Mainland China Unlikely to Extend Tax-Free Grace Period on Taiwan-Made Machine Tools

By KEN LIU

Citing unnamed sources, the Chinese-language Economic Daily News (EDN) reports that mainland China is unlikely to extend a tariff-exempt grace period on Taiwan-made machine tools destined for the mainland market, despite pleas by Taiwanese makers who wish to be allowed another five years through the trade-in-goods talks between Taiwan and the mainland.

The mainland granted the duty-free treatment to all Taiwan-made, high-end and mid-range lathes bound for the mainland five years ago, according to an article in the Economic Cooperation Framework Agreement (ECFA) signed between the two sides of the Taiwan Strait.

Nevertheless, the article also stipulates that these machines will be subject to a 9.7 percent tax beginning the first day of 2016 if they still fail to adopt controllers either made in Taiwan or the mainland.

After a recent session of the trade-in-goods talks, Director General M.J. Wu of the Industrial Development Bureau, the Ministry of Economic Affairs (MOEA) has basically put the writing on the wall to spell out the uphill battle for Taiwanese machine tool makers regarding the mainland Chinese market. He says although the disagreement between the island and the mainland over some technical issues has scaled down, the mainland remains adamant towards protecting its homegrown machine-tool, flat-panel, petrochemical, and automotive industries,

which China designate as its pivotal industries that call for exigent development.

Chairman B.X. Ke of the Taiwan Association of Machinery Industry (TAMI), which represents nearly 3,000 local machinery builders including machine-tool makers, concedes that the island's high-end machine tools still are not completely outfitted with locally-made controllers, to also indirectly admit to the relatively inferior state of technological development on the island. Japanese and German suppliers remain the major controller sources for the island's machine tools.

Mainland China, besides absorbing some 40 percent of Taiwanese exports, is the largest export destination for Taiwan's machine tools at 30-plus percent of such items.

Paying duty is not the only burden saddling Taiwan's machine-tool makers when selling products to the mainland, Ke notes. The mainland has signed Free Trade Agreement (FTA) with South Korea, whose machine-tool makers are taking advantage of the weaker won-to-greenback rate relative to the NT-dollar to encroach on the market share of their Taiwanese competitors.

IDB's Wu points out that the trade-in-goods talks totally differ from FTA because the talks involve not just the duty-exempt issue but also whether Taiwan should lift the import ban on over 800 China-grown agricultural products, which makes the talks more

Mainland China reportedly will unlikely extend duty-free grace period on Taiwan-made machine tools.

complicated than FTA.

He says the talks on granting duty-free treatment to Taiwan-made flat panels are also not optimistic. The mainland is collecting a five to eight percent duty on Taiwan's flat-panel display makers. Eight years from now, the mainland will allow South Korean makers to export duty-free such displays to China according to their FTA deal.

Wu says although Taiwan's negotiators in the talks tried very hard to convince their mainland counterparts to offer better terms to Taiwan's flat-panel makers than those being tabled to the South Korean makers, they returned empty handed. [CENS](#)

TAMI Projects Taiwan's Machinery Output Revenue to Achieve NT\$1 Trillion Goal in 2016

By KEN LIU

Chairman B.X. Ke of the Taiwan Association of Machinery Industry (TAMI) projects the island's machinery industry to generate five percent higher output revenue this year than it did in 2015 to likely achieve the highly-coveted goal of NT\$1 trillion (US\$30.30 billion).

He bases such upbeat prediction on the forecasts by several organizations that the global economy will improve with a modest degree of certainty this year from last year, as well as the reality that many local machinery makers have been aggressively developing

equipment featuring higher added-value and higher cost/performance ratio.

The Taiwan industry generated total revenue of NT\$955.0 billion (US\$28.93 billion) in 2015, falling three percent year on year to miss the association's 10-percent growth goal. The export revenue was US\$19.43 billion, sinking 6.9 percent from 2014.

