Taiwanese Machine Tool Exhibitors at CIMT in Beijing Upbeat About Landing Ample Orders from Mainland Firms

Compiled By KEN LIU

Taiwanese exhibitors at the 14th China International Machine Tool Show (CIMT), held Apr. 20-25, 2015 at China International Exhibition Center in Beijing, were generally upbeat about prospects to land ample orders from mainland Chinese manufacturers this year in light of the mainland's improved purchasing managers' index (PMI).

China's official PMI, widely regarded the indicator of level of activity at large industrial firms, rose to 50.1 in March from February's 49.9, a touch above the 50-mark that separates growth from contraction.

Taiwan External Trade Development Council (TAITRA), the semi-official trade promoter backed by the Taiwan government, predicts Chinese manufacturers to remain the world's biggest buyers of Taiwan's machine tools this year at the show.

Industry executives project buoyant manufacturing industry in the mainland and America to drive Taiwan's machine-tool industry into a cyclical expansion stage of business this year, to make Taiwan's manufacturers involved in machine-tool technology a focus for stock investors.

China's buoyant manufacturing industry to drive Taiwan's machine-tool industry.

Among Taiwan's heavyweight exhibitors at this year's show were Hiwin Technologies Corp., Goodway Machine Co., Ltd., Awea Mechantronic Co., Ltd., Tongtai Machine & Tool Co., Ltd., Shieh Yih Machinery Industry Co., Ltd., Falcon Machine Tools Co., Ltd., Taiwan Takisawa Technology Co., Ltd., Delta Electronic Inc., Advantech Co., Ltd., and Nexcom International Co., Ltd.

Industry executives predict this year Hiwin to mostly rely on its ball screws for machine tools used by carmakers, bearings and heavy-duty bearings to drive revenue growth.

The company's ball-screw production lines are running at full capacity to fill booked orders, which will keep the company's lines humming at least throughout this June.

The company's heavy-duty bearing designed for minimal 20-kilogram workload adopts some unconventional technology to possess an edge over typical counterparts to drive up the company's bearing sales this year, industry executives say.

Foreign institutional investors forecast the company's after-tax net income for this year to exceed the NT\$10 milestone to NT\$11.54 per share based on the company's better-than-expected revenue for the first quarter, and the optimistic forecast of a 15-18 percent sequential growth in the second quarter.

In the first quarter, the company, reportedly the world's No.2 maker of ball screws and linear guide ways for precision machinery, had consolidated revenue of NT\$3.63 billion (US\$117.29 million), surging 20.7 percent year on year to hit seven-year high. Industry executives forecast the company's revenue for 2015 to cross the NT\$15.8 billion (US\$509.67 million) it set in 2011.

Hiwin Chairman Eric Chuo says the company is receiving ample orders for linear guideways and ball screws and has begun delivering industrial and healthcare robots, forecasting the company's revenue for the second quarter to outperform its first-quarter level.

Hiwin has taken over Luren Precision Co., Ltd., a leading Taiwanese maker of gear cutting tools, spin pumps and machinery, to strengthen its robot manufacturing capacity.

Goodway, recognized as Taiwan's No.1 maker of computer numerical control (CNC) lathes, depends on China for a quarter of its consolidated revenue. The company projects its consolidated revenue for this year to hit the NT\$10 billion (US\$322.58 million) milestone partly driven by sustained growth in China's demand for cars and motorbikes, with mainland Chinese manufacturers therefore having to increase orders for Goodway's lathes.

To date, Goodway still has NT\$600 million (US\$19.35 million) of undelivered orders while its subsidiary, Awea, still has NT\$1.7 billion (US\$54.83 million) of backlogged orders, all of which will keep the two companies' production lines busy throughout the end of the third quarter.

To keep up with such brisk order volume, Goodway is boosting production capacity at its manufacturing sites on both Taiwan and the mainland.

In the first quarter, Goodway reported consolidated revenue of NT\$1.81 billion (US\$58.45 million), up around 11.6 percent from NT\$1.62 billion (US\$52.38 million) posted in the same quarter of last year. Industry executives predict the company's after-tax net income at NT\$1.3-1.5 per share for the first quarter, hitting another high in company

history, with its 2014 per-share figure being NT\$6.88 per share.

Yuanta Financial Holdings Co., Ltd. has raised its target price of Goodway shares to NT\$93 (US\$3) for 2015.

