Taiwan's Top-end Blown Film Machine Suppliers Keep Developing High-performance Models Catering to Fussy Customers

One maker applies gear motors to keep up with industry trends

By STEVE CHUANG

After seeing sharp shrinkage in size mostly due to overwhelming rivalry from underselling rivals worldwide, it may have been impossible for Taiwan's blown film sector to return to its heyday. However, local surviving insiders are still working hard on improving machines and technologies, in efforts to satisfy increasingly fuzzy customers.

Kang Chyau

As one of the best-known Taiwanese suppliers of whole-plant equipment for plastic bag production, as well as the island's top-3 company of this kind by annual export volume, Kang Chyau Industry Co., Ltd., founded in 1988 in New Taipei City, northern Taiwan, has maintained a robust growth during the first half of this year, confirms the chairman, C.I. Kang.

With over 50 years of experience in plastic processing, Kang indicates that his company has continuously researched and developed new machines to have higher performance, greater functions and lower power consumption, while having improved machine's mechanical design to better handle different plastic compound at lower costs. "Kang Chyau leads the sector with its rich know-how of plastic formulas and mechanical

design for various key components and parts, including screws and gearboxes," says Kang. "With those competitive advantages, our company has gained prestige among professionals all over the world."

Another proof of Kang Chyua's proven global prestige is that the company was just designated by Taiwan External Trade Development Council, a semi-official exporter and the organizer of Taipei Plas, as a leading Taiwanese supplier of plastic inflation equipment to receive exclusive interviews by an international press delegation consisting of professional reporters from the U.S., India, Germany, Turkey, Brazil and Japan. "The common conclusion among those foreign reporters after the interviews is that Kang Chyau is a truly competent maker of plastic inflation equipment," the chairman says gleefully.

Twin Head Blown Film Machine

Committed to continuous R&D, the company has newly launched its twin head (A/B/A Layer) HDPE/LDPE/LLDPE plastic inflation machine, coded KMTL-4545T, to meet customers' growing demand for great efficiency, diverse functionality and high productivity.

Built with twin die heads and two 3-horsepower cooling blowers, the equipment can churn out two 10-32 kilogram rolls of films per hour, with the winding unit built with DC motors with 1/2 horsepower to drive rollers 760mm in width, and the take-up unit using AC motors to achieve take-up speed of 85 meters per minute. The extruder unit is developed with an AC 20HP motors coupled with an inverter and two high-quality, improved screws with diameter of 45mm, and features heating capacity of 18.8kw and four barrel cooling fans, therefore helping enhance energy efficiency and overall performance.

With an improved electric control system, this machine is also highlighted with outstanding stability and safety, suitable for making films of HDPE, LDPE and LLDPE and with thickness and width of 0.01-0.15mm and up to 400mm, respectively.

Han King

Han King Plastic Machinery Co., Ltd. is also a veteran plastic inflation equipment supplier headquartered in Chiayi County, central Taiwan, and noted for its strong R&D capability.

The managing director C.J. Wu emphasizes, continuously sharpening competitive edges by engaging in research and development of automatic, multi-layer blown film machines that can handle different materials with high efficiency and performance to meet market demand is the key element of Han King's current success.

"Han King boasts decades-long experiences in developing plastic inflation machines and related parts, as well as ample known-how of metalworking processes, therefore having survived the growing rivalry from emerging competitors in the past decade," says Wu.

For instance, the chairman went on to say, the company's superior technological advantage

can be reflected in its own-designed screws, which are developed with advanced mechanical engineering technology, and repeatedly improved from real-world use for several months, thus featuring higher precision, better quality and longer lifespan than competing models. "Han King is also versed at developing gearboxes and other key components, which can be regarded as a scale to measure capabilities of top-end machinery manufacturers."

Presently, over 95% of the company's machines are shipped overseas under its owned brand King Plus, with 30% of its exported machines going to China alone, 20%

Han King is Taiwan's leading supplier of multilayer blown film machines.

Heavy-duty (FFS) Blown Film Machine

Among Han King's product lineup, comprehending multi-layer co-extrusion blown film lines, slip-proof and bi-convex embossing devices for heavy duty films, blown film lines connecting with printing devices, high speed resin inflation machines, LDPE/LLDPE blower film machines, LHE

inflation machines, HDPE blown film lines for vest bags and garbage bags, agricultural and industrial-use huge film production Lines, etc., the Three-layer Heavy Duty (FFS) Blown Film Machine is deemed by Wu as a promising hot-seller, particularly at a time when global market demand for eco-friendly, innovative packaging is increasingly strong.

Wu stresses that PE heavy-duty bags are increasingly applied in industrial packaging to replace woven bags, partly because such material is recyclable, and partly because conventional PP woven bag making machines generate more waste materials and call for more peripherals and manpower to operate. Besides, PP woven bags are subject to laminating, hence unfriendly to the environment.