Machine tools account for around 15 percent of the Taiwan machinery industry revenue, and saw output revenue down 12 percent year on year to NT\$128.0 billion (US\$3.87 billion)

Taiwan's machinery industry is projected to grow 5 percent year on year to generate revenue of NT\$1 trillion in 2016. (Pictured is a machine tool trade show in Taipei.)

and export revenue losing at annual rate of 15.1 percent to US\$3.19 billion in 2015. Ke estimates the island's machine-tool sector to generate 10 percent growth in output revenue year on year in 2016.

Ke says that many forecasters predict the global economy to possibly strengthen this year from last year, so the association will organize its members to participate in around 40 international trade shows to promote higher value-added, higher cost/performance machines with more government funding.

He notes that Taiwan's machinery sector, as well as electrical and electric industries, heavily depend on exports, with the machinery industry alone depending on exports for 70 percent of sales revenue; with such potentially risky reliance also compounded by the three industries' susceptibility to the fluctuation of the NT-dollar-to-greenback rate.

He urges the newly-elected president Tsai Ing-wen of the Democratic Progressive Party (DPP) to implement defensive devaluation of the NT-dollar to shore up the competitiveness of the island's machinery exports against that of South Korea, whose won has devalued relatively more to enhance its export advantage.

Citing forecasts by Samsung Securities of South Korea, Ke points out that the won will lose 10 percent of value against the greenback to an eight-year low in 2016, when the NT-dollar is projected to drop to 34 to 36 per US-dollar. Even at such projected rate range, the NT-dollar is still stronger than the won to keep Taiwan-made machines less competitive than their South Korean competitors. [CENS](#)

Tung Hsiang Machinery Enterprise Co., Ltd.

Hot-press forming machines

Tung Hsing Machinery Enterprise Co., Ltd. was founded in 1990 in northern Taiwan as a builder of hot-press forming machines.

Thanks to its experienced and well-trained R&D team, the company has expanded product lineup to include rubber injection molding machines, vacuum-type rubber forming machines, hydraulic punch presses, automatic hydraulic machines, printed circuit board (PCB) hot-press forming machines, hot-press testers, thin-film hot-process formers, vacuum-type hydraulic molding machines, hydraulic shaping presses, rubber vulcanizers, rubber hot-press formers, servo-controlled rubber injection molders, vacuum-type rubber hot-press formers, rubber hot-press forming & vulcanizing machines, hydraulic thin-film punchers, single-spindle rubber hot-press formers, air-assisted hot-press formers, valve testers, and rubber cutters.

With 30-plus years of experience, the company has built competitive advantages including the capability to design and make air-assisted, high-pressure forming lines not to mention providing total solutions for energy-efficient servos.

Its solid technical strength is backed by precision manufacturing equipment, stringent quality inspection, scientific management, and innovative R&D specialists.

Its quality control specialists conduct thorough inspection on every single machine before delivery. To minimize customers' cost, the company always tries to maximize usage of container volume to ship as many machines as possible in one container.

Placing strong emphasis on research and development, quality, service and innovation, the company's R&D team has been able to develop innovative products in tune with customers' tailored requirements.

Incredibly adept at converting new ideas into tangible designs, the team believes the key to success in the industry is staying innovative.

Adhering to the motto to provide customers with optimal products and services, the company continues to diligently strengthen its manufacturing capacity and capability by adding new production software and hardware.

Mostly the company builds machines on the basis of original design manufacturing and original equipment manufacturing, shipping some products bearing its "THY" brand

Tung Hsiang is a leading maker of hot-press forming machines in Taiwan.

About Us Established since 1988, we are a machinery manufacturer in Taiwan expert in making medium size heavy duty Bed-type Milling Machine and Vertical Machining Center. Our main products are : Bed-type Universal Milling Machine: Equipped with swivel head, in which the rotating cutter can be oriented vertically or horizontally, increasing the flexibility of the machine tool. The sturdy bed-type structure make possible a heavy duty milling depth of average 5mm / Milling Cut $\phi 160$ mm. Bed-type Vertical Milling Machine: Equipped with powerful Vertical Head, this machine is specially designed for your vertical milling demand. It makes a deep heavy milling of 8mm / Milling Cut $\phi 160$ mm Bed-type Horizontal Milling Machine: Special in face milling. Vertical Machining Center: With 8000 rpm spindle, high grade Meehanite structure, four square ways or double linear guide ways providing for superior ...

