Taiwan's LED industry has gradually rallied during the first half of this year, as reflected in the encouraging performance by insiders for the past few months (photo courtesy of UDN.com).

By KEN LIU

Taiwan's LED Industry Rallies during 1st Half of 2016

Thanks to increasingly strong market demand for LED products worldwide, Taiwan's LED industry has experienced significant recovery during the first half of this year, with insiders generally scoring encouraging performance and expected to

maintain the current growth momentum into the third quarter.

Among them, Epistar Corp., reportedly world's largest manufacturer of LED epitaxial wafers and dies, saw its performance begin

to turn around in June, when its single-month revenue posted a 9.86 percent yearly increase to NT\$2.107 billion (about US\$65.84 million). For the first half, the firm's cumulative revenue totaled NT\$12.613 billion (US\$394.15 million), 5.98 percent less than the corresponding figure posted a year ago.

To further drive its performance, Epistar has taken several strategies, including improving its built-to-order production, merging its subsidiaries with each others to concentrate production, and switching some production equipment for blue LED chips to roll out red LED chips to meet growing market demand, in a bid to turn red ink into black in the third quarter.

Meanwhile, Everlight Electronics Inc., an LED maker, finished the first quarter with a gross profit rate of 25.03 percent and EPS (earnings per share) of NT\$1.02. The company stresses it will likely witness performance continuously grow quarter by quarter, given that its production lines have been booked for the next three months.

Opto Tech Corporation, a manufacturer of LED chips and related products, reported a gross profit rate of 29.5 percent for the first quarter, significantly surging from the peak of 26.99 percent it achieved for 2015, with EPS of NT\$0.21, mostly due to its niche product, anti-static Zener diode, having been accepted by foreign carmakers. Also, the firm has tapped the global supply chain of wearable devices with its sensors, to better boost profitability as result. Market observers generally expect

Opto Tech's performance to be rosier in the second half of this year than in the first half.

Coincidentally, Unity Opto Technology Co., Ltd., a supplier of LED lighting and related products, tallied NT\$702 million (US\$21.93 million) in revenue for June, up 2.54 percent from May or 16.34 percent from last June, adding to its cumulative revenue of NT\$2.05 billion (US\$64.06 million) for the second quarter, soaring by 2.5 percent from the first quarter. For the first half, the firm's revenue totaled NT\$4.05 billion (US\$126.56 million), dropping 10.6 percent year on year.

Unity Opto indicates that the turnaround seen in the recent months is attributable to the recovery of market demand for LED applications, such as lighting products. Under the scenario, the firm confirms that it has garnered many contract orders for LED lighting products lately. Hopefully, the company is expected to see its profits in the second quarter double from the first quarter, and end the second half with 40-50 percent more revenue than in the first half. (SC) [CENS](#)

ETG Lighting Offers Wide-ranging LED Commercial Lighting

ETG Lighting Co., Ltd. is a commercial-lighting manufacturer dedicated to LED products, including T5/T8 linear light tubes, down lights, PAR lights, AR111 lights, flood lights, light bulbs, recessed lights, and panel lights.

The company was founded in 1989 in Taiwan and specialized in traditional lighting fixtures, experience from which the maker has gained over 15 years to later expand into the LED lighting field by taking advantage of such expertise.

Among the company's most striking products is a series of high-power outdoor lamps that are ideal replacements for ceramic discharge metal-halide (CDM) lamps. Its candlelight-shaped bulb for chandeliers is another, which meet European standards.

The company builds LEDs from international big-name suppliers into its newly designed products to cater to mid-range and high-end buyers worldwide.

The ISO9001- and TS16949-certified ETG has won UL and PSE approvals on its T8 and T5 light tubes, which are already available overseas. Its other products are TUV and CE certified.

With in-house R&D team and factory, ETG Lighting is able to supply quality, cost-competitive products.

Over the past two decades or so, the company has built solid technical strength, upheld by precision manufacturing equipment, stringent quality inspection, scientific management, and well trained R&D specialists.

Placing strong emphasis on research and development, quality, service and innovation, the company has been able to develop innovative products in tune with global trends and meeting customers' specific requirements.

The company's lamps go to market with its brand "ETG".

YI-HSING LIGHTING CO., LTD.