Han King's three-layer heavy-duty blown film machine is built with its high-performance screws, gearbox and air rings and other high-quality components, and comes with an in-line embossing/gusseting machine and printing machine, thus great productivity of 350 kilograms per hour to match competing models made in Germany and Italy. Besides, the machine adopts an improved electric control system and independently developed software, which are seamlessly integrated with each mechanical component to ensure maximized performance, easy operation and great safety.

"This machine received intense attention from visitors at ChinaPlas 2014 and demonstrated how strong Han King's R&D capability is," says Wu, adding, "In fact, King Plus has been regarded a strong contender against German suppliers in the Chinese market, where sales contributes around 30-35% to our annual turnover."

With its branded sales aggressively growing, Wu confirms that Han King will begin construction of a new plant in Taiwan in the coming two years, which will have five times the space of the current factory. "For

decades, Han King has constantly focused on R&D and continuous improvements of quality and technical services, in efforts to help customers make money with our high-performance machines and build trustworthy, long-term partnerships with them. And this is the strategy we stick to for sustainable development in the increasingly challenging market," he says.

Jenn Chong

With its blown film machines, including mono layer and multilayer models, popular with customers in North and Central and South America, mostly due to high functional customization, Jenn Chong Plastics Machinery Works Co., Ltd. has also enjoyed a solid name in the line.

Tony Wang, general manager, attributes the company's current success to devotion to R&D to achieve functional customization in its machines to maximize customers' profitability. "Mostly thanks to our strong R&D capability, we even garnered on-spot orders placed by satisfied buyers at ChinaPlas this year, even though we didn't demonstrate any physical exhibits there," he adds cheerfully.

Wang mentions that nearly all staff from R&D engineers, sales agents to operators and electricians are involved in R&D to improve performance, because such full participation enables the company to work out improved machines that meet market demand and can be well fitted to customers' production lines.

To make sure its extruders can truly address requirements by increasingly fuzzy end-users, Wang noted that the company, for instance, builds improved servo motors and fully automatic control into its machines to meet market trends toward energy-saving, high-performance machines that can minimize the generation of waste throughout production. For higher added-value, the company also tries new materials to change machine's exterior design.

The company's R&D capability has been continuously sharpened not just through feedback from customers, but also through long-term partnerships with foreign high-profile companies. Wang stated that his company has been engaged in developing machines that can handle high transparent shrink films made of PE, in cooperation with its upstream supplier, Dow Chemical, a globally known chemical company.

Beefed-up Multi-layer Co-extrusion Blown Film Extruder

The multilayer co-extrusion blown film extruder has been among Jenn Chong's top-sellers for high speed, stable quality and great profits it can generate for users, and the series will be beefed up with a brand new transmission system.

Wang says, "We are trying to build an improved transmission system composed of four motor gears into the blown film machine, so as it can be directly connected to the extruder to attain higher performance and space saving." Besides, the general manager furthers, such a transmission system has lots of advantages over conventional ones composed of belts, gearboxes and motors, such as less noise, 30-40% lower power consumption, and, particularly, more stable operation, as the system can keep rolling even if one of the four gear motors is malfunctioning."

"Presently, few Taiwanese manufacturers use gear motors in transmission systems, partly because they are costly, though it has been a growing trend in the global machinery industry," explains Wang. "Since Jenn Chong is committed to R&D, we decide to apply such components and technology in our machine to boost added value for customers to inaugurate this trend among Taiwanese suppliers."

To further promote the brand new blown film extruder, Wang reports that his company will

also take part in exhibitions in Japan, Mexico and Burma during the second half of this year. (SC) [CENS](#)

JENG FENG CUTTER MANUFACTURE INDUSTRY

**Parts for Paper Making Machines,
Cutters, Knives, Parts and
Accessories for Industrial
Machinery, Industrial Knives**

JENG FENG CUTTER MANUFACTURE INDUSTRY CO., LTD" establishes good reputation with trust because of our developing knife / cutter skill and service. As an experienced cutter / Knife / blade manufacturer and provider in Flexo Knives, Flat plate cross knives, Copper foil cut knife, Circular knives, Round tooth knives, Cutter for cement bag and all kinds of Industrial knives. In order to satisfy customers to use our products in more convenient way, we keep on researching under the positive spirits of our trademark in lead to the leadership position.

CHUAN LIH FA MACHINERY WORKS CO., LTD.