KAMIOKA is a historical and well-experienced machinery manufacturer, established in 1965. Over the past decades, KAMIOKA - built on Taiwanese and Japanese technological cooperation - has supplied many key components and machinery to the machine tool industry. Owing to its professionalism and reliability, KAMIOKA recently focuses on the development of computer numerical control machine tools with high speed and accuracy, including CNC machining centers, CNC lathes and precision grinders. With its excellent performance and good reputation from being on the market for many years, KAMIOKA's machines have been approved by many precision-work enterprises like mold processing industries, musical instrument and linear-way manufacturers.

P-ONE MACHINERY CO., LTD.

Vertical Machining Centers, Horizontal Machining Centers

Founded by several professional technicians with experiences in Machine Tools for over 20 years, P-One Machinery Co., Ltd., is a professional, innovative and high-quality insisted manufacturer. P-ONE has successfully researched and developed various products with specific features so far and won high opinions from all walks of life by overcoming all difficulties. Satisfaction and quality are not only our promises and responsibility to customers, but also the main goals that all members at P-ONE strive for. Welcome to visit our factory for demonstration to know more details of our machines. We'll provide our sincere services with excellent quality, most reasonable prices and most punctual delivery.

Mould Engraving & Milling, 5 Axis Machining Center**

Founded in 1996, our company has come up with CNC high-speed engraving/milling machines as a result of innovations from traditional technologies. Our AEM and CEM series are now very popular with customers at home and abroad. Our engraving/milling machines can offer both engraving and milling functions. They are now used in the small-type precision steel mold industry and the shoe mold industry (high frequency, micro-injection, and soles). Our engraving/milling machines can also be used in the zipper molds, gilding molds, electrode molds, mold pattern engraving, character ...

Tool-Lifting

Tsan Hsin is a dedicated manufacturer of hydraulic broaching machines. President Wen Ching Hsu added that broaching machines and equipment are used to make every kind of mass produced products. In fact, a wide range of manufacturing industries use these machines including the automotive part (gear wheels, keyway, brake systems), bicycle component, boat (propellers, rudders), computer part (heat sinks), exercise and recreational equipment (paintball guns) and hand tool (open-end wrenches, screws) fields. For thanks to many companies' support, we are absorbed in research and development more high quality and efficiency design of broaching machine in order to enhance its practical utility and make it more outstanding. For many years, our quality control system already been identified with other companies in the same field, with the enthusiasm and devotion of service and priority of clients to strive for perfection is our ...

Ching-Hung Machinery & Electric Industrial Co., Ltd., established in 1975, is one of Taiwan's largest manufacturers of a wide range of EDMs and wire-cut machines. The company is famed for its own brands of `CHMER` and `GENSPARK` in the world EDM arena. Ching-Hung has been dedicated to developing advanced manufacturing technology for high-quality and reliable EDMs. Over the past decades, the company has concentrated on developing CNC (computerized numerically controlled) EDMs. With an in-house research and development department, Ching Hung claims it has made big breakthroughs in developing user-friendly CNC controllers along with EDM power-supply systems. The self-developed CNC controllers and power-supply systems have helped it save production costs. The company notes its in-house software department is

BRIEF INTRODUCTION Wellcam Machinery Corp., established in 1989, and was starting her business in making varied industrial machines, special purpose machines and sell to the countries in Southeast Asia. The parts used on the machines we developed are as high as 80% to be in-house production. In 1998, we were concentrating in the R&D, manufacture, distribution of tapping machines under the brand name "Wellcam". At the same time we use the tapping machine we made in our other production line as trial and the reference for the machine modification. The machines have obtained good reputation by all our customers overseas who is selling Wellcam Tapping Machines comes from Russia, France, Belgium, Ukraine, Italy, Turkey, India, Indonesia, Malaysia, Korea, China and domestic market. Based on the ever-lasting policy, keep improving ...

