ADATA Lighting's COB LED High Bay Light features comparatively low operating temperature.

ADATA Lighting Promotes COB LED High Bay Lights for Industrial Application

Products received buyers' strong attention at Hong Kong Int'l Lighting Fair Autumn Edition 2016

At HKTDC Hong Kong International Lighting Fair Autumn Edition 2016, held October 27-30, ADATA Lighting from Taiwan was upbeat receiving quite a few inquiries from professional buyers on its COB LED high bay lights displayed in a booth in Hall of Aurora.

Launched in 2010, ADATA Lighting is an emerging brand owned by ADATA Technology Co., Ltd. of Taiwan, a listed supplier and globally leading branded vendor of memory products. It mainly offers LED indoor lighting products, such as MR16 light bulbs, T8 tubes, downlights, AR111 bulbs,

PAR30 bulbs, PAR38 bulbs, candle lights, as well as LED outdoor lighting, including LED modules, street lights and projection lights, gas station lights, tunnel lights, RGB bulbs, façade lighting and signage lighting.

It is safe to say that the launch of ADATA Lighting is regarded as a foray by the globally prestigious memory maker drawing on its profound knowledge of electronics and ICT technology into the steadily growing global market for LED lighting.

At the exhibition, David Huang, senior sales manager of LED Sales Dept. 1 of ADATA Technology (Suzhou), confirmed that the brand effectively continued to build up a reputation after witnessing a constant influx of trade visitors interested in its COB LED high bay lights on display.

Economical, Safe Solution to Industrial Lighting

Among the series, Huang pointed to the brand new 120W model, which is noted for a color temperature of 6,500K, approximating the color of light outdoors on a sunny day, and luminous flux of as high as 13,200 lumens, translated into a luminous efficacy of 110 lm/W, with a beam angle of 60 degrees and color rendering index of 80.

Furthermore, the fixture is built with unique cooling technology along with a specially engineered lens, and hence guarantees temperatures less than 50 degrees Celsius during operation, a significant improvement from operating temperatures of up to 70 degrees Celsius that are commonly seen in

competing models, according to Huang.

With a modular, one-piece body and simplified structure for easy installation and maintenance, as well as a prolonged lifespan of 50,000 hours, the CE-marked high bay light is an ideal, economical product for industrial lighting, especially suitable in heat treatment plants, steel plants and other workplaces subject to high temperatures.

ADATA Lighting demonstrated its AURA RGB bulbs at the fair.

In addition to the product, ADATA Lighting also promoted its newest commercial lighting fixture, AURA RGB blubs, at the show, which won high accolades from visitors for impressive functionality.

Huang boasted that the bulb is developed with wireless control and combines 256 shades of red, blue and green each, allowing users to choose from 160,000 light colors simply with a smartphone installed with the brand's independently developed app, accessible on Apple Store and Google Play free of charge, and without the need for any Bluetooth bridge.

With the app responding to 64 units of AURA RGB, users can remotely control such a vast number of the bulb at once with a single device, to easily set the perfect mood as needed indoors, and enhance senses of relaxation, warmth and health to improve the quality of their lifestyles with the products.

Moreover, Huang stressed that an AURA RGB produces 550 lumens of light at power consumption of only 7 watts, to highlight a luminous efficacy of 78.5 lm/W, which is allegedly higher than that of any similar product available on the market for the time being.

The brand's focus on exhibiting and promoting the abovementioned products, particularly high bay lights, at the venue is very likely to bear fruit in the short term, as Huang felt that buyers' preference for outdoor and industrial lighting was actually growing.

"The trend results from continuous improvement of luminous efficacy of LED lighting, as well as ever lower replacement cost," he stated. "Given the fact, our LED high bay lights have been able to properly replace 250W halogen lamps in some cases." With related products already delivered to Europe, he concluded to say that the brand is directed in the right direction in product development.

Kevin Chen, Home Resource's product management coordinator, introduced the LED Growth Lights series at HKTDC Hong Kong International Lighting Fair Autumn Edition 2016.

By STEVE CHUANG

Home Resource of Taiwan Displays LED Grow Lights at HKTDC Hong Kong Int'l Lighting Fair Autumn Edition 2016

Futuristic, minimal exterior designs are among features of the products

With LED lighting increasingly applied in growing plants and crops indoors as a promising trend in the industry, Home Resource Industrial Co., Ltd., a major LED lighting manufacturer in Taiwan and with operations across the Taiwan Strait, brought its LED Grow Lights series to this year's HKTDC Hong Kong International Lighting Fair Autumn Edition, held October 27-30.

Kevin Chen, product management coordinator of Home Resource, introduced that the series are developed to meet increasingly strong market demand for grow lights, and has lots of features designed to enhance home décor and address concerns that consumers may have on growing house plants.

Firstly, lighting fixtures of the series all have impressive and functional exterior designs. For instance, one classic model is designed with a structure resembling a desk lamp: a lamp-head is connected to base by a slim arm with curved top and in elegant hues, with the base capped by a transparent shell with an opening at the top for better accommodating plant containers.

Another model has the light source embedded in the inner side of the curved top of a round arch spanning a space over the base, where a plant container holder is mounted. The futuristic, sleek exterior design adds charm to the fixture and makes it easy to carry.