Industrial Machinery, Plastic Injection Molding Machine, Other Plastic Processing Machine, Plastics Extruders

The result of more than 39 years of manufacturing experience, CLF double-toggle injection-molding machines offer a broad range of applications, consistent results, plus heavy-duty construction. Their cost advantage is largely due to the standard CLF features that competitors list as options. These apply to all CLF injection-molding machines from 50 to 4000 tons--the broadest line of its kind for your specific job applications. The clamping unit, with rigid double-toggle vertical-action design, produces a firm, even clamping force.

Bed-Type Universal Milling Machine

About Us Established since 1988, we are a machinery manufacturer in Taiwan expert in making medium size heavy duty Bed-type Milling Machine and Vertical Machining Center. Our main products are : Bed-type Universal Milling Machine: Equipped with swivel head, in which the rotating cutter can be oriented vertically or horizontally, increasing the flexibility of the machine tool. The sturdy bed-type structure make possible a heavy duty milling depth of average 5mm / Milling Cut $\phi 160$ mm. Bed-type Vertical Milling Machine: Equipped with powerful Vertical Head, this machine is specially designed for your vertical milling demand. It makes a deep heavy milling of 8mm / Milling Cut $\phi 160$ mm Bed-type Horizontal Milling Machine: Special in face milling. Vertical Machining Center: With 8000 rpm spindle, high grade Meehanite structure, four square ways or double linear guide ways providing for superior ...

ALGOOD CO., LTD.

CNC lathed parts, hardware, test probe, electronic parts., rotating shafts, optical fiber connectors, timepiece parts

Algood Co., Ltd. was founded in 2000 and initially relied on CNC turning machines made by Nomura DS Co., Ltd. of Japan to specialize in making test probes for printed circuit boards (PCBs) and precision components. Later on it expanded into production of CNC lathes parts, electronic components, rotating shafts, hardware, optical fiber connectors, timepiece parts, and medical equipment parts like dental posts by fully tapping the know-how related to making precision parts that it had accumulated early on.

CHUNG SHIAN ELECTRICS & MACHINERY CO., LTD.

CNC Engraving and Milling Machine

Chung Shian Electrics& Machinery Co., Ltd. is a specialized machine-tool manufacturer renowned for its deep expertise, constant innovations, and superior products. We have a team of outstanding engineers, and all of them have over 20 years' manufacturing experience in the precision-tool industry. Despite all the difficulties and challenges we've been confronted with since our establishment, we've developed a wide range of machine tool models, and have earned high recognition for the unique features of our machine products from our customers both at home and abroad. "Customer satisfaction and a quality warranty" are always our responsibility and our promise to customers, and the motto is exactly what all Chung Shian staff will continue to i ...

About Us Established since 1988, we are a machinery manufacturer in Taiwan expert in making medium size heavy duty Bed-type Milling Machine and Vertical Machining Center. Our main products are : Bed-type Universal Milling Machine: Equipped with swivel head, in which the rotating cutter can be oriented vertically or horizontally, increasing the flexibility of the machine tool. The sturdy bed-type structure make possible a heavy duty milling depth of average 5mm / Milling Cut ϕ 160 mm. Bed-type Vertical Milling Machine: Equipped with powerful Vertical Head, this machine is specially designed for your vertical milling demand. It makes a deep heavy milling of 8mm / Milling Cut ϕ 160 mm Bed-type Horizontal Milling Machine: Special in face milling. Vertical Machining Center: With 8000 rpm spindle, high grade Meehanite structure, four square ways or double linear guide ways providing for superior ...

KAMIOKA is a historical and well-experienced machinery manufacturer, established in 1965. Over the past decades, KAMIOKA - built on Taiwanese and Japanese technological cooperation - has supplied many key components and machinery to the machine tool industry. Owing to its professionalism and reliability, KAMIOKA recently focuses on the development of computer numerical control machine tools with high speed and accuracy, including CNC machining centers, CNC lathes and precision grinders. With its excellent performance and good reputation from being on the market for many years, KAMIOKA's machines have been approved by many precision-work enterprises like mold processing industries, musical instrument and linear-way manufacturers.

CHIN HUNG MACHINERY CO., LTD.

CNC Lathes, High Speed Precision Lathes

Our founder, Mr. C.F Chang established the factory in Taichung City and serviced the metal working industry by one lathe in 1968. Since 1973, we began made the lathe and named as "CHINHO Machinery Factory". In 1980, we moved the factory to Ta-Ya, Taichung country and reorganized as CHIN HUNG MACHINERY CO., LTD. In order to expand the product, we built the new factory for CNC lathe in 1996 and installed next year. Since 1980 the high speed precision lathe of CHIN HUNG was cooperated with Kingston Machine Tool Mfg., Inc., by mark "KINGSTON". The sales volume always keeps on the top of the list of successful manufactures. For expanding the market "HAMAMATSUKOKI" through G-NET and inspected by J.M.I. (Japan Machinery & Metal Inspection Inspection) up to standard. Chin Hung is the first ...