Power Chucks, Rotary Cylinder, Collet Chuck

Autogrip Machinery Co., Ltd. was established in 1989. Our workshop is located in Pu Hsin County, ChuangHua, which is close to the state road. It is a remarkable place with convenient transportation and beautiful environment. We specialize in manufacturing the power chuck and Rotary cylinder. So far, we have developed a series of products under 50 inch and some related products. For example the spindle for CNC machine tools, coolant rotary joint, chuck, and cylinder for other purpose. The power chuck and rotary cylinder have been certified by SLG, CE, and ISO9001 standard. In the future, we will continue to improve the quality of the products and strengthen the after sales service to meet customers' demands. In addition, we are pushing for ...

AUTOGRIP MACHINERY CO., LTD.

Power Chucks, Rotary Cylinder, Collet Chuck, Power Hydraulic Chucks, AUTOGRIP, Power Chuck, Rotary Cylinders

Autogrip Machinery Co., Ltd. was established in 1989. Our workshop is located in Pu Hsin County, ChuangHua, which is close to the state road. It is a remarkable place with convenient transportation and beautiful environment. We specialize in manufacturing the power chuck and Rotary cylinder. So far, we have developed a series of products under 50 inch and some related products. For example the spindle for CNC machine tools, coolant rotary joint, chuck, and cylinder for other purpose. The power chuck and rotary cylinder have been certified by SLG, CE, and ISO9001 standard. In the future, we will continue to improve the quality of the products and strengthen the after sales service to meet customers' demands. In addition, we are pushing forward to develop new products and complete our management department so as to lower our cost for our customers.

The company was founded in 1966 as named in Guang Dar Machining Shop and permanent type magnetic chuck was the major product at the time. The first generation of electrical magnetic chuck was developed in 1971 to meet a demand for large size grinding machine which got a very well reputation. Later on, the scale of company became bigger and its name was changed to Guang Dar Industrial Ltd. The first generation of electrical magnetic chuck for planning and milling machines was presented in 1977. As times altered, Guang Dar got through the impacts and developed stably from both of diplomacy and energy crises during that critical time in Taiwan. The name of company was changed to the present one as -- Guang Dar Magnet Industrial Ltd. in 1987 for further bigger scale of space as well as its business. For cooperation to grinding machine demand, a much thinner and lighter and more even on the magnetic field of ...

YUH SHIN ELECTRIC CO., LTD.

Oil Cooled, Transformers, Dry Transformers, AC Voltage Regulator, Welding Transformers, DC Power Supply, Welders, Spoters

Founded in 1982 with a 200sq.m. factory, YUH SHIN supplies mainly oil-immersed transformers to civil engineering contractors, factories etc. for electromechanical applications. Over the years we've also developed the 1- & 3-phase transformers for various welders and electroplating devices that were patented in Taiwan and China in 2001 and soon volume produced for arsenals, IC packing plants, auto/motorbike assembly plants etc.; dry-type transformers for CNC machine tools; resistors, rectifiers, reactors etc.; advanced, precision DC power supplies for wafer sewage treatment plants, IC board electroplating plants, jet fighters, helicopters etc. We are also proud of our creation in 2001, the 6KVA portable pneumatic spot welder with PC control panel for current and time-preset adjustment, which is ideal for makers of machine housings, automotive ...

YE I MACHINERY FACTORY CO., LTD.

Profile / PVC Pipe Manufacturing Lines, Co-extrusion Machines, Inflation Tubular Film Making Machines

Established in 1960, YE I company started with capital of NT\$200,000 and a labor force of only ten, forming a typical family-run company. In 1980, due to business growth, YE I was officially renamed "YE I Machinery Factory Co., Ltd.", and the company staff grew to 120. YE I's business range includes designing and manufacturing a wide variety of plastic extrusion machinery, supplying whole plant equipment, and barrel making. Over the past 30 years, the collaborative support rendered by our customers, around the world, and the continuous endeavors of the company employees have built an outstanding reputation for our company worldwide. In order to revolutionize products, improve production processes, and promote efficiency, we have ...

CHAANG-HORNG ELECTRONIC CO., LTD.

