Taiwan Industry Suppliers

New Era for TIS

Products Made in Greater China

**Taiwan Industrial Suppliers,
Meeting a Wide Range of
Requirements**

The TIS logo, consisting of the letters "TIS" in a large, bold, sans-serif font. The "T" and "I" are solid blue, while the "S" is white with a blue outline. The logo is set against a background of various industrial metal parts, including bolts, nuts, and gears, all rendered in a blue-tinted, high-contrast style. A circular graphic element with a blue-to-white gradient is visible on the left side of the image.

TIS

Content Sections

- CENS.com

Access to CENS.com for more information, industry news & reports.
- Online Product Index

Find quickly product categories of interest.
- Advertiser Index

Find easily suppliers of interest.
- Articles

Find here industry news, reports, and editorial articles.

For details on suppliers & products

Simply use hyperlink icons:

- Inquire Now

Click **Inquire Now** to safely, quickly connect to online inquiry form for the advertiser/supplier.
- Webpage

Click **Webpage** to connect to the introduction of the advertiser/supplier.

Some suppliers may have stopped advertising on CENS.com, but information in this E-magazine remains accurate as of its publish date.

Guide to PDF Reader

How to edit display settings

Select “View >> Page Display” to edit the way you like to read E-magazine.

How to save a new copy of this E-magazine

Press “Shift + Ctrl + S” or select the “Save” option, and confirm your selection by choosing “Save a copy”.

How to text search

Press “Ctrl + F” and enter keyword(s).
If no match is found, broaden the category of keyword(s). This search function works on exact match of keyword(s).

How to use zoom options and move around an enlarged page

Click either   icon to zoom in or out a page.

“Hand Tool” enables moving around an enlarged page for reading convenience.

* The above guidelines are based on Adobe Reader. When using other PDF reading software, check “Help” function to edit page display settings. If reading this PDF E-magazine via Chrome, Firefox or IE, enable Adobe Plug-in to improve viewing experience.

Guidebook to Taiwan Industrial Suppliers (TIS)

2016-01 Edition

TIS is Taiwan's most complete listing of manufacturers of industrial parts, components, and accessories, containing around 12,000 suppliers and manufacturers in various product categories. Tap Taiwan's recognized tradition and capacity in wide-ranging industrial parts production by reading TIS. Taiwan Industrial Suppliers (Annual).

Index of Selected Suppliers

- Raw Materials, Plastic Billets, Rubber, Silicone, Steel, Stainless Steel, Copper, Aluminum, Magnesium, Zinc
- Warehouse & Logistics Systems
- Power Supplies, Electronics, Computer Components, Software
- Testing And Measuring Instruments (Gauges And Measuring Instruments, Optical Inspection Equipment)
- Transmission System (Ballscrews, Slideways, Bearings, Motors, Gear Reducers, Clutches)
- Hydrodynamic System (Hydraulic Units, Air Compressors, Filters)
- Tools, Cutters, Jigs, Spindles, Grinding Wheels, Molds And Dies, Robots
- Surface Treatment (Cladding, Painting, Electroplating, Anodizing)
- Rubber Parts And Components (Molded Rubber Parts, Molded Silicone Parts)
- Plastic Parts And Components (Extruded Parts, Injection Molded Parts, Blow Molded Parts)
- Casting, Forging, Die-casting, Heat Treating
- Metal Formed Parts (Screws, Springs, Wire Formed Parts, Sheet Metal)
- CNC Turned, Milled, Drilled, Ground Parts
- Metal Stamped Parts

The upcoming GALM Asia 2016 will return to Shanghai on September 28-29 (photo courtesy of LGBC).

GALM Asia 2016 to Continue Leading Trends for Automotive Lightweight Materials and Manufacturing Technologies

By STEVE CHUANG

The 3rd Annual Global Automotive Lightweight Materials Congress Asia (GALM Asia) is scheduled September 28-29, 2016 in Shanghai, to continue leading global trends for automotive lightweight materials and manufacturing technologies, with a brand new agenda focus and a fully revamped speaker line-up that includes the largest automotive OEMs (original equipment manufacturers) and material suppliers from across the globe.

Organized by U.K.-based London Business Conference Group (LBCG), this OEM-led event will bring together top international OEMs and suppliers to tackle key questions of designing lightweight structures and selecting the optimal combination of high strength steel, aluminum and reinforced plastics, to help OEMs create the next generation of lightweight vehicles meeting new regulatory standards on safety, emissions and performance.