Ching-Hung Machinery & Electric Industrial Co., Ltd., established in 1975, is one of Taiwan's largest manufacturers of a wide range of EDMs and wire-cut machines. The company is famed for its own brands of `CHMER` and `GENSPARK` in the world EDM arena. Ching-Hung has been dedicated to developing advanced manufacturing technology for high-quality and reliable EDMs. Over the past decades, the company has concentrated on developing CNC (computerized numerically controlled) EDMs. With an in-house research and development department, Ching Hung claims it has made big breakthroughs in developing user-friendly CNC controllers along with EDM power-supply systems. The self-developed CNC controllers and power-supply systems have helped it save production costs. The company notes its in-house software department is

SANES PRESSES CO., LTD.

Precision Power Presses, CNC Power Presses, CNC Punch Presses, Hydraulic Punch Presses, High Speed Precision Power Presses

SANES, established in 1980, has mastered the manufacture of mechanical press and forging press machines. SANES presses are designed to meet all your both usual and unusual requirements, while providing smooth production. Through tireless quality improvements and developments over years we have gained the confidence and a good reputation from our customers to keep on developing new models. SANES had successfully developed the Japan market in 1985. Asahi Forge Co., Ltd. A famous forging factory in Japan, imported our forging press nine years ago, reassure our quality. SANES successfully developed the first link press set in Taiwan in 1991, which overcame the problems of the traditional mechanical presses. The slow engaging speed and high withdrawing speed considerably reduce noise and vibration during operation, improve operation

WELLCAM MACHINERY CORP.

Machine Tools, Tapping Machine, Drilling Machine, Vertical Drilling Machines, Tapping Machines

BRIEF INTRODUCTION Wellcam Machinery Corp., established in 1989, and was starting her business in making varied industrial machines, special purpose machines and sell to the countries in Southeast Asia. The parts used on the machines we developed are as high as 80% to be in-house production. In 1998, we were concentrating in the R&D, manufacture, distribution of tapping machines under the brand name "Wellcam". At the same time we use the tapping machine we made in our other production line as trial and the reference for the machine modification. The machines have obtained good reputation by all our customers overseas who is selling Wellcam Tapping Machines comes from Russia, France, Belgium, Ukraine, Italy, Turkey, India, Indonesia, Malaysia, Korea, China and domestic market. MAROX TOOLS INDUSTRIAL CO., LTD.

Milling Tools, Face Mills, Side Mills, End Mills, Boring Bars, Tool Holders, Shell Mill, Carbide Tool, Cutting Tool, Shell End Mills

Founded in 1976 and initially a maker of special tools, cutters and welded milling cutters, Marox Tools Industrial Co. has diversified its line to meet demand, including disposable milling cutters that were made for American and Japanese customers on an OEM basis in 1979. To enhance production quality and efficiency, we've installed complete NC/CNC machining centers (5-axis models), testing, measuring and inspection instruments, enabling us to turn out lathing tools, tool holders, face, side, end, vertical and shell milling cutters, carbide end mills, boring cutters, threading, grooving and cutting tools, as well as cartridge holders and tungsten carbide boring-cutter bars. With steady, 10% annual growth, we export 80% of output to the USA, Australia, India, Japan, Korea, Hong Kong, Malaysia, Indonesia, the UK, Italy, Portugal, Chile, ...

Power Chucks, Rotary Cylinder, Collet Chuck

Autogrip Machinery Co., Ltd. was established in 1989. Our workshop is located in Pu Hsin County, ChuangHua, which is close to the state road. It is a remarkable place with convenient transportation and beautiful environment. We specialize in manufacturing the power chuck and Rotary cylinder. So far, we have developed a series of products under 50 inch and some related products. For example the spindle for CNC machine tools, coolant rotary joint, chuck, and cylinder for other purpose. The power chuck and rotary cylinder have been certified by SLG, CE, and ISO9001 standard. In the future, we will continue to improve the quality of the products and strengthen the after sales service to meet customers' demands. In addition, we are pushing for ...

The company was founded in 1966 as named in Guang Dar Machining Shop and permanent type magnetic chuck was the major product at the time. The first generation of electrical magnetic chuck was developed in 1971 to meet a demand for large size grinding machine which got a very well reputation. Later on, the scale of company became bigger and its name was changed to Guang Dar Industrial Ltd. The first generation of electrical magnetic chuck for planning and milling machines was presented in 1977. As times altered, Guang Dar got through the impacts and developed stably from both of diplomacy and energy crises during that critical time in Taiwan. The name of company was changed to the present one as -- Guang Dar Magnet Industrial Ltd. in 1987 for further bigger scale of space as well as its business. For cooperation to grinding machine demand, a much thinner and lighter and more even on the magnetic field of ...