Plastic Surface Treating Equipment, Automatic Width Controller, Corona Treater, Static Eliminator and Staticbar, 3-D Electrical Surface Treatment

Chaang-Horng, As one of the CORONA Treater bases in Taiwan and the influential makers in the market. Founded in 1987, Chaang-Horng Electronics has been dedicating to the manufacturer of plastic surface electron processor and static electricity remover. Which are ideal for antistatic treatment most of plastic film and papers. As well as electro plating film and PP, PS, PE and PET materials. Contact us Taiwan: CHAANG-HORNG ELECTRONIC CO., LTD. 表面電暈處理機

Corona-discharge Plastic Surface Treatment Equipment

塑膠表面電暈處理機針對PE、PP、HDPE塑膠製品、合成樹脂及金屬薄膜等印刷、接著、塗裝前電暈放電之表面改質處理。

Our equipment provides corona-discharge surface improvement treatment on PE, PP, HDPE, synthetic-resin products, and metal membranes prior to printing, binding, or lamination.

Custom samples, specifications
and blueprints welcome!
歡迎來樣、規格、設計製造

◀ Model: FT-800/1500/2000/3000/5000

Features:

1. With a special treatment rod, there is no electrification during discharge.
2. No need to stop the machine during changes of the treatment area.
3. Treatment rod can be freely adjusted from exterior.
4. When the roller stops, discharging stops automatically.
5. Inserting-type roller is easy to change and install.

◀ Model: ST-3000/5000

Features:

1. PP/PE/PS sheet corona treater
2. Speed controlled by frequency converter
3. De-ozonization device

▲ Model: Narrow Web

Features:

1. Removable operator panel can be used for remote control of the center line console.
2. Highly sensitive synchronizer device controls corona treater with line action (on/off).
3. Specially designed, quickly removable (pull-out/push-in) electrode structure, easy off-line maintenance.
4. High-power ceramic electrodes and stainless-steel roller.

▲ Model: AP PLASMA JET

ATMOSPHERE job, you can use CDA or Nitrogen JET output stability, good process uniformity fast speed and high efficiency. Easy to install sprinklers, hand operation or in combination with the production line. AP plasma beam can be up to 65 mm in length.

Whole Plant Equipment for Making PP/PE Woven Bags and Tarpaulin, HDPE High-Speed Blown Film Machine, Circular Loom, Extruder

San Chyi Machinery Industrial Co., Ltd., a professional manufacturer of plastic extrusion machinery in Taiwan, was established in 1980. With more than 25 years of experience, SAN CHYI can manufacture advanced machines for our customers. Our mechanical designers use 3D mechanical designing software to design precision parts on the machines. SAN CHYI has the certification of ISO 9001:2000 to earn more support & trust from our customers. The plastic extrusion machines SAN CHYI manufactured listed as follows: *PP/HDPE/PA/PET Monofilament Making Machine *PP/HDPE Flat Yarn Making Machine *PE Blowing Film Making Machine *Lamination Machine *Circular Loom *Plastic Waste Recycling & Pelletizing Machine *Other Processing Equipments Whole Plant Equipment for Woven Bag/Cement Bag/PP-Paper Bag/Tarpaulin, ...

CHUAN LIH FA MACHINERY WORKS CO., LTD.

Multi Resin/ Color Injection

Multi Resin/ Color Injection

Hirigid and High Speed
Injection Molding Machine

PET Preform Series

The result of more than 39 years of manufacturing experience, CLF double-toggle injection-molding machines offer a broad range of applications, consistent results, plus heavy-duty construction. Their cost advantage is largely due to the standard CLF features that competitors list as options. These apply to all CLF injection-molding machines from 50 to 4000 tons--the broadest line of its kind for your specific job applications. The clamping unit, with rigid double-toggle vertical-action design, produces a firm, even clamping force.

JIN JYE MACHINERY CO., LTD.