Falcon generated consolidated revenue of NT\$315 million (US\$10.16 million) in March, spiking 50 percent year on year, which helped swell the company's revenue to NT\$609 million (US\$19.64 million) throughout the first quarter, increasing around 9.3 percent from NT\$557 million (US\$17.96 million) achieved a year ago.

Industry executives predict the company to swing to profit of around NT\$0.1 per share in after-tax net income in the first quarter from loss.

This year, Tongtai mostly exhibited machines for processing aircraft and automotive components at the Beijing trade show. Industry executives predict the company's consolidated revenue for this year to rise at least 20 percent year on year to top NT\$10 billion (US\$322.58 million), partly due to several new products it recently rolled out and revenue contributed by the French machine-tool maker PCI-SCEMM it recently acquired.

Shieh Yih expects steady orders at least throughout the third quarter after a spike seen in the second quarter. The company unveiled a new factory in Kunshan, China last year to target taking a bigger slice of China's market for machines used in aircraft and automotive industries.

Industry executives project the company's revenue from Chinese operations to rise 50 percent year on year in 2015.

Shieh Yih is pursuing the goal to be a globally top-5 press brand in three to five years by trying to increase revenue at double-digit rate a year.

CNC-system maker Advantech demonstrated its latest ADAM line at the Beijing show.

Although the company says it is likely to attain the goal of increasing revenue by 16 percent year on year this year, industry executives are uncertain if such goal would be derailed by growing reluctance among customers in developing economies to place orders, the slowing recovery of the economy stateside, and the hazy outlook of mainland Chinese and European economies, as well as potentially disastrous outcome from a "Grexit."

Advantech is predicted by industry executives to make NT\$5.43 billion (US\$175.41 million), or NT\$8.63 per share, this year and NT\$6.10 billion (US\$196.80 million), or NT\$9.68 per share, next year, each rising 10.8 percent and 12.1 percent year on year.

Nexcom exhibited control systems that connect to the Internet to be an Internet of Things (IOT) solution for CNC machines and automated factories. [CENS](#)

Devalued yen and won are hurting Taiwan's machine-tool export competitiveness. (a machine tool trade fair in Taipei shown)

Relatively Cheaper Yen and Won Hurt Taiwan's Q1 Machinery Exports

Compiled By KEN LIU

In the first quarter, Taiwan's machinery exports rose a moderate 4 percent, contrasting machine-tool exports' drop of 2 percent from the same period of last year mostly due to the continual impact of the relatively steeper devaluation of South Korean won and Japanese yen, according to the Taiwan Association of Machinery Industry (TAMI).

Revealing the harsh truth beleaguering

the machinery sector with hands tied, the newly-elected TAMI Chairman B.X. Ke says the industry is watching closely if exports keep falling in April, and emphasizes that further undermining of Taiwan's machinery export competitiveness by relatively cheaper currencies of major rivals would spell disaster.

Likely echoing sentiment of many other sectors in Taiwan that rely on export revenue, Ke urges the government to allow the NT-

dollar-to-greenback rate to fall to 33-to-1 to strengthen the island's machinery makers' competitiveness on global markets.

Ke says the NT-dollar traded at 31.58:1 U.S. dollar on average in the first three months of this year, down 4.36 percent from the same period of 2013, and has been trading around 31.2:1 in April. Since 2007 the NT-dollar has devalued 4.3 percent against the greenback, compared to the South Korean won's 15.2 percent and Japanese yen's 35 percent, he notes.

Without pointing out the precise mechanisms, whether artificial or due to market forces, Ke says that the NT-dollar-to-greenback ratio has fluctuated along different gradients relative to that of the yen and won, hence resulting in Taiwan's total exports dropping 8.9 percent year on year in the first quarter.

The TAMI data shows that Taiwan shipped US\$4.87 billion of machinery overall in Jan.-Mar., increasing 4 percent from the same period of last year, but, when denominated in NT-dollar, up 8.8 percent year on year to NT\$154.1 billion.

Such lukewarm growth has given forecasters a wake-up call as the industry had originally predicted optimistically a 10 percent increase for the whole year, which was based on the strong growth in the first two months. In the first two months, Taiwan shipped US\$3.13 billion of machinery, rising 9.5 percent year on year, but as high as 14.9 percent to total NT\$98.9 billion.