On another front, Home Resource also places heavy emphasis on optical research for the products. Chen stressed that the series are all built with not only red and blue LEDs but white ones as light sources to differ among conventional grow lights. "Research has found that wavelengths of red and blue light affect plant growth," said Chen. "But, Home Resource's growth light adopts white LEDs additionally, mainly for ornamental purposes." Therefore, Chen continued, the lighting fixtures can give off light as required for growing plants, and be switched to white light for displaying and decorative purposes.

Furthermore, the series are also noted for optimally engineered light distribution and beam angles, to allow plants to grow and develop in the direction and within the range of light sources without sprawling branches, a merit especially significant when users would like to keep the areas surrounded by their houseplants clean and tidy, Chen emphasized.

"The series were debuted only two to three months before the show and have been

patented in China," said Chen, adding that the products actually piqued professional buyers' intense interest.

A Well-established LED Lighting Maker

Founded in 1988 in Taipei as a lighting-fixture exporter, Home Resource has become a leading LED-lighting manufacturer in China, offering LED lighting fixture, spotlights, aluminum exterior lamps, aluminum bulkheads, streetlights, garden lights, flood lights, metal halide fixtures and high pressure sodium fixtures.

In 1992, the company invested in setting up a branch in Ningbo, China as Taiwan's first lighting maker with overseas operations in the country; then it established a factory in Dongguan, Guangdong, to make LED lighting fixtures.

Over the past two decades, the company has won the Red Dot Design Award of Germany, Excellent Quality Award of Spain, and Good Design Product of Taiwan, as well as acquiring some 60 patents from Europe, the United States, China and Taiwan, to attain an enviable track record in the line.

The company's products are GS, CE, ETL, CUL certified, and its operations at the Taipei headquarters was certified with ISO9001:2000 by KEMA of the Netherlands in 1999. The ISO certification was upgraded to 2008 version after review by Dekra of Netherlands in early 2011.

This maker is trying to upgrade from contract supplier to OBM, backed up by its strong in-house R&D team, partnerships with foreign designers and Taiwan's academic institutes, and fully equipped laboratories. [CENS](#)

DEX ENTERPRISE CO., LTD.

Desk Lamp Electronic Ballast, High-power-factor Electronic Ballast for Desk Lamp, Electronic Transformers, Dimmers

Founded in 1988, Dex Enterprise Co., Ltd. is a specialist in desk lamp, Electronic Ballasts, Electronic Dimmers, Electronic Transformers, Dimmable Electronic Ballast, Switches, etc., which have penetrated the markets of Europe, the U.S and Japan. With many patents and more than two hundred regular customers, we are able to design and develop according to customer requirements.

YI-HSING LIGHTING CO., LTD.

Spotlights, Downlights, Track Light, Office Lamps, Special-purpose Lights, Wall Lamps, Chandeliers, Ceiling Mounts

Founded in 1980, Yi-Hsing Lighting Co., Ltd. was originally an ODM who manufactures lamp parts, reflectors, and developed molds. After 3 years of improvement of technology, we started to develop commercial lighting using incandescent light bulb, such as ceiling mounts, downlights, and wall light fixture. We steadily develop downlights and spot lights to offer new light sources as low-voltage halogen light fixture and compact fluorescent light fixture. Having successfully developed HQI lighting in 1992, we have been working on R&D of LED lighting in recent years to further improve our commercial lighting products. Increasing capacity year by year while also stressing quality, we have obtained TÜV and GS certifications, also developing global markets actively, mainly exporting to Europe, Latin America, Australia, the Middle East, Southeast ...

Mini joiner. A low profile connector to cleanly and crisply join two straight track sections end-to-end.

W-434
Straight connector. To connect two track sections end-to-end. It provides a center feed option.

W-435
L connector. To connect two track sections at a right angle.

W-436
T connector. To connect three track sections into a T configuration.

W-402

2' track actual length 24". (60cm)

W-404

4' track actual length 48". (120cm)

W-406

6' track actual length 72". (180cm)

W-408

8' track actual length 96". (240cm)

W-410

1M track actual length one meter (100cm)

W-415

1.5M track actual length one and half meter (150cm)

W-420

2M track actual length two meters (200cm)

W-430

3M track actual length three meters (300cm)

W-437
+" connector. To connect four track sections into a cross configuration.

W-439
Flexible connector. To connect two track sections at any angle up to 90° or wall to ceiling or pitched ceiling applications.

W-440
Pendant adaptor provides electrical connection to wire in chandelier or pendant.

HIGHTEN INDUSTRIAL CORP.

LED, Acrylic, PMMA, Lamps, Lighting Accessories, Acrylic/PC Pipes, Tubes, Rods, and Profiles, Fiberoptic Lamps, Laser Marking

Highten Industries Corporation established in 1989 manufacturing high quality extrusion plastic products in Taiwan and set the second factory in China in 1996 named Ying Long Plastic Products Co., Ltd. In the meantime, we added injection department, to support Taiwanese base lighting and furniture manufacturers at beginning. Now we continue to be a leading supplier of extrusion of PMMA, PC tubing, solid rods, profile lighting diffuser and injection decoration accessories in China today. In order to confirm with local government regulation, we establish another name as Kai Tai Metal and Plastic Products Co., Ltd. For concentrating China local market development in 2002. Please contact our head office in Taipei Taiwan for fast reply without missing. Through the years, Highten's experience and products knowledge has enable them to deve ...
