Guidebook to Taiwan Industrial Suppliers (TIS)

2016-01 Edition

TIS is Taiwan's most complete listing of manufacturers of industrial parts, components, and accessories, containing around 12,000 suppliers and manufacturers in various product categories. Tap Taiwan's recognized tradition and capacity in wide-ranging industrial parts production by reading TIS. Taiwan Industrial Suppliers (Annual).

Index of Selected Suppliers

- Raw Materials, Plastic Billets, Rubber, Silicone, Steel, Stainless Steel, Copper, Aluminum, Magnesium, Zinc
- Warehouse & Logistics Systems
- Power Supplies, Electronics, Computer Components, Software
- Testing And Measuring Instruments (Gauges And Measuring Instruments, Optical Inspection Equipment)
- Transmission System (Ballscrews, Slideways, Bearings, Motors, Gear Reducers, Clutches)
- Hydrodynamic System (Hydraulic Units, Air Compressors, Filters)
- Tools, Cutters, Jigs, Spindles, Grinding Wheels, Molds And Dies, Robots
- Surface Treatment (Cladding, Painting, Electroplating, Anodizing)
- Rubber Parts And Components (Molded Rubber Parts, Molded Silicone Parts)
- Plastic Parts And Components (Extruded Parts, Injection Molded Parts, Blow Molded Parts)
- Casting, Forging, Die-casting, Heat Treating
- Metal Formed Parts (Screws, Springs, Wire Formed Parts, Sheet Metal)
- CNC Turned, Milled, Drilled, Ground Parts
- Metal Stamped Parts
- Special Page

Automating production with robots is regarded by Taiwan's major manufacturing companies as a savvy strategy against rising local labor cost (photo courtesy of UDN.com).

Robots Are Finding Their Way into Taiwan's Manufacturing Industries

By STEVE CHUANG

With robotic technologies continuously advancing, Taiwan's major companies in local manufacturing industries have actively moved introduce robots to production lines as a means to cope with chronic manpower shortages and continuously rising labor costs.

Among these companies, Hota Industrial Mfg. Co., Ltd., one of the largest precision auto transmission component makers by size, confirmed in late 2016 that it will bring in over 1,000 units of various robots to fill job vacancies in production lines, including transportation and packaging tasks, in its factories within four years, so as to minimize the impact of the enforcement of the so-called "one fixed day off and one flexible rest day" policy by the Taiwanese government since December 23, 2016, an amendment to the Taiwan Labor Standards Act, which is widely believed to result in wage hikes.

David Shen, chairman and CEO of Hota, stated that to conform to the new labor policy, his company will likely see an estimated increase of 9.4 percent in annual labor cost, or an equivalent of some NT\$43 million (approximately US\$1.38 million), based on its overall monthly payroll for the moment, hence being forced to resort to robots and automation.

The four-year investment, which involves the procurement and installation of robots and necessary software, is estimated to cost Hota roughly NT\$1 billion (US\$32.175 million).

Based on Hota's current manpower resources of some 900 employees, Shen stressed that the company will hopefully attain its annual turnover goal of over NT\$10 billion (US\$321.75 million) in 2019 after all the robots to be procured become online.

In fact, Hotahas for some time worked on production automation through constant investments, including a brand new factory located in the Dapumei Intelligent Industrial Park in Chiayi County, southern Taiwan, which is scheduled to start up this March and will employ a full line of intelligent manufacturing equipment to not just boost the company's overall output by 30 percent, but ensure a nearly 100-percent yield rate.

Coincidentally, Taiwan Hon Chuan Group, the biggest maker of bottle caps, PET bottles and preforms on the island, has also planned to increase the use of robots in production in the coming years, to respond to the implementation of the "one fixed day off and one flexible rest day" policy.

Presently, the company employs about 1,500 workers in Taiwan, with around 60 percent of its manufacturing tasks beingful-filled with automation technologies, including robotic arms.

Meanwhile, Hiwin Technologies Corp., a globally known supplier of precision linear motion components and robotic arms, has claimed to step up automating its production and provide more extensive training programs to employees, in an effort to buffer the impact of worker wage hikes in the wake of the enforcement of the said new policy, and enhance overall production efficiency. YO JYI COMPANY, LTD.

Pressed Metallic Items, Pressed Products

Since establishment in 1990, we have been dealing with pressed parts and components for more than 20 years. As an experienced manufacturer and developer backed by continuous product innovation, we have ample, systematic metallic forming, processing to lead the pressed item field. Prioritizing trustworthiness, specialized services and reasonable prices, we continue to progress, providing superior products to enhance customers' product competitiveness. Main services and products: 1. Pressed automotive parts. 2. Pressed metallic leaf-springs, parts and components. 3. Locks and pressed metallic parts and components. 4. Pressed items5. Mold development and assembly6. Metallic item welding, tapping and assembly.

BRAVO CHEMICAL CO., LTD.

PTSA, Para Toluene Sulfonic Acid, Paint Chemicals Material, Paints Chemical, Chemical Productions, Cleaning Chemicals

BRAVO CHEMICAL CO; LTD. IS AN EXPERT p-Toluene Sulfonic Acid /PTSA MANUFACTURE. “EXCELLENT QUALITY & REASONABLE PRICE” ARE THE COMMNETS FROM OUR CUSTOMERS. Para Toluene Sulfonic Acid (PTSA) IS WIDELY USED AS CATALYST IN MANY CHEMICAL INDUSTRY. BRAVO CHEMICAL CO; LTD. WILL KEEP TO PURSUIT “MORE EXCELLENT QUALITY & MORE REASONABLE PRICE” FOR OUR CUSTOMERS.

Code	B
Cat Number	BH-15-A
Chemical Name	CHENKONG
Specification	Substance : White Crystalline Type : 40% Active Matter : 97% min Free Sulfonic Acid : 0.05max Moisture : 2% max
Physical Properties	Boiling Point : 140°C Melting Point : Approx. 103-104°C 80% Density : 1.3 at 20°C Solubility in Water : Very Soluble
Applications	1.As a hardener agent of epoxy resin which is applied in foundry industry (sand casting). 2.As intermediate of dye chemistry, sulfonate and specialized phenolics. 3.As a defunctionalizer in isocyanates where mixed with glycol cross isocyanate. 4.As a catalyst of epoxy resin systems, such as resins. 5.As an anti-static additive for electroplating baths.
Packaging	Packed in 25 kgs paper bag (or per customer requirement) in PE inner bag.
Storage	Keep in dark and dry place, and avoid moisture.
Safety Information	PTSA (Sulfonic Acid) is a kind of corrosive strong acid. In case of contact with skin or eyes, flush with large amount of water for at least 15 minutes and seek for medical.

PTSA Grade-D (95%)
