere on the showground is among attractions of INAPA (photo courtesy of GEM Indonesia).

Founded in 1972, Hwang Yu is a TS16949-and ISO140001-certified company specializing in development and production of high-quality aftermarket (AM) automotive steering, suspension and brake components, with over 40 years of manufacturing experience, also being the largest and most comprehensive of its kind in Taiwan, as well as a major player globally.

The company's products are marketed worldwide under its own-brands "3 Star" and "Hwang Yu" that are popular with global customers. It supplies several major product categories, including ball joints, tie rod ends, rack ends, center links, with new product lines added in recent years, including control arms, brake calipers, and stabilizers etc.

With continued and intensive investment in new-product development, Hwang Yu supplies more than 3,500 ball-joint and tie rod-end models (with 150 to 200 new items added yearly), more than 60 brake caliper models (which the maker says are produced with the same-class OE-caliper production lines to have OE quality and reliability), and about 800 stabilizers (in OE numbers).

WETEB INDUSTRIAL CO., LTD.

Chain Tensioners, Chain Guides, Belt Tensioners, & Idlers, Idler, Belt Tensioner, Timing Kits

Founded in 1980, Weteb Industrial specializes in making aftermarket timing items, including chain tensioners, chain guides, belt tensioners, idlers and timing kits, being the largest and most comprehensive supplier of such products in Taiwan. Exporting our Taiwan-made products to the US, Europe, Latin America, South Africa and China under own W.T.B. brand, we also accept custom orders, and develop an average of 40 to 50 new items each year. To ensure higher quality and longer product durability, we use OE-grade materials, produce some key parts in-house, and closely cooperate with five local satellite plants. With high-efficiency production and a large warehouse with sizable quantity of finished and semi-finished products in-stock, we can deliver most catalogued items within 15 to 20 days, and new items in 30 days. JETSHEEN ENTERPRISE CO., LTD.

Engine Parts, Steering System, Fuel Filters

Jetsheen Enterprise Co., Ltd. was founded in 1984. From the beginning, we specialized in automotive fuel filter design, development and production. Our 1,500 square meter facility can manufacture and test over 800,000 filters per month. Quality and durability are Jetsheen's main concerns. To guarantee product reliability, each piece undergoes full inspection and testing. Additionally, samples from each lot are rigorously tested using our automated testing machine (see below.) These samples receive 0~75 psi test with 3 cycles per second for a total of 75,000 cycles. Our stringent quality assurance program allowed us to obtain our ISO 9001 certification in March 1999. But with this in hand, we don't plan to stop our continued technolog ...

HUNYO CO., LTD.

Power Window Motors

Established in 1986, Hunyo Co., Ltd. has been dedicated to developing and manufacturing high-quality and -precision reduction-gear motors for various applications, including automotive power windows. Thanks to their outstanding quality, functionality and durability, Hunyo`s motor products have been popular with global customers. Currently, Hunyo exports motors to major markets such as Japan, Australia, the U.K., Germany and other European nations. Sales in these markets have been enjoying stable growth. Hunyo claims that its high-level reduction gear motors feature many advantages, including high torque, low current, short operation time, narrow space, waterproof, and low noise. To meet special requirements, the waterproof grade of Hunyo`s motors has reached IP66. The company has developed products for Scania (112/113), Volvo (FL10), MAN, ...

Audio/Video/Entert Systems

JENG JIN CAR AUDIO CO., LTD.

JENG JIN CAR AUDIO CO., LTD.

Car Audio, Amplifiers, Audio-Video Systems, Car Audio Amplifiers, Coaxial Speakers, Car Speakers, Audio Systems, Speakers

We have been working on the development of car audio systems since 1974. At the beginning, we have a retail outlet handling various types of installation, design, and tuning for car audio systems. By doing so, we have learnt the pros and cons of top car audio brands. In 1994, we officially introduced the “Audio Focus” brand, where Focus is a reminder for our team to aim for perfection—seeing that every detail is not overlooked. Since 1998, we have won numerous prizes at audio system competitions in Taiwan and mainland China, which has helped us to build a solid reputation among car audio consumers.

automobile parts, gas torch parts Medical**

YUN SHUOH ENTERPRISE CO., LTD. has been established since 1988. It's been 28 years which we have enjoyed a very good and valuable reputation as an esteemed firm in this field. At the very beginning, we dealt mainly with the line of traditional "Automatic Lathe" that can supply products for automotive and mechanical parts. Owing to the market trend and requests by our clients, we switched over to the computerized numerical control (CNC) lathe—milling, lathe, and Swiss type—imported from Japan to promote the efficiencies and accuracies on our products

SHENG CHYEAN ENTERPRISE CO., LTD.

Brass Bar, Iron Bar, Aluminum Bar and Stainless Steel Bar Production Equipment, Melt casting equipment, Continuous Casting Machines

Sheng Chyeon has been providing maintenance service to local wire drawing mills for 20 years. Responding to our customers' requests, Sheng Chyeon has begun to modify and upgrade customers' existing machines. We have extended our service by building new combined drawing machines, which are more suitable to fulfill the requirements our customers' mills. With 20 years experience of maintaining and designing bar drawing machines, Sheng Chyeon has expanded its market from Taiwan to include Germany, USA, Japan, China, Korea, and most of Southeast Asia. Sheng Chyeon's machines are the choice of many clients worldwide because of their value, ease of use, easy maintenance, and very fast delivery. The key to achieving this organisation is the young and energetic engineering team in Sheng Chyeon. The team adopts the latest technology to increase the perf

TZYH RU SHYNG AUTOMATION CO., LTD.

Spring Machine, Spring & Grinding Machine

Established in April 1, 1981, TRS was registered as TRS Automation Co., Ltd. The main service items are spring equipments for vehicles, such as spring machines, spring end grinding machines and peripherals. Our Coiling Machine mainly use for produce wire diameter between 0.8mm to 50.0mm, include 2 axes, 3 axes, 4 axes and 5 axes with built in CNC computerized control system to fully support various requirements of our customers. The wire capacity of spring end grinding machines is from $\phi 0.4\text{mm}$ ~ $\phi 50.0\text{mm}$ and the length of the spring from $\sim 700\text{mm}$ with numerical control (automatic compensate) and the cooling systems including air-cooling and water-cooling types. This item can be combined with spring machines and become the automatic flowing production line, which controls the quality and quantity and largely increases efficiency of products. Over many ...