On monthly basis, Taiwan's exports dropped year-on-year 1.3 percent in March from a strong 25.7 percent surge in January and a

moderate 3.1 percent growth in February, with the revenue being NT\$56.7 billion (US\$1.82 billion) in January, NT\$42.2 billion (US\$1.36 billion) in February and NT\$54.9 billion (US\$1.77 billion).

Ke points out that China was Taiwan's largest export destination for machinery in the first quarter, with purchase of US\$1.35 billion, or 27.8 percent, of Taiwan-made machines to register a 14.9 percent year on year increase. The U.S. imported US\$810 million, or 16.6 percent, of Taiwan-built machines, to be the No.2 buyer, albeit with the imports down 2 percent from the previous year. Japan purchased US\$294 million, or 6 percent, of Taiwan-built machines, for a 7.9 percent decrease year on year to be the No.3 importer.

Taiwan exported machine tools totaling US\$798 million in the first quarter to mark a 16.1 percent increase in January, US\$208 million for a 10 percent decrease in February and US\$302 million for a 9.8 percent contraction year on year.

China was also Taiwan's top export destination for machine tools in the first quarter, importing US\$239 million, or 30 percent, of Taiwan-made machine tools for a 3.6 percent decrease year on year. The United States came in second to absorb US\$89.17 million, or 11.2 percent, of Taiwan-built machine tools to mark a 1.7 percent growth year on year. Turkey was the No.3 buyer, importing US\$50.62 million, or 6.3 percent, of Taiwan-made machine tools to register a 19.6 percent surge.

The chairman points out that the approximately 40 percent of devaluation of the Japanese yen is undermining international

buyers' interest in buying Taiwan's machine tools, to make competition more complicated for the island's manufacturers.

Without pointing out the political marginalization of Taiwan by China and hence other nations, he is also worried about the South Korea-European Union free trade agreement (FTA), which took effect July 1, 2011, as well as the South Korea-American agreement, which became effective March 15, 2012. Both agreements facilitate expansion of South Korean machine-tool makers' market shares globally to sideline or compromise competitiveness of Taiwan-made machines.

The finalization of the Sino-South Korean FTA in late 2014 is predicted to enable South Korean machine-tool makers to encroach on the market share of Taiwanese competitors in China, via more advantageous trade terms as lower duties.

Ke urges the Taiwan government to accelerate the talks with China to include the island's machine-tool sector in the Cross-Strait Agreement on Trade in Goods, which is based on the Economic Cooperation Framework Agreement (ECFA) signed bilaterally in 2010, to counter South Korea's trade agreements.

Another threat looming is from mainland Chinese manufacturers that wrest shares from Taiwanese manufacturers of low-end, mid-range machine-tool markets. Such phenomenon is inevitable as mainland Chinese operators gradually learn via cooperation with and working for Taiwanese makers, to slowly gain capacity to duplicate technologies to set up their own business. The same process happens in Taiwan among all kinds of businesses. [CENS](#)

Taiwan's Exports of Machinery and Machine Tools in Q1, '15

Category	Machinery	Machine Tool
Export revenue	US\$4.87bn	US\$798M
YoY change (%)	+4.0%	-2.0%
Top 3 export destinations by percentage of Taiwan's total exports	Mainland China (27.8%) U.S. (16.6%) Japan (6.0%)	Mainland China (30.0%) U.S. (11.2%) Turkey (6.3%)
Note	TAMI originally forecasted 10% increase year on year each for the island's machinery and machine-tool exports in 2015.

LIH CHANG MACHINERY CO., LTD.

ARGO Lih Chang Machinery Co., Ltd.

»»» CNC HI-SPEED MACHINING CENTER, VERTICAL MACHINING CENTER AND TURRET MILL

Lih Chang Machinery Co., Ltd., founded in 1984 to make conventional vertical turret milling machines, has sold more than 10,000 units so far and is a globally well recognized maker in the line. To meet diverse requirements from customers, the firm has steadily diversified its line to include vertical turret milling machines, CNC tapping centers, CNC high-speed machining centers, and CNC machining centers.

The company is committed to the development of high-quality products and maintaining the lead. In pursuit of product reliability and stability, Lih Chang employs a seasoned R&D team working to upgrade manufacturing technology, as well as applying reliable quality-control system to ensure trustworthy operation.