Obviously an auto industry summit, GALM Asia is attended by decision makers, directors, senior managers and engineers from leading global OEMs in automobile-related sectors, including material engineering, CAE (computer aided engineering) and BIW (body in white) design, manufacturing and joining, new energy and structural innovation.

The upcoming GALM Asia 2016 will give participants a close look at various lightweight engineering approaches for mixed material bodies developed by globally prestigious automotive engineers from across Asia, the U.S. and Europe. Through actionable, transferrable insights delivered by those experts at the venue, Asian OEMs will better understand the factors driving material selection in Europe, the U.S. and Asia.

Invited OEMs at the summit will present advanced design architectures for aluminum, high strength steel and composites, including the latest tooling, processing & joining techniques to ensure the next generation of vehicles meet tough international standard on safety, emissions and sustainability.

The 2016 agenda of this 2-day conference is outlined as shown below:

- Understanding lightweight engineering approaches for mixed material bodies from across Asia, the US and Europe to deliver actionable, transferrable insight for Asian OEMs
- Insight into the future of safety and emission regulations, enabling OEMs and suppliers to work together towards meeting carbon emission requirements
- Case studies on design architectures, material selection and innovative structural design using high strength steel, aluminum, reinforced plastics and composites for creating the lightest, most efficient batteries and hybrid powertrain systems for new energy vehicles

- Quantifying the availability of materials in Asia and the extent to which they can be applied in automotive design
- The latest innovations and technologies for constructing electric batteries and hybrid powertrain systems
- Strategies for reducing weight at the early development stages, instilling lightweight at the core of vehicle design

Also, key speakers will include Xiong Fei, R&D Technical Director, Geely; Lei Shi, Technical Director, Great Wall Motor; Liu Ming, Lab Group Manager Advanced Materials, General Motors; John Yan, Executive Expert CAE, Geely; Ma Fangwu, Chief Engineer, Geely Research Institute; Kedar Godse, Divisional Manager Cab Design, Tata Motors; Zheng Li Yao, CEO, Shenzhen High Tech Research Institute; Kim Dongok, Representative, Korea Automotive Technology Institute (KATECH) [CENS](#)

Conference Summary	
Day One	Day Two
GLOBAL LIGHTWEIGHTING TRENDS AND ADVANCED STEEL & ALUMINIUM ARCHITECTURES	LIGHTWEIGHT ELECTRIC AND HYBRID VEHICLE DESIGNS, MULTI-MATERIAL JOINING & ADVANCED COMPOSITE MATERIALS
• Breakfast briefing: Intelligence sharing on global emissions regulations to set the context for the future direction of automotive design • Factors driving material selection in Europe, USA and Asia • Advanced design architectures for aluminum and high strength steel including the latest tooling, processing & joining techniques • Practical examples and case-studies detailing how to transition from traditional steel to aluminum and high strength steel components • Quantifying the availability of aluminum in Asia and the extent to which it can be applied in automotive design • Panel and roundtable discussions with suppliers on the technological needs of OEMs in Asia	• Material selection and innovative structural design for creating the lightest, most efficient batteries for new energy vehicles • The latest innovations and technologies for constructing hybrid powertrain systems • Strategies for reducing weight at the early development stages, instilling lightweight at the core of vehicle design • The latest innovations in multi-material joining techniques • Long term strategies for developing and applying magnesium, reinforced plastics and carbon fibre

Drill Chuck

chumpower EXPOWER Drill CHUCK

ChumPower, founded in 1981, is a well-known precision chuck manufacturer. The products are marketing and proved excellent all over the world. Products: BT Systems, CAT Systems, NT Systems, SK Systems, HSK Systems• DIN69871• VDI Systems• Drill Chuck Tools• EXPOWER® Universal Chucks• Tap Chucks• Spindle Clamping Systems• Tooling Systems, Vises Systems, Liv Center Systems, Face Milling Cutter & Endmill Systems. Drill chuck is necessary in the industrial application. It is used popularly such as all kinds of lathes, hand tools, power tools, air tools, medical appliances, and so on. In terms of the importance of chuck tool, ChumPower keeps on doing all efforts in technological research, development and application and holds creative spirit in technique, product-development, and quality-control. ChumPower has advanced production equipments, abundant experiences and is able to ...

Yang Light Engineering Co.

Automotive ratchets, tie-downs, woven straps, fasteners, buckles, pulley fittings, OEM parts

Yang Light Engineering Co., established in 2005 in Changhua County, central Taiwan, is a specialized manufacturer of metallic products and parts for wide ranging applications, with two manufacturing bases totally taking up 13,000 square meters.

