TAITRA held an international pre-show press conference during this year's CES in Las Vegas, the U.S.

COMPUTEX TAIPEI 2016 to Feature New Position, New Exhibits and New Look

Globally top-3 ICT trade fair to serve as coliseum for global ICT startups with impressive innovations.

By Steve

COMPUTEX TAIPEI is set to open from May 31 to June 4, 2016. As the ICT industry has been developing, expanding and transforming from just computers and accessories to IoT and endless innovations for the past few years, this year's COMPUTEX TAIPEI will impress visitors with various new features to retain its reputation as a globally leading trade fair for tech industries.

Ever since established in 1981, COMPUTEX TAIPEI has evolved into one of the most influential ICT shows globally. Co-organized by the Taiwan External Trade Development Council (TAITRA) and the Taipei Computer Association (TCA), the exhibition plays off its proximity to Taiwan's ICT industry cluster to cover the whole spectrum of businesses from up-stream components-manufacturing all the way to system assembly and IoT applications. With over a third of the world's computing devices made by Taiwanese companies, the annual exhibition has turned Taipei, capital of Taiwan, into a logical destination for buyers looking for partners in Internet computing ecosystems.

At an international pre-show press conference held during CES (the Consumer Electronics Show), held January 6-9 in Las Vegas, the U.S., Executive Vice President Walter Yeh of TAITRA announced the following new features of the upcoming COMPUTEX TAIPEI 2016.

New Position and Themes

IoT related applications and innovative products are today's trends. And to keep up with the global trends, COMPUTEX TAIPEI is in transition with a new position featuring Building Partnerships in Internet Computing Ecosystems with main focuses on IoT applications, innovative startups and business solutions. Participation is still soaring from industry leaders such as INTEL, MICROSOFT, ARM, HAIER, HISENSE, SUPERMICRO, MEDIATEK, ACER, ASUS, BENQ, THERMALTEK, COOLERMASTER, E-LEAD and SIEMENS to premier their latest innovation and launch new products. Other new participants include the GERMAN PAVILION and INDIA PAVILION.

New Exhibits

Three new exhibits are generated to highlight the new position and themes for COMPUTEX TAIPEI 2016. New exhibit, SmarTEX, attracts about 200 exhibitors to display the newest in IoT and smart tech applications with emphases on home and entertainment, smart security control, smart car & automotive electronics, and wearables. IoT in turn brings innovative

startups and new exhibit, InnoVEX, is a perfect platform especially for ICT & IoT innovators. Organizers are expecting 100 innovative startups, incubators and startup accelerators to participate. Invitations are extended to global startup competition winners to participate. Another new exhibit, iStyle, is a special showcase for Apple certified peripherals, accessories, and software.

COMPUTEX d&i Awards

Since 2008, TAITRA has been collaborating with International Forum Design (iF) for the COMPUTEX d&i awards. These awards honor products with excellent design as well as technical innovation. Since the award first held, participating companies grew more than 100%, reflecting recognition for the Awards. At the last year's show, a total of 271 competing product entries were received while 72 winning products from 9 categories were chosen by a group of international juries and 5 were selected for the gold awards. In addition to displaying the winners at COMPUTEX TAIPEI, TAITRA will send these winning products on a world tour to CES, MWC, IFA, IndoComtech, and COM-IT in 2016.

More events before and during COMPUTEX TAIPEI 2016 are as follows:

1. COMPUTEX TAIPEI International Press Conference, to be held on May 30, 2016. New product announcements will be made by prominent exhibitors as well as display of 2016 COMPUTEX d&i awards winning products.
2. Keynote & summit forums to be based on the themes of FUTURE TECHNOLOGY + INNOVATION along with IoT ecosystems and IoT applications such as smart home and entertainment, smart solutions, wearables, security application and automotive electronics.
3. Startup forums for New exhibit, InnoVEX, to take place at TWTC Hall 3. Startups are invited to share experience and demo new innovations, definitely to attract venture capital, crowdfunding platforms and strategic partners for further cooperation.
4. More than 100 new product announcements by world brands throughout the show period.
5. TAITRA organizes professional B2B procurement meetings where buyers' needs are matched with right suppliers.