Tapping spindle hard

Milling spindle head unit, Machining
Spindle

Hann Kuen is a specialized manufacturer of milling spindle, drilling spindle, milling spindle units, drilling spindle units, tapping spindle units, various spindles, hydraulic slide, cutting tools and relative machinery accessories with more than 25 years' experience. Besides manufacturing, Hann Kuen also represents many well-known brands from Taiwan and worldwide, i.e. SAFEWAY- vise, STANNY-boring system, CHANDC chuck, SKODA-live center from Czech Republic, NAREX-milling angle head from Czech Republic, BLAKE-centering indicator from USA etc... The body material of our boring and milling head unit is made of FC30 casting, which is under highly precision of process by boring and honing. The Alloy Steel is under process of heat-treatment as spindle parts and assembled with NSK or SKF bearing as well. Its accuracy is always within 0.005mm. These kinds of spindle units are ...

The world largest linear motion products manufacturer; Hiwin Technologies Corp. is certified of ISO 9001, ISO 14001, and OHSAS 18001. To deliver the best quality for precision mechanical parts, Hiwin plants are well designed to ensure an environment with constant temperature, stable humidity, and zero vibration. The complete products series include ballscrew, linear guideway and linear stage. All products are with the features of high speed, high precision, multifunction, and environment protecting. Hiwin has strong management and powerful global resource integration capability to engage with the high precision requirements in machine tools and automation equipments. In Hiwin, we continue to deliver value-added products for our customers.

JUN-EN, one of the leading companies in Taiwan, has been in the metal mesh industry for over twenty years. During these years, we have been servicing thousands and thousands of satisfied clients, both international and domestic. Our reputation in the industry is well recognized. In recent years, our R & D team has devoted their time and talent to designing and developing and developing of improve productivity also in adding the market of mesh machinery to our regular business lines, Because of its competitive price and high quality, our machines have been sold to many parts of the ...

LEAD LONG MACHINERY CO., LTD.

Metal Mesh Machine, Expanded Metal Mesh Machine

Established in 2001, Lead Long Machinery is one of the leading manufacturer of metal mesh machineries, including Expanded Metal Machine, Perforated Metal Machine, Chain Link Fence Weaving Machine, Barbed Wire Machine, Razor Barbed Tape Wire Machine, etc. All machineries and components are designed and developed precisely to achieve the highest quality and standard. The machines produced by Lead Long Machinery are not only user friendly and high productivity, but also diversified. For making expanded metal mesh, perforated metal, barbed wire, razor barbed wire, chain-link fencing etc.

YUNSING INDUSTRIAL CO., LTD.

Shearing Machines, Bending Machines

Yunsing Industrial Co., Ltd. was founded in June 1972. Having been engaged in business for more than 30 years and gained practical experience, the company specializes in producing automatic cold roll forming machines and products such as roofing and wall cladding, auto parts, furniture, corrugated sheets, stepped tile roofing, floor decking, C-Channel, ceiling T-bars and partitions, rolling shutters and door frames. Our staff and workers have been tirelessly devoted to the research and development, which had helped significantly in promoting quality products, meeting international standards, as well as achieving a considerable market share in domestic and foreign markets.

CHUNG TIE ELECTRICITY WELDING MACHINERY CO., LTD.	111
YUH SHIN ELECTRIC CO., LTD.	112

CHUNG TIE ELECTRICITY WELDING MACHINERY CO.,

Spot Welding Machines, Multi-Spot Welding Machines

Welding machines : We would like to introduce ourselves as the manufacturer and specialized in making welding since 1972, started at welding machine for metal wires. In 1974, we developed the welding machine for fan grille. We upgraded the machine to be automatic instead of semi-auto operation. Also kept on improving the whole plant equipment for fan network welding. Those precision and high efficiency equipments for molding industry make the production cost lower and profit increasing. In 1985, we developed a series of welding machines for the industry. Such as: 1.Multi-spot welding machine. The machine is automatic feeds and suitable for welding the steel of construction, racks and flat steel surfaces. 2.Hydraulic multi-spot welding mach ...

表面電暈處理機

Corona-discharge Plastic Surface Treatment Equipment

塑膠表面電暈處理機針對PE、PP、HDPE塑膠製品、合成樹脂及金屬薄膜等印刷、接著、塗裝前電暈放電之表面改質處理。

Our equipment provides corona-discharge surface improvement treatment on PE, PP, HDPE, synthetic-resin products, and metal membranes prior to printing, binding, or lamination.

Custom samples, specifications
and blueprints welcome!
歡迎來樣、規格、設計製造

◀ Model: FT-800/1500/2000/3000/5000

Features:

1. With a special treatment rod, there is no electrification during discharge.
2. No need to stop the machine during changes of the treatment area.
3. Treatment rod can be freely adjusted from exterior.
4. When the roller stops, discharging stops automatically.
5. Inserting-type roller is easy to change and install.