Lih Chang's advanced CNC machining centers feature proportional machine appearances, with isosceles triangle structures of meehanite cast iron to cut weight and enhance rigidity. The machines are equipped with energy-saving LED lighting and patented protection covers to lower noise and improve durability, with optional 4th and 5th axis on worktable to strengthen manufacturing flexibility. Besides, machines with automatic pallet-changers are convenient for tooling adjustment to boost production efficiency.

Lih Chang began promoting its own "ARGO" brand in 1989 and has sold machines under that brand in global markets. With over 90% of its milling machines exported, the maker also offers after-sales service through agents that offer consultation and maintenance. Committed to consistent product upgrade and innovation, ARGO has kept boosting precision, stability and efficiency of its products, as well as developing new models with high speed, high precision, and multi-function to meet customers' requirements.

WELLCAM MACHINERY CORP.

WELLCAM MACHINERY CORP.

HT-36V
立式油壓攻牙機
Vertical Hydraulic Tapping Machine

特點：
1. 手動攻牙操作，靈活廣角度範圍作業
2. 扭力強、攻牙順暢
3. 零件採模組化設計，維修時更容易更換

Features:
• Manual tapping, with flexible operating range.
• Powerful torsion allows for smooth tapping.
• Modularized parts are easy to replace and maintain.

GT-12VL
立式氣壓攻牙機
Vertical Hydraulic Tapping Machine

特點：
1. 高效率的攻牙速度
2. 貫穿或盲孔、牙攻均受保護
3. 定位快速，工作範圍大
4. 90度垂直攻牙，位移確定標準度
5. 應用範圍：攻牙、倒角、絞孔、鉗孔、鎖螺絲

Features:
• Efficient drilling.
• Protection-loaded through-hole or blind-hole tapping.
• Rapid positioning, with a large working area.
• 90-degree vertical tapping features precise, standard displacement.
• Applicable for tapping, chamfering, reaming, drilling, and screwing.

YI CHANG SHENG MACHINERY CO., LTD.

YI CHANG SHENG MACHINERY CO., LTD.

Automatic clothes-hanger forming and making machines and turnkey equipment

Founded in 1982, Yi Chang Sheng Machinery Co., Ltd. supplies clothes-hanger making machines and turnkey equipment, as a globally competitive supplier from New Taipei City, northern Taiwan.

Drawing on decades-long expertise, Yi Chang Sheng supplies a full line of clothes-hanger making equipment, from wire straightening machines, plastic coating machines, cutting machines, wire winding machines, and forming machines, as well as turnkey solutions, including an integrated automatic clothes-hanger line, which can turn out around 2,700 hangers hourly with consistent quality to help customers generate bigger margins.

Since its start-up, Yi Chang Sheng has been devoted to developing and manufacturing top-caliber clothes-hanger making equipment in line with market trends and customers' requirements, therefore enjoying a higher profile over its peers.

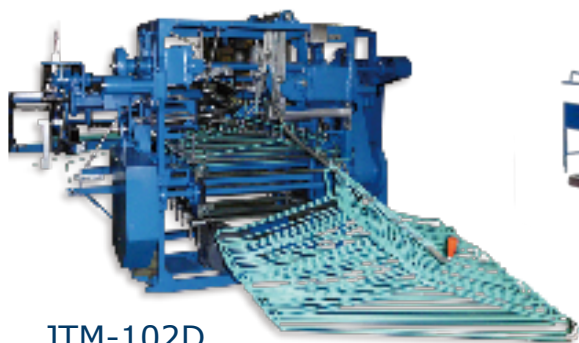

To set itself apart from rivals in the competitive landscape, this seasoned manufacturer consistently applies high-quality materials and components in production, and puts heavy emphasis on R&D based on such key aspects as automation, high capacity and manpower efficiency, all of which have paid off as its machines and turnkey equipment are highly regarded by demanding customers as economical, reliable alternatives that can drive competitiveness and profits.

The company, with a D&B D-U-N-S registration numbered 656537490, has been increasingly recognized by customers all around the world in the past few years, when it has improved its machines to feature higher capacity but smaller dimensions and lower manual input.