COMPUTEX APP

COMPUTEX APP has numerous unique features, the best being the indoor positioning & navigation system. By opening the APP, visitors can get short cuts to any booth, and never get lost. Once log-in thru the APP or COMPUTEX TAIPEI website, desired events, exhibitors and products can be added to "My collection". Exhibitor recommendation will be made to registered visitors for their interested products.

COMPUTEX TAIPEI is more than just a sourcing hub for high technologies; it's a global bridge for new innovations and ideas. For more info on COMPUTEX TAIPEI, please go to the official website: www.ComputexTaipei.com.tw. 

TSMC and ARM Collaborate on 7nm FinFET Technology for High Performance Computing

TSMC and ARM collaborate on 7nm FinFET process technology for high-performance computing. (Picture courtesy of TSMC)

By Ken Liu

Taiwan Semiconductor Manufacturing Co. (TSMC, the Taiwan-based firm generally recognized as the world's largest made-to-order chip foundry) and ARM Holdings Plc. (the British multinational semiconductor and software design company founded in 1990 and headquartered in Cambridge, England with primary business in the design of ARM processors or CPUs) have entered into a multi-year cooperation on the development of a 7-nanometer Fin Field-Effect Transistor (FinFET) process technology, which includes the design solution for future low-power, high-performance system-on-a-chip (SoC).

Pete Hutton, executive vice president and president of product groups of ARM, pointed out that future ARM technology designed specifically for data centers and network infrastructure and optimized for TSMC 7nm FinFET will enable the two companies' customers to scale the industry's lowest-power architecture across all performance points.

He added that existing ARM-based platforms have been shown to deliver an increase of up to 10 folds in computing density for specific data center workloads

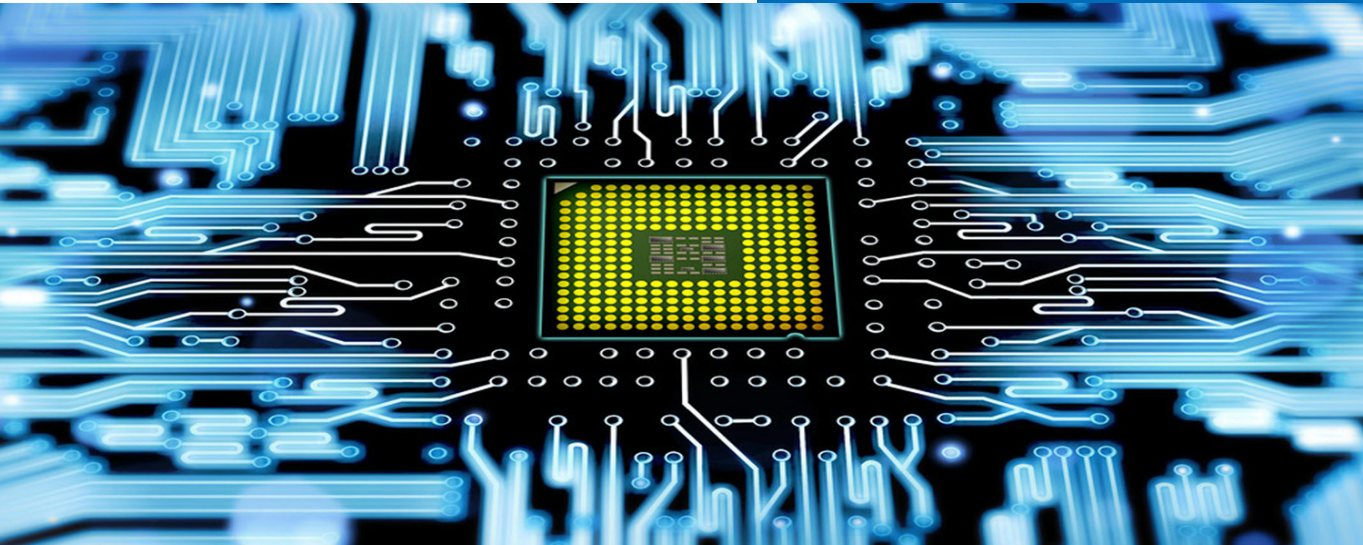

TSMC's vice president for R&D, Cliff Hou, said solutions optimized by TSMC and ARM together will enable the two companies' customers to deliver disruptive, first-to-market products.