The versatile maker turns out a broad spectrum of hardware products and industrial parts, including automotive ratchets, tie-downs, woven straps, fasteners, zinc buckles, shackles, pulley fittings, hardware parts and components, medical equipment, telecommunications parts, motorcycle parts, auto hardware, punched, lathed and pressed products, hand tools, strap-holders for planters, overcenter buckles, truck anchor points, cam buckles, anchor points, tool bags, tail nets, ratchet tie-downs, etc., all of which are compliant with international standards as CE and UL.

The company's products are well-received by customers across as many sectors as the number of its product offering, with satisfied buyers of military vehicles, watercrafts, automotive products, agricultural equipment, leisure and sports equipment, furniture, construction and climbing equipment. Over 80 percent of the firm's output goes to Europe, North America and Japan. Some globally famous enterprises in the automotive and electronic sectors also outsource production of parts from the company either directly or indirectly, indicative of this maker's proven reputation as a world-caliber OEM (original equipment manufacturer).

To secure sustainable development and avoid the vicious cycle of underselling competition against rivals from emerging countries, the company has developed R&D technology that is not easily duplicated and production skills to shore up its ODM (original design manufacturing) business, so as to move upmarket with potentially higher margins.

The company is also notable for its extensive know-how about materials. Understanding that the quality of output is often determined to large degree by proper adjustment in production processes according to material used, the company researches and studies characteristics of various materials, hence having accumulated ample knowledge about different production techniques that suit copper, zinc alloy, tin, aluminum, stainless steel of grades ranging from 300, 400 and 500 series to 600 and 700 high-end series, special high-hardness metals, engineering plastic and high-density yarn.

Excellent production efficiency and flexibility are also the

firm's core competency, achieved partly by a full slate of advanced production equipment employed in-house, including CNC machining centers, punching, forging, and die-casting machinery and large-sized electric overhead cranes, and in no small degree by many subcontractors who possess specialized technique and know-how in different fields.

Unremitting effort paid to develop strong mold developing capability helps build Yang Light's current success as well, which is key to cutting cost and raising quality and quantity of output, not to mention shortening lead-time by advancing schedule of volume production. To that end, this manufacturer dedicates most of its R&D resources to develop computer-aided 3D mold designing and rapid prototyping technologies, also updating its knowledge about mold development and mechanical engineering through periodical meetings with foreign experts. The efforts have paid off, as the company is able to develop over 200 sets of new molds per month independently and continues adding new products to its lineup.

With strong commitment to quality, Yang Light adheres to by-the-book quality control measures, such as digital quality archiving and hourly spot-checks, in compliance with the ISO and TS16949 systems. Also, the company has set up a full line of precision testing devices, including 3D projectors and hardness, impact and tension testing machines, some of which, like the newest horizontal 200t tension tester, are developed in-house for special tests and more thorough pre-delivery inspection. Noteworthy is that each independently developed testing device has been approved by SGS, thanks to the company's R&D capability.

Yang Light supplies varieties of hardware products and industrial parts, some on OEM and ODM basis

Yosin Ind. Co., Ltd.

CNC milling, CNC lathing, precision parts & components, electronic parts, auto and motorcycle parts, mechanical parts, specialty metallic valves, etc.

Founded in 1979, Yosin Ind. Co., Ltd. is a veteran company specializing in OEM/ODM manufacturing with integrated capability from parts production, processing, surface treatment, assembly to packaging. The firm is known for always sticking to the highest quality-control (QC) standards and delivering total customer satisfaction.

The versatile maker is noted for being dedicated to developing and upgrading advanced design skills backed by cutting-edge 3D computerized graphics, helping global customers with product and mold/die design, development and manufacturing.

With in-house manufacturing of computer numeric control (CNC) milling and CNC lathing, Yosin offers precision parts and components for wide-ranging applications, such as building hardware, bathroom hardware, auto and motorcycle parts, electronic parts, furniture hardware, industrial hardware, hand tool accessories, parts for gardening shears, mechanical parts, specialty metallic valves, and many others.

It specializes in processing various types of metallic materials, including aluminum alloy, steel alloy, copper alloy, titanium alloy, stainless steel, SCM440-grade engineering

plastic, SCM430-grade chrome-molybdenum steel, etc.

