With a company history of over 20 years, we have been a professional maker of cooper connectors and valves. We have paid great attention to boosting product development capabilities and introducing new products each year.

In recent years, we have introduced special faucets and parts for drinking fountains and relevant systems. Our products have won the quality certification of ISO 9001:2000SF.

We are now applying for NSF 61-9 certification, which will be approved soon and help upgrade our overall competitiveness and image.