Vertical Injection Molding Machines

Over thirty years since its establishment in 1977, Jinjie Machinery Industry Co., Ltd. An expert manufacturer of vertical plastic injection molding machine, has accumulated abundant experience and developed, designed and produced molding machines featuring high degree of precision, efficiency, excellent stability and convenient maintenance, and so on. Jinjie Machinery not only designs and manufactures injection machines according to specifications but also is competent at programming, designing and installing the peripheral equipments concerning the injection machine as required by the customer. Jinjie has gained considerable market share in Taiwan and it also has established many branch companies, manufactories and offices for distributio ...

專業製造溫度控制機・冰水機 Temperature Controllers and Chillers

Since 1987

Temperature control accuracy: $\pm 0.1^{\circ}\text{C}$
Temperature range: $-30^{\circ}\text{C} \sim 350^{\circ}\text{C}$

Taiwan Patent No. M328941
China Patent No. 1015662

Our products are designed for industries that produce :

1. Optical parts, backlight panels, and light diffuser panels
2. Injection-molded products in dustfree rooms
3. Cellphone and PDA parts and accessories
4. Precision magnesium alloy die-casting
5. Precision connectors
6. Rubber lamination
7. Large rollers
8. CDs & DVD

適合行業:

1. 光學零件、背光板、導光板成型
2. 手機PDA零配件
3. 精密連接器成型
4. 無塵室射出成型
5. 光碟片成型
6. 橡膠貼合機
7. 大型滾輪
8. 壓鑄機

HISUN OIL PRESSES CO., LTD.

Vacuum Type Heading Pressure Shaping Machine, Butterfly Automatic Lift Heat Forming Machine

Our company was founded in 1980 to engage in the design and manufacture of all kinds of hydraulic automatic forming machines, including rubber hot press forming machines, steel plate forming machines, gold forming machines, identification badges forming machines, wood grains forming machines, vacuum forming machines, and rubber injection forming molding machines. Our manufacturing capabilities can reach between 10 tons and 5,000 tons. Our corporate management concepts: *Product zero defect is our ultimate goal. *Providing best quality products, reasonable prices, and sincere services. We will continue our R&D and innovation efforts in order to offer more precision and highly stable products for the mold industry in the future. Several new models are now available.

KOU YI IRON WORKS CO., LTD.

Air-blowing Sole Injection Molding Machine, Single/Double Color Sole Injection Molding Machine, Single/Double Color Sandal, Slipper

KOU YI was established by our founder, Mr. Wen Song Jiang, in 1959. At the beginning based on our years of experience in manufacturing mainly hydraulic extort oil machines to consolidate our well technique in design and manufacture hydraulic type machine later on. After several years of efforts and a large sum of research budget, we developed foaming soles jointing and ejecting molding machine series NSK-294, which was issued successfully under all industries passionate expectations and wishes in 1981. The issue of machine model series NSK-294 solved various tough difficulties in shoes industries immediately and saved labors of 30-40 workers (each production line) to save huge labor cost for shoes industries in Taiwan and other countries and enhance product qualities and production capacities. Through several years of research again, we developed t ...

Packing all you want

HERSONBER has been designing and manufacturing high quality packaging machines and food packaging machinery since 1979, and has become a leading brand in Asia as well as many other parts of the world.

HERSONBER aims to supply high quality food packaging machines that meet the most exacting international standards, usually at a fraction of the cost of some leading world brands.

HERSONBER specializes in a full range of vertical machines for handling either liquids or powders and a complete range of horizontal packaging machines. Both product categories use flexible packaging material taken from the reel.

HERSONBER's machines for both vertical and horizontal applications consists of more than 40 different models, ranging from simple mechanical machines to full electronic servo-drive machines. Our horizontal flow-pack range can handle most heat sealing material including polyethylene as well as cold seal material. The range covers high speed candy wrappers from 1000 pieces per minute down to slow speed simple applications. The products range from low cost mechanical machines to full electronic servo machines.

GUGER INDUSTRIES CO., LTD.