For continued business growth, Yosin carried out a corporate restructuring in 2007 to upgrade operations to world standards with installation of advanced equipment, improved customer services, expanded versatility, and new management concepts. The company then introduced high-end machinery from industrially advanced nations, such as Japan, Germany, etc., to effectively become a top-notch player of its kind in Taiwan.

Yosin says that it welcomes global customers to place OEM/ODM orders, and is very confident in providing integrated or individual services from product design and development, to assembly and delivery.

Precision CNC Machining for Industries

Main services:
CNC milling and lathing of precision parts and components, gauge/meter parts, electronic parts, automotive and motorcycle parts, mechanical parts, and specialty metallic valves.

OEM/ODM orders welcome!

Processed materials:
Aluminum alloy, alloy steel, copper alloy, titanium alloy, stainless, SCM440-grade plastic steel, and SCM430-grade chrome-molybdenum steel.

Main products:
Industrial parts & components, various types of accessories, and finished products.

CYCAS MACHINERY & TOOL CO., LTD.

Stainless Steel Submersible Pumps, Submersible Pumps, Oil Cooling Submersible Motor, Water Cooling Submersible Motor

Cycas Machinery & Tool Co., Ltd. has over 15 years of experience in making stainless-steel electric submersible pumps, mainly 4", 6" and 8" models, as well as submersible motors and pump accessories, offering products and designs meeting IEC34-1, CE, NEMA and ISO 9001-2008 certifications under the OSONG brand that are hot-sellers globally. Our qualitatively-consistent production turns out submersible pumps that are globally competitive and highly regarded, while we aim to always provide the best products and services among peers.

KEVIN GEARS ENTERPRISE CORP.

Gears, Machine Parts, Helical Bevel Gears, Straight Bevel Gears, Bevel Gears, Tilt Bevel Gears, Transmission Gears

A skillful processing service provider with experience for more than three decades, we established "Lolewis Gears Enterprise Corp." in 2001 and successfully exported our products to markets worldwide. In 2006, we expanded our factory area to the current address and renamed as "Kevin Gears Enterprise Corp." Continuing purchasing high-end machinery to offer high-precision gears is our key to successfully penetrating products into markets in Japan and the USA. OEM/ODM orders welcome. Main products: Bevel gears, spur gears, worm gears, helical gears, industrial-duty gears, gear racks, gears for speed reducers, gears for gearboxes, transmission gears, worm shafts, gears for motors, etc. Modules: 0.3~M8

KYON YO INDUSTRIES CO.

CNC/NC Milling and Lathing of Precision Parts and Components, Gauge/Meter Parts, Electronic Parts, Automotive and Motorcycle

Established in 1989, Kyon Yo Industries initially offered tabletop lathing, but in 2008, due to demand and diversification, began offering CNC horizontal and associated machining, with 2D and 3D gauges to ensure precision of machined products of high-grade stainless steel, cast iron, steel, aluminum alloy, magnesium alloy etc. ISO 9001:2008 certified to offer safety-guaranteed production, we strive to provide even better, more satisfying machining quality and broader services. Manufacturers and traders in Taiwan and overseas are welcome to inquire about joint venture.

SHAN MING PRECISION MACHINERY CO., LTD.

**Aluminum Products, Motorcycle
Parts, Processing, Lathed Products,
OEM, ODM, Automotive Parts,
Automobile Parts, CNC Machining**

Founded in 1996, Shan Ming Precision Machinery is mainly an OEM/ODM that processes aluminum alloy products, forgings, automatic/motorcycle parts, mechanical parts, watercraft parts, etc. Baked by superior technology, we have developed and produced high quality jigs, and know that time-saving jigs are critical to production. Using lightweight vises we save processing time, space to greatly improves production quality and efficiency. Shan Ming also uses lightweight vises and hydraulic system to have developed modular hydraulic jigs to vastly improve processing efficiency and reduce time-consumption. We offer clamps, lightweight vises, modular jigs and custom-made jigs according to customers' requirements.

We, Chuen Jaang Precision Industry Co., Ltd., established in March 1982, specializes in development and production of all kinds of precision metal, stainless, aluminum, copper, and plastic parts. Our machining capability feature diameters down to 0.03mm, tolerances less than 0.001mm, surface finish as fine as 0.1um, and length ranging from 2mm to 500mm. Our products can be widely applied to almost all the industries. At present, 40% of the company's output is sold to the industry of electronic parts and accessories, 30% to the molds and dies, 20% to the automobile and machinery, and the remaining 10% to others, such as watch, toy, furniture, firearm, and textile. Our future expectation is to be O.D.M and O.E.M supplier for our customer. That is the reason why we have series of equipment in house.