◀ Model: ST-3000/5000

Features:

1. PP/PE/PS sheet corona treater
2. Speed controlled by frequency converter
3. De-ozonization device

▲ Model: Narrow Web

Features:

1. Removable operator panel can be used for remote control of the center line console.
2. Highly sensitive synchronizer device controls corona treater with line action (on/off).
3. Specially designed, quickly removable (pull-out/push-in) electrode structure, easy off-line maintenance.
4. High-power ceramic electrodes and stainless-steel roller.

▲ Model: AP PLASMA JET

ATMOSPHERE job, you can use CDA or Nitrogen JET output stability, good process uniformity fast speed and high efficiency. Easy to install sprinklers, hand operation or in combination with the production line. AP plasma beam can be up to 65 mm in length.

HAN KING PLASTIC MACHINERY CO., LTD.

Three-layer Heavy Co-Extrusion Blown Film Line, Agricultural-use Huge Film Production Line (Single/Double/Triple-layer)

The leader of Han King Plastic Machine Co., Ltd. has already invested several decades of striving in this field of Blown Film Machine with utmost fervor. Since the company established, We always insist on keeping the idea of 'innovation', 'excellent quality', 'good service' and 'satisfactory' in management. We can customized to meet customer requirements and to achieve humanity machinery with professional and sophisticated technology. In accordance with the different requirement from customer, the design of whole plant equipment, the layout of machinery and formula of raw material, etc., are supported with most modern program by Han King's expert team with utmost training constantly. Overall processing include the selection of spare parts, raw material and assembling of machinery are finalized on a strict control. Repeated machine test before delivery ...

PITAC INT'L MACHINERY CO., LTD.

Extruder, Pipe Machine, Sheet Machine, Profile Machine, Plastic Recycle Machine, PLASTIC FOAM EXTRUSION LINES

PiTAC Int'l Machinery Co., Ltd. was established in 1983. With our comprehensive expertise in organization of production lines and machine design, we have been dedicating ourselves in the field of Plastic Extrusion / Injection Process for more than a decade. For the Plastic Foaming Extrusion process, Freon blowing agent has been used since 1985 and now replaced by Butane in PiTAC 's extrusion system. The latest developed has been the re-introduction of a new Type of Freon (R142, R134) again. Moreover, PiTAC constantly develops new kinds of blowing agents and processes in an effort to make production safer, more efficient as well as more economical.

PITAC INT'L MACHINERY CO., LTD.

Extruder, Pipe Machine, Sheet Machine, Profile Machine, Plastic Recycle Machine, PLASTIC FOAM EXTRUSION LINES

PiTAC Int'l Machinery Co., Ltd. was established in 1983. With our comprehensive expertise in organization of production lines and machine design, we have been dedicating ourselves in the field of Plastic Extrusion / Injection Process for more than a decade. For the Plastic Foaming Extrusion process, Freon blowing agent has been used since 1985 and now replaced by Butane in PiTAC 's extrusion system. The latest developed has been the re-introduction of a new Type of Freon (R142, R134) again. Moreover, PiTAC constantly develops new kinds of blowing agents and processes in an effort to make production safer, more efficient as well as more economical.

SAN CHYI MACHINERY INDUSTRIAL CO., LTD.

Whole Plant Equipment for Making PP/PE Woven Bags and Tarpaulin, HDPE High-Speed Blown Film Machine, Circular Loom, Extruder

San Chyi Machinery Industrial Co., Ltd., a professional manufacturer of plastic extrusion machinery in Taiwan, was established in 1980. With more than 25 years of experience, SAN CHYI can manufacture advanced machines for our customers. Our mechanical designers use 3D mechanical designing software to design precision parts on the machines. SAN CHYI has the certification of ISO 9001:2000 to earn more support & trust from our customers. The plastic extrusion machines SAN CHYI manufactured listed as follows: *PP/HDPE/PA/PET Monofilament Making Machine *PP/HDPE Flat Yarn Making Machine *PE Blowing Film Making Machine *Lamination Machine *Circular Loom *Plastic Waste Recycling & Pelletizing Machine *Other Processing Equipments Whole Plant Equipment for Woven Bag/Cement Bag/PP-Paper Bag/Tarpaulin, ...

TAI SHIN PLASTIC MACHINERY CO., LTD.

