Taiwan Gov't to Invest Over NT\$300 M. in Upgrading Local Fastener Industry

By STEVE CHUANG

To help local fastener makers cope with intensifying rivalry from Chinese underselling competitors over the global market, the Taiwanese government recently announced the so-called "NICE" program, to invest over NT\$300 million (US\$9.52 million) to further upgrade the industry in the years to come.

Deputy Director-General Leu Jang-hwa of Industrial Development Bureau under Ministry of Economic Affairs (MOEA) noted that following years of efforts on R&D, Taiwanese fastener makers generally have upgraded their production from DIY-caliber fasteners into those for higher-end applications, including automobiles, aircrafts and railways.

For instance, Leu indicated, Taiwan Railway Administration and Taipei Rapid Transit Corp. both have adopted domestically made fasteners in railway construction. Meanwhile, a couple of local makers, he added, have supplied their fasteners for different purposes to globally known carmakers, such as Audi.

In the aerospace segment, a few Taiwanese fastener makers have even tapped GE's supply chain of aircraft engines. "Such fasteners look earthy, but play an important role in aircraft safety," said Leu, who added that airplanes flown by local airline companies, including EVA Air and China Airlines, mostly employ engines made by GE, indirectly contributing to the local fastener industry.

As a result of the widespread product upgrades throughout the industry, Leu said that the average export price of Taiwan's fasteners have steadily grown over the past years, to NT\$83 (US\$2.63) per kilogram in 2015 from only NT\$66 (US\$2.09) seen in 2006. Also notable is that Taiwan ranked as the world's third-largest fastener supplier in 2015, only trailing China and Germany.

Although Taiwanese fastener makers generally have moved upmarket and established high global profiles for now, underselling rivalry by Chinese competitors remains a major threat among others to their sustainable export growth.

According to statistics compiled by MOEA, the

industry's overall exports during the second half of 2015 declined by 4.5 percent from the same period of a year ago, with those to Europe even showing a steeper drop of over 10 percent, to which MOEA attributes the encroachment by Chinese competitors, who took advantage of China's comparatively cheap steels to undersell their products globally.

Some market observers warned that Taiwan's fastener exports are likely to be eroded more in the near future, after EU canceled in February, 2016 its antidumping duties levied on imports of steel fasteners from China to the EU bloc.

In order to help the Taiwanese fastener industry to better take on the growing threat by Chinese undersellers, MOEA therefore launches the "NICE" program mentioned above.

Leu emphasized that the program is designed to subsidize R&D projects and product upgrades proposed by local makers with a total budget of over NT\$300 million in the next three years, with an aim to optimize the industry's export structure, boost export prices and pump growth momentum into export revenue, and to assist local insiders to fend off underselling competition against Chinese rivals in the global market. [CENS](#)

Taiwan-made fasteners have been increasingly applied in production of aircrafts and automobiles, as well as railway construction and professional purposes (photo courtesy of UDN.com).

HONOR BEST CO., LTD.

Drywall Screws, Chipboard Screws

Honor Best Co., Ltd was establishing in Taiwan in 1984. We succeeded in getting ISO 9002, and we have been furnished the requirements according to ISO 9001 : 2008. Our company offer various Screws, Bolts, Washers, Nails and Collated Screws, which meet International Fasteners Standard, such as American standard ANSI or (IFI), German DIN, British BS, and Japanese standard JIS. Certification**

Lien Ya Machinery Co., Ltd. began in 1987 by providing lathing services with in-house machine tools. Initially, the company's founders, S.T. Shen, C.K. Shen and J.M Shen, set up production of auto parts in a leased space with floorage of sub-100 square meters in Gueiren Dist., Tainan, a southern city in Taiwan. After nearly 30 years of development by embracing the "Built in Taiwan but Bound for the World" motto, the firm, under leadership of its chairman S.T. Shen, has established fine reputation in Taiwan for top product quality. Sticking to delivering high quality and service, Lien Ya is moving forward from built-to-order production to all-around manufacturing service including R&D, to herald its first 60 anniversary.

SHUENN CHANG FA ENTERPRISE CO., LTD.

Screw, Patent Screws, Special Material Screws, Special Screws, Machine Screws, Concrete Screws, Anchor Screw, Furniture Screws

SCF had established since 1984 and situated at Kangshan County with 75 employees. At the beginning SCF had produced the standard parts but slowly turn to the special and precision part and automotive parts as per company transition policy. SCF had an expertise and experience work force in production process. These are from wire selected and purchased, mould and tool prepared, production and quality control technique and etc. This work force will give you the best and satisfied customer service. SCF believed good quality and competitive price are come from the continuous improvement of quality system. At this policy in 2004 SCF thru BVQI had applied authentication from IATF, International Automotive Task Force, of ISO/TS16949. End of 2004 SCF had won the approval, this approval to let SCF's products and services are the best ...

YOW CHERN CO., LTD.

Screws, Aster Screw, Composite Deck Screw, Special Parts, Auto Mobile Oarts, Roofing Screw, Bi-metal Screw, Wedge Anchor

YOW CHERN has established since 1991. At the beginning, our main products are for wood working and furniture screw. We continue to research and develop new products so that we design new product – Aster screw. We have own patent in Europe, U.S.A, Taiwan, and so on for Aster thread design. We also make the best effort to develop Auto mobile parts, OEM and Industrial parts at the same time. We currently have multi-station machines in order to upgrade our production capability. Now we have TS 16949 and TAF Lab certificated so that we strictly control and request for quality in order to offer the best quality to our customers.