HAN KING

Turning Plastic into Promising Profit Specializing in plastic film making machinery

HDPE film:

Makes trash bags, vest bags and shopping bags (may be made of recycled material and calcium carbonate)

LDPE film:

- Heavy-duty bags to hold chemicals, sugar, salt, raw materials, pet food, frozen food, fluids etc. (embosser for slip-proof film optional)
- Aluminum-coated film to pack food, dried tea etc.
- Protective film to pack wooden materials, building materials, cardboards, furniture etc.
- Shrink film to pack plaster boards, electrical parts, beverages etc.
- Stretch film to pack pallets without pre-heating
- Insulation film to pack food, beverages, meat etc.
- Agricultural-duty film to cover aquaculture ponds, reservoirs, soils (as mulches), greenhouses etc.
- Industrial-duty stretch/baling film to pack fodder, pallets etc.
- Stand-up bags to hold shampoo, laundry detergent, beverages etc.
- Soft tubes to hold toothpaste etc.

INTYPE ENTERPRISE CO., LTD.

50Years Extruder Manufacturer

Your Reliable Partner In Plastic Extrusion

Ever QUEST Improvement

TPE (Thermoplastic Rubber) Wood-Like Profile Extrusion Machine

- Profile with excellent wood grain texture, color similarity and solid density
- No additional of wood flour or clips, 100% recycled
- 100% waterproof, environment temp is between -30°C - 90°C
- TPE material patented supplier : Taiwan CELLwood

PIPE/ TUBE Extrusion Machine

- Wood-Plastics-Composite, PP, HDPE, LDPE, PVC, ABS pipe/ tube / rod extruders.
- PVC medical tube designated extruder
- Single-screw, parallel twin screw extruders

Supercritical Reactive Compounding and Pelletizing Extruder for Biomass or Various Plastics

- Special Japan patented screw and structural design make plastic raw material, biodegradable plastics or starch/ PLA with 100% free of fossil plastics to be in continuous production with all kinds of additives and auxiliaries, and thus achieve a higher quality of pellets

WEI MENG INDUSTRIAL CO., LTD.

Wei Meng Industrial Co., Ltd.

Specializing in Raschel machines for all purposes

The Wei Meng Industrial Co. was founded in 1978 and is Taiwan's leading manufacturer of Raschel knitting machines. It has a dedicated R&D team that enables the company to produce a range of knitting machines and related equipment, including knotless fishing net machines, double needle bar Raschel machines, and high-speed Raschel knitting machines.

The firm's knotless fishing net machines are especially designed to turn out aquaculture nets, fish farming nets, protection nets, soccer nets, camouflage nets, and hammock nets. The double needle bar Raschel machines are used to make sacks for packing onions, potatoes, oranges, and lemons, as well as special wide nets and double-layered nets. The high-speed Raschel knitting machines can produce nets for agricultural use, including such shade nets, hail nets, greenhouse nets, anti-bird and insects nets, wind protection netting, building safety nets, scaffold nets, mosquito nets, and industrial cloth.

At present, the company's major products are shading net machines, film slitting extension machines, Raschel knitting machines, onion bag machines, fishing net machines, packing bag machines, monofilament machines, flat yarn machines, safety net machines, wrapping machines, and film blow machines.

All the products developed by Wei Meng have passed the rigorous testing standards, assuring that they are

fully able to meet customers' special requirements.
The company exports 80% of its total output.

In addition to its manufacturing competence, Wei Meng also offers excellent after-sale services to customers around the world and responds to their enquiries and production questions with the utmost speed.

CARRIER-C Series
全自動真空成型機(雙密度成型)

Fully Automatic Vacuum-molding Machine
(dual-density shape-molding)

Features:

1. Normal type can produce EPS, EPE, EPO ; P type can produce EPP, EPS, EPE, EPO
2. Precision material feeding device for faster injection without any dead angle. The density of material on the muzzle of feeder will not increase.
3. 30 years grade structure with two layers of anti-rust inorganic zinc powder paint to prevent becoming deformed and rusting.
4. Precision processing technique, the tolerance between fixed plate and movable plate is within ± 0.15 mm.
5. Digital hydraulic clamp-prevention device. If end products haven't taken off, it will give alarm immediately to protect personnel and mold safety.
6. Over 70% of parts made in Japan. Increase the life span and the production quality.

EVER ROLL MACHINERY CO., LTD.

Ever Roll Machinery Co., Ltd.

End-of-Line Packaging Specialist

Ever Roll Machinery Co., Ltd. established in 1986, is an innovative manufacturer of various kinds of packaging machines. Located in Taichung County, central Taiwan, its factory, with a workforce of 50, occupies a floor area of 3,500 square meters. Its revenue have grown 10~20% in each of the past two years. The company's wide-ranging product lineup includes carton sealers case erectors, case packers, and strapping machines. It also handles turnkey projects. Its products are sold under its own brand, "EVER ROLL" for more than 50 countries. The company is adept at self-developing technology, leading to patents on 20 models and CE Mark certification in 1999.