Spotlights, Downlights, Track Light, Office Lamps, Special-purpose Lights, Wall Lamps, Chandeliers, Ceiling Mounts

Founded in 1980, Yi-Hsing Lighting Co., Ltd. was originally an ODM who manufactures lamp parts, reflectors, and developed molds. After 3 years of improvement of technology, we started to develop commercial lighting using incandescent light bulb, such as ceiling mounts, downlights, and wall light fixture. We steadily develop downlights and spot lights to offer new light sources as low-voltage halogen light fixture and compact fluorescent light fixture. Having successfully developed HQI lighting in 1992, we have been working on R&D of LED lighting in recent years to further improve our commercial lighting products. Increasing capacity year by year while also stressing quality, we have obtained TÜV and GS certifications, also developing global markets actively, mainly exporting to Europe, Latin America, Australia, the Middle East, Southeast ...

Honn Shing was established in 1973 as the Manufacturer & Exporter of Blade holder and Ceiling fan. At the first 5 years, we produce blade holder of ceiling fan only. There are two factories, over 20,000 square meters. From 1978, our company starting to the assembling complete set of ceiling fan and lighting to oversea buyers till today. Our R&D Department test and investigates each new developed model. After their approval, we start to purchase a small screw to every other part before assembly. We carefully assemble every step in our production line and do 100% inspection after it is finished. So that, we made sure the each ceiling fan, lighting is well taken care of and with correct packed before shipment. In 1982, we own a warehouse in Tampa, FL., U.S.A. to stock and control American market and selling ceiling fan and track light for 10 years. During this period, our own market is in America. In 199 ...

HIGHTEN INDUSTRIAL CORP.

LED, Acrylic, PMMA, Lamps, Lighting Accessories, Acrylic/PC Pipes, Tubes, Rods, and Profiles, Fiberoptic Lamps, Laser Marking

Highten Industries Corporation established in 1989 manufacturing high quality extrusion plastic products in Taiwan and set the second factory in China in 1996 named Ying Long Plastic Products Co., Ltd. In the meantime, we added injection department, to support Taiwanese base lighting and furniture manufacturers at beginning. Now we continue to be a leading supplier of extrusion of PMMA, PC tubing, solid rods, profile lighting diffuser and injection decoration accessories in China today. In order to confirm with local government regulation, we establish another name as Kai Tai Metal and Plastic Products Co., Ltd. For concentrating China local market development in 2002. Please contact our head office in Taipei Taiwan for fast reply without missing. Through the years, Highten's experience and products knowledge has enable them to deve ...

Generate more power for your business with the newest styles and the latest technology at the region's leading trade fair for lighting products. With more than 2,550 quality exhibitors from all over the world expected at **HKTDC Hong Kong International Lighting Fair (Autumn Edition) 2016**, 27-30 Oct, buyers will be spoilt for choice. More than 38,000 buyers from 138 countries and regions visited the 2015 fair.

The fair's downtown location, Hong Kong Convention and Exhibition Centre (HKCEC) in Wan Chai, places buyers in the heart of Hong Kong's bustling commercial and entertainment district.

**Light up
Your Future
with Smart
Choices**

Illuminating the possibilities

With so much on offer, buyers will appreciate the thematic zones which optimise sourcing, including **LED & Green Lighting Zone**, **Hall of Aurora**, **Commercial Lighting Zone**, **Smart Lighting & Solutions Zone**, **Household Lighting**, **Avenue of Inspiration** and etc.

More value in concurrent events

2016 sees the first edition of HKTDC Hong Kong International Outdoor and Tech Light Expo, destined to be a world-leading source of outdoor lighting in particular. Exhibits cover **Outdoor Lighting**, **Lighting Accessories**, **Parts and Components**, **Professional and Industrial Lighting**, and **Advertising Lighting**. The two fairs – Autumn Lighting Fair 2016 and Outdoor and Tech Light Expo 2016 – create the world's leading marketplace for lighting products.

Outdoor and Tech Light Expo is held at AsiaWorld-Expo (AWE), alongside **HKTDC Hong Kong International Building and Hardware Fair 2016**, and **Eco Expo Asia 2016**, both scheduled for 26-29 Oct. Fairs at both venues (HKCEC and AWE) are served by a complimentary shuttle bus service.

Value-added Activities at the Fair

The fairs' seminar programme is designed to benefit participants by updating knowledge in different areas such as style trends, market developments and new technology. And with such a large international gathering, the fairs are ideal for networking at the various social functions.

HKTDC offers exclusive incentive for first-time overseas buyers

For enquiries, please contact Ms Emily To on tel: (852) 2240 4235, or email: hklighting.visitor@hktdc.org