Hou noted that the two companies' customers designing their next-generation high-performance computing SoCs will benefit from TSMC's 7nm FinFET, which will deliver more performance improvement at the same power or lower power relative to the company's 10nm FinFET process node.

He added that thanks to its 7nm FinFET process technology, the company has expanded its process and ecosystem solutions from mobile to high-performance computing.

The new agreement expands the two companies' long-standing partnership and advances leading-edge process technologies from mobile into next-generation networks and data centers. Also, it extends previous collaborations on 16nm and 10nm FinFET featuring ARM Artisan Physical IP.

The joint innovations from previous TSMC and ARM collaborations have enabled their customers to accelerate product development cycles as well as take advantage of leading-edge processes and IP. Recent benefits include early access to Artisan Physical IP and tape-outs of ARM Cortex-A72 processor on 16nm FinFET and 10nm FinFET. [CENS](#)

Huang Liang Precision Enterprise Co., Ltd is a professional CNC precision turning parts manufacturer in Taiwan. We implement TS16949, ISO14001, OHSAS 18001 and ISO 9001 as our quality assurance policy to operate our factory on an international scale. We adopt only ROHS compatible materials from leading suppliers to guarantee your 100% satisfaction. Over 30 years of operation, we have established a team equips with various experiences and unlimited creativity on Precision Parts Making, particularly in Automotive/Motorbike parts fabrication. Our factory located in Kaohsiung Taiwan covers 8000 square meters. We are proud of our successes which we regard as an ongoing challenge to meet your demands for innovative & superior quality products. We produce wide range of custom-made parts for various industries such as: Automobile & Mo

INGGER RUBBER ENTERPRISE CO., LTD.

Oil Seals, Bumpers, Front Forks, O-Rings, Gaskets

Founded in 1988, Ingger Rubber Enterprise Co., Ltd. is a veteran company specializing in designing, developing and manufacturing high-grade rubber parts for industrial applications, including automotive, motorcycle, machinery, electronics and daily utensils etc. Claiming to make products with high-grade materials and high-precision molds for top quality and durability, Ingger is very confident of turning out all kinds of standard and customized items. Buyers can get the most satisfactory finished products by simply providing product specifications or samples. With its very strong development and manufacturing capability, Ingger claims that it can produce a wide range of rubber and rubber/metal parts, including oil seals, O-rings, V-ring, ...

HORNG YINN CO., LTD.

DC Motors, AC Motors, RO Water Dispensers, Electric Bicycles, Electric Motorbikes, Warehouse & Hypermart

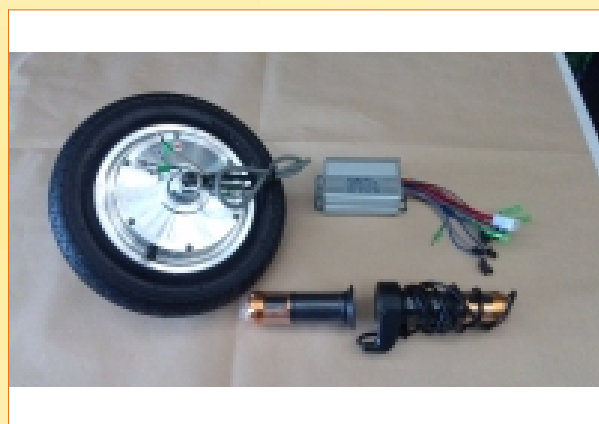

Specializing in custom design and production of AC/DC motors, Horng Yinn Co., Ltd. (Sunway Electric Co., Ltd.) offers a full range of models rated 1W~1,500W, making us an all-round supplier of geared power-drivers. Shortening lead-time via in-house design, prototyping and volume production, we also have an AC/DC-motor R&D department equipped with fully automatic wire-winders, CNC precision machine tools and the latest inspection instruments to efficiently handle prototyping. We are ISO 9001:2000-certified. Talk to us to see how we can fully satisfy you with quality and volume. Contact Mr. Su, general manager, for specialized consultation on how to use, choose motors, small motor, electric generators and power generators, speed reducers, as well as know-how.