Offering the Most Efficient OPP Labeling Machines in Taiwan

Aplus Sleeves & Labels Machinery

Agents & distributors wanted!

Applications:

- 360-degree labeling
- For glass/plastic/PET containers holding mineral water, soybean milk, etc.

▼ MD-5000-OPP 熱熔膠高速全自動圓瓶貼標機
Automatic high-speed OPP labeling machine for round bottles

Advantages:

- Adaptable to labels of OPP & BOPP
- Thermal-adhesive applicable and adaptable to various containers under 3000c.c.
- Labeling speed: 60-800 bottles/min.
- Can install automatic label applicator to enhance capacity

▲ MD3000-OPP 熱熔膠高速全自動圓瓶貼標機
Automatic high-speed OPP labeling machine for round bottles

Applications:

- 360-degree labeling
- For glass/plastic/PET containers holding mineral water, soybean milk, etc.

Advantages:

- Adaptable to labels of OPP & BOPP
- Labeling speed: 45-400 bottles/min. Various optional models.

▲ MD-2600 雙面貼標機
Multifunctional two-sided labeling machine

▲ MD-2000 圓瓶貼標機
Round bottle labeling machine

◀ GSL SERIES 全自動收縮膜套標籤機
Auto shrinkable label inserting machine

Features:

- Container diameters: 25-155mm; models handling extra-large containers can be made-to-order
- Adaptable to cylindrical & square bottles
- Can install automatic label applicator to enhance capacity
- Freely adjustable cutter base with four selected specifications:

a. Ø25-60mm	b. Ø50-98mm
c. Ø90-125mm	d. Ø115-155mm

POTA CORPORATION

I-150

Fully Automatic Toilet Paper Converting Lines

Our machine products manufacture paper towels and toilet paper.

Our Main Products:

- Fully automatic toilet paper rewinders
- Log saws
- Facial tissue making machines
- Paper napkin making machines
- Pocket facial tissue making machines
- High-speed paper slitters
- Paper core making machines
- Corrugated cardboard & carton box making equipment

KWANG TONG MACHINERY INDUSTRIES CO., LTD.

NON-WOVEN
PLANT

不織布整廠設備

Non-woven Fabrics & Turnkey Equipment

● P.P. 長纖不織布設備

Turnkey plant for non-woven PP spun-bonded fabrics

● 水針刺整廠設備(年產量2000噸)

Turnkey plant for high-pressure hydro-entangled fabrics (capacity: 2,000 tons/year)

● 廣同公司為確立信譽，從前紡、熱融、烘乾一系列設備均完全自製。

Solid reputation built on in-house integrated production, from pre-weaving, thermo-bonding to drying

● 自設不織布成品製造廠

Also equipped with a factory to make non-woven fabrics

Our newly-developed turnkey plant makes PP spun-bonded fabrics suitable for making needle-punch Geotextile non-woven fabrics and thermo-bonded lining. We also offer turnkey plants to make PET, SMS, compound, low-denier filament, and molten-blown spun-bonded non-woven fabrics. Please contact us for more details.

本公司最新開發PP 長纖不織布設備，適用於軋針型土木工程布及熱融型裡襯布。

本公司另開發PET/SMS型，複合型纖維，低丹尼數長纖維及融噴不織布設備。

歡迎訂購。

This slim single-spinning-board equipment for 3.6m-wide nonwoven PP spun-bonded fabric (8g~150g/m²) was trial-run early March 2010 in our factory in Taoyuan, northern Taiwan.

3-LAYER THERMO BONDING LAMINATION M/C

This machine is used in Laminating PE, P.P and Non-woven P.P-Spunbonding Fabric to make the finished products as isolating cloth for building material, medical hygiene materials and the like.

Model	Working Width	Laminating Classification	Max weight	Working Speed
KT-TM-160	1600m/m	Non-woven Fabric, PE,PP membrane	250g/m ²	10-60M/Min
KT-TM-240	2400m/m			

Testing: The complete equipment of Carding M/C used in medical& hygiene area is made of stainless materials with Carding M/C width :20"-48" (customized)