Single and Twin Screw Extruder, Extrusion Line for Pipes, Extrusion Line for Profiles, Extrusion Line for Reinforced Hose

TAI SHIN has been manufacturing equipment for plastics processing industry since 1976. Through years of experience, we have achieved a large number of innovations. Moreover, we have contributed to the success of the industry as a partner in innovation with:

- Extrusion lines, wherein our comprehensive expertise is combined with high technical quality.
 - Individual advice and planning for optimum and efficient production. This is our strength and your advantage
- Delivery program:
- Complete extrusion lines for Flexible hoses reinforced with yarn spiral insert
 - Flat hoses reinforced with polyester yarn
 - Flexible hoses with embedded steel wire spiral
 - Shower hoses reinforced with foil spiral insert
 - Suction/discharge hoses reinforced with rigid PVC spiral

Hirigid and High Speed
Injection Molding Machine

PET Preform Series

The result of more than 39 years of manufacturing experience, CLF double-toggle injection-molding machines offer a broad range of applications, consistent results, plus heavy-duty construction. Their cost advantage is largely due to the standard CLF features that competitors list as options. These apply to all CLF injection-molding machines from 50 to 4000 tons--the broadest line of its kind for your specific job applications. The clamping unit, with rigid double-toggle vertical-action design, produces a firm, even clamping force.

WEI SHENG Machinery Company design and manufacture the most comprehensive range of plastic granulators, such as silent type recuperators, powerful granulators, instant recycling granulators, and waste recycling and grinding system etc. Constant innovation and break through has been WEI SHENG's philosophy since the company was established. We always strive hard for company's progress and growth at a steady step. Our R&D engineers, with their experience, expertise and theorem, constantly develop new models with higher production efficiency and productivity to meet customer's requirements. In addition, our engineers also constantly improve the existing model to bring better performance and reliability. Our dedicated craftsmen have rich experience in the manufacturing of granulators. Rigorously quality control is conducted at each step during manufacturing process. All these create high efficiency,

HISUN OIL PRESSES CO., LTD.

Vacuum Type Heading Pressure Shaping Machine, Butterfly Automatic Lift Heat Forming Machine

Our company was founded in 1980 to engage in the design and manufacture of all kinds of hydraulic automatic forming machines, including rubber hot press forming machines, steel plate forming machines, gold forming machines, identification badges forming machines, wood grains forming machines, vacuum forming machines, and rubber injection forming molding machines. Our manufacturing capabilities can reach between 10 tons and 5,000 tons. Our corporate management concepts: *Product zero defect is our ultimate goal. *Providing best quality products, reasonable prices, and sincere services. We will continue our R&D and innovation efforts in order to offer more precision and highly stable products for the mold industry in the future. Several new models are now available.

KOU YI IRON WORKS CO., LTD.

Air-blowing Sole Injection Molding Machine, Single/Double Color Sole Injection Molding Machine, Single/Double Color Sandal, Slipper

KOU YI was established by our founder, Mr. Wen Song Jiang, in 1959. At the beginning based on our years of experience in manufacturing mainly hydraulic extort oil machines to consolidate our well technique in design and manufacture hydraulic type machine later on. After several years of efforts and a large sum of research budget, we developed foaming soles jointing and ejecting molding machine series NSK-294, which was issued successfully under all industries passionate expectations and wishes in 1981. The issue of machine model series NSK-294 solved various tough difficulties in shoes industries immediately and saved labors of 30-40 workers (each production line) to save huge labor cost for shoes industries in Taiwan and other countries and enhance product qualities and production capacities. Through several years of research again, we developed t ...

hersonber

Packing all you want

HERSONBER has been designing and manufacturing high quality packaging machines and food packaging machinery since 1979, and has become a leading brand in Asia as well as many other parts of the world.

HERSONBER aims to supply high quality food packaging machines that meet the most exacting international standards, usually at a fraction of the cost of some leading world brands.

HERSONBER specializes in a full range of vertical machines for handling either liquids or powders and a complete range of horizontal packaging machines. Both product categories use flexible packaging material taken from the reel.

HERSONBER's machines for both vertical and horizontal applications consists of more than 40 different models, ranging from simple mechanical machines to full electronic servo-drive machines. Our horizontal flow-pack range can handle most heat sealing material including polyethylene as well as cold seal material. The range covers high speed candy wrappers from 1000 pieces per minute down to slow speed simple applications. The products range from low cost mechanical machines to full electronic servo machines.

Established in 1977, we have engaged in these professional fields more than 26 years. Mainly, we export our machines to south-east Asia, America, Europe and the Middle East. And we have enjoyed an excellent reputation for our items in Taiwan. Our main lines of products can be divided into 5 categories as below: 1.)Fully automatic printing and packing machine. 2.)Metal stretch net making machine. 3.)Cotton bud making plant. 4.)Incense-making machine series. 5.)Full set of plant equipments for bamboo & wood productions. For years of research and technological improvements, we trust that our products are good at quality and its functions. Moreover, we can according to our customers' requirement to design new patent machine.