LIEN YA MACHINERY CO., LTD.

Auto parts, auto parts machining, screws, nuts, screws and nuts, forging, grinding, TS16949, TS Certification

Lien Ya Machinery Co., Ltd. began in 1987 by providing lathing services with in-house machine tools. Initially, the company's founders, S.T. Shen, C.K. Shen and J.M Shen, set up production of auto parts in a leased space with floorage of sub-100 square meters in Gueiren Dist., Tainan, a southern city in Taiwan. After nearly 30 years of development by embracing the "Built in Taiwan but Bound for the World" motto, the firm, under leadership of its chairman S.T. Shen, has established fine reputation in Taiwan for top product quality. Sticking to delivering h ...

Nan Shun Spring Co., Ltd.

Precision spring, iron wire products, metal parts, fittings

Nan Shun Spring Co., Ltd., established in 1987, is a professional manufacturer of precision spring and related industrial parts with robust research and design ability.

The company started out by making springs and wire forms mainly on an OEM (original equipment manufacturing) basis. After a few years, it decided to expand its competency to stamping, die-casting, punching and lathing; and greatly enriched its know-how about characteristics of various metals and metalworking methodologies.

At present, the company's major product lines are springs/wire forming, flats, clips, clothes hangers, hooks, rings, clamps, metal hardware parts, CNC processing products, spring leafs/sheets, stainless steel hardware, pins, wire form bending shapes, etc.

JIEH DENG PLASTICS CO., LTD.

Control Cable Parts

Established in 1999, Jieh Deng Plastics Co., Ltd. is a specialized plastic parts designer and maker highly regarded by clients in Taiwan and abroad. To satisfy particular and different market needs, we develop innovative tooling and adjust stock formulas for plastic parts and accessories as control cables for cars, motorbikes, farm machines, bicycles etc. We have sold several hundreds all over with a solid reputation. Talk to us for further details.

CHIA CHI THERMOCOUPLE CO., LTD.	79
CHIA CHI THERMOCOUPLE CO., LTD.	80
INTELLECT WORKER MACHINERY CO., LTD.	81

Chia Chi Thermocouple Co., Ltd.

Threaded thermocouples and various temperature sensors

A specialized Taiwanese supplier of thermocouples and temperature sensors mainly for industrial uses, Chia Chi Thermocouple Co., Ltd. has been promoting its threaded thermocouples as a practical solution to accurate measuring of surface temperature of molds.

The threaded thermocouple is a universal type that can be installed in various plastic injection molding machines to measure surface temperature of molds with both simple and complex shapes. The Class 0.4 thermocouple is noted for its high accuracy with close tolerance that has been tested to meet international standards.

In addition to thermocouples, the firm is also promoting its waterproof thermocouple sensor with connection head and L-shaped surface temperature sensor for various heating and drying ovens and low/high temperature furnaces, with measurable temperature range able to be customized to meet customer's requirements. While high measuring accuracy is the common feature of the two devices, the L-shaped surface temperature sensor is easily portable and has comparatively more rapid response to temperature tested.

Ever since founded in 1987 in Taipei, northern Taiwan, Chia Chi has been dedicated to developing and manufacturing thermocouples and other precision temperature measuring instrument, having established a sound profile in the line mostly thanks to its insistence to build accurate and quality products.

The firm's strong commitment to making sure measuring accuracy is achieved and readily observable from its long-term technical cooperation with RKC Instrument Inc. of Japan, which enables the Taiwanese maker to not only gain deeper understanding of such products to further improve accuracy, but upgrade its product mix to satisfy more customers. Also this supplier employs high-precision testing and calibration instruments from the U.S. and Japan, which enhances its trustworthiness as well as ability to offer clients reliable quality.

With the abovementioned efforts gradually paying off to help Chia Chi sharpen its cutting edge to sustain growth, the firm has built solid reputation among customers at home and abroad.

CHIA CHI THERMOCOUPLE CO., LTD.

Thermocouple, Sheath Coupces, Thermo Well, Compesating Lead Wire, Resistanle Bulb

Established in 1987, we began by learning about basic products from RKC, Japan and gradually gained in-depth understanding of the production of precision products, including SHEATH, RTD-PT100Î©, and high temperature thermocouples. With the adoption of precision measuring and calibration machines from the USA and Japan, we offer customers with quality thermocouples and temperature sensors meeting international standards. We adhere to thoroughness, innovation to always offer the best products.