Auto Cap Pad Printing Machine, 4 Color Screen Printer Machine, 5 in 1 Combination Pad Printer Machine, Pad Printing-Auto

Guger Industries Co, Ltd. was established on May 8, 1987, working on the study of Pad / Screen Printers, production of their applications, and initiate the new technology of Pad Printer to work on both sides, breaking through Taiwan's traditional Pad Printing History. Guger holds the ideas of "Advanced Research And Study, Precise Manufacturing , Careful Evaluation, Customers First, and Service First", the satisfaction has been passed down between customers by word of mouth, Customer Group started from zero to the present-day scale, there are over 1500 companies, and the agents increase annually, the world wide distribution spots are located in Malaysia, Singapore, Burma, Vietnam, Philippine, Egypt, Saudi Arabia, Brazil, Argentina, Los Angeles, Mainland China, Shen Zun, Shanghai...etc. Guger not only produce printers, We al ...

Four Shafts High Viscosity Planetary Mixers

(Vacuum type)

>>> Applications

Paints and inks, Pigments and Dyestuffs, Cosmetics, Food processing, Pharmaceuticals, Electronics materials and other medium to high viscosity liquid materials.

>>> Characteristics

The four shaft high viscosity planetary mixer uses gears transmission to drive two low speed impellers rotating in the same directions, producing the interactive kneading, twisting and dispersing effects. The two serrated disc shafts rotating in high speeds produce high speed dispersing and emulsification effects. While in the mixing process, the two serrated impeller will produce two whirlpools, matched with two low speed impellers produce best kneading, twisting and dispersing effects. The revolving operation brings the materials inside for complete mixing. The vacuum design mixing environments make the high viscosity materials achieving completely and homogeneously mixing results.

Suitable for viscosity : 100,000cps

Planetary revolving speed : 0~40 rpm

Two low speed impeller : 0~200 rpm

Two high speed serrated discs impeller : 0~1200 rpm

TYPE: 10(Liter) ~ 1500(Liter)

- Completes ISO 9001-2008 Certification.
- Membership of Taiwan Machinery Manufacturing Association.
- To be recommended by Ministry of Economic Affairs-Turn-Key Whole Plants Department as excellent membership.

SHEANG LIEN INDUSTRIAL CO., LTD.

Bakery Equipment, Cake Cutting Machine, Auto Filling Machine, Auto Spring Roll Making Machine

Sheang Lien Industrial Co. exports two categories of machinery; one is food-processing whole-plant equipment (including bread-, cookie-, and cake-making machines, as well as fishery food-processing machines), and the other is auto/motorcycle parts making and hardware making whole-plant equipment. Although we are a recently established firm of five years, most of our staff have more than 20 years' specific experience in the export business. With food-processing machines popular around the world, we are currently exporting our auto/motorcycle parts making and hardware making whole-plant equipment to Southeast Asian countries. We hope that the aforementioned will also become favorites with buyers from the Americas and Africa in the near

Coil and Wedge Insertion Machine**

Stator In-Slot Winder

Gye Tay provides the production line planning and motor manufacture-ability evaluation service. How to choose the machine type to meet monthly quantities and customer's quality target within a set budget is the challenge we look forward to. The Design Team uses ProE to design machines/ toolings more than 20 years and Intralink to manage drawing versions and product life cycle. During new machine development, key part design would be simulated for stress in machine structures and dynamic motion before manufactured with FEA/CAE Software likes Ansys Workbench and PRO/E Mechanical, for better product reliability and design efficiency.

GONG YANG MACHINERY CO., LTD.

Milling Head, Extend Head, Right Milling Type, CNC Milling Head, Linear Swing Multi-angular Milling Head

Founded in 1972, Gong Yang Machinery makes boring & milling heads, milling & cutter heads, radial/universal drilling & milling heads as well as accessories for double-column machine tools. And we've also developed CNC models through constant R&D. Our latest, innovative and multifunctional items—superior to counterparts made in China—have been patented and are winners at the 2008 Taiwan Excellence Awards. Backed by 40-plus years of expertise and many patents, we are recognized and trusted in the machine tool sector. Always professional and pursuing excellence, we continue to enhance production technologies to take on challenges by delivering optimal machining accessories. Warning! Gong Yang Machinery Co., Ltd., headquartered in Taiwan, has subsidiary in China: Shanghai, Qingdao, Wuhan, Kunming, Gong Yang Precision Machinery Co., Ltd. ...