Granulating Machine: Having accumulated many years of experience in the design of manufacturing processes and whole-plant equipment, our company specializes in designing and manufacturing production equipment for the pharmaceutical, food processing, and chemical engineering industries, as well as other associated peripheral equipment. Major business scopes:

- * Granule-making machinery for the pharmaceutical, food processing, and chemical engineering industries.
- * Low temperature vacuum condenser.
- * Extraction systems, extraction tanks, stainless steel stirrers, and storage tanks for pharmaceutical and food processing.
- * Water-cooled centrifugal grinders and mineral grinders.
- * Vertical crushers.
- * High- and low-viscosity liquid

D.C. Winch, Hoist, Crane, Wire Rope Hoist, Electric Chain Hoist, Gantry Crane, Eot Crane, Winch, A.C. Winch, Crane Scale

Taiwan Hoist & Crane Co., Ltd specializes in producing and exporting various kinds of hoists, cranes, winches and accessories; emphasizes in quality first and manufacturers under strict quality control procedure to ensure products meet all international standard requirements. Available products include electric wire rope hoist, electric chain hoist, air hoist, AC/DC/ATV winches, safety conductor system, C track system, pendant station, radio remote control and other accessories. To pursue excellence in quality is our number one goal. We are proud of our development of an integrated quality assurance system to control every details to ensure all products in superior safety and long lasting reliability. Contact us right now, we are assured you that Taiwan Hoist & Crane Co., Ltd is your best choice.

MAXIMUM ELECTRONIC CO., LTD. was founded to set up a factory in Tainan, Taiwan in 1978 by several Taiwan experts in the electronic industry to produce temperature controller and thermo-couple. Our products are highly evaluated in Taiwan and in more than 100 countries all over the world. In 1988 due to the enlarging size of the domestic thermo-couple market, our company launched another branch, More Shine Electronic Heat Co., Ltd., which produces all kinds of thermo-couples and probes, serves as an agent for Japan companies to import materials from Japan. In 1989 we further expand our production base to Southeastern Asia and set up a factory in Thailand, a move which have gained admiration from local electronic ...

KAI CHIA MACHINE CO., LTD.	212

GYE TAY MACHINERY WORKS

Slot Cell Insertion Machine, Coil Winding Machine, Coil and Wedge Insertion Machine

Stator In-Slot Winder

Gye Tay provides the production line planning and motor manufacture-ability evaluation service. How to choose the machine type to meet monthly quantities and customer's quality target within a set budget is the challenge we look forward to. The Design Team uses ProE to design machines/ toolings more than 20 years and Intralink to manage drawing versions and product life cycle. During new machine development, key part design would be simulated for stress in machine structures and dynamic motion before manufactured with FEA/CAE Software likes Ansys Workbench and PRO/E Mechanical, for better product reliability and design efficiency.

KAI CHIA MACHINE CO., LTD.

Piston Pumps, Hydraulic Pumps, Hydraulic Motors, Hydraulic Equipments, Pressure Pumps, Vane Pumps, Vane Motors, High Pressure

Our company "Oriental Star Chemical Inc." was established in 1991. It is located in Taichung, Taiwan. We have many years' experience in studying the rubber properties and designing relevant recipes for our customers. The various master batch accelerators and refined processing rubber produced by our factory can meet the special demand from different customers. Besides, our excellent technology in carbon black processing and the strict quality control are well acknowledge and accepted by our domestic and foreign customers.

NAN DEE PRECISION GROUP is a professional CNC machining, milling and turned parts manufacturer.

Over 30 years experience and technology, we are known for our outstanding performance in the industry. We constantly upgrade our products to meet the international standards. We hold a team of professionals, which provides on time deliveries with high quality. Our sincerity and hard work has helped us certified ISO 9001 and TS16949 in both Taiwan and China factory to match our quality with international standards.

Specialized in:

- | | |
|---|----------------------------------|
| 1.Connector parts (Military usage RF & R) | 9.Various Industrial Usage parts |
| 2.Aerospace Commercial parts | 10.Bicycle parts |
| 3.Medical Equipment parts | 11.Titanium parts |
| 4.Pneumatic & Hydraulic parts | 12.Hardware parts of cell phone |
| 5.Aim Point parts | 13.Mini plastic parts |
| 6.Shaver & Epilator parts | 14.O-Ring & Plastic Steel parts |
| 7.Automotive machined & turned parts | 15.Assemble service |
| 8.Camera parts | |

Main materials:

Carbon Steel, Stainless Steel, High Speed Steel, Tool Steel, Plastics, Non-ferrous, Brass, Bronze, Aluminum and Titanium.

Secondary treatment:

Grinding, heat treatment, plating, anodizing, sand blasting, ultra sonic cleaning...ect. We are confident that we can satisfy your needs and offer the best service to you!
