Guidebook to Taiwan Industrial Suppliers (TIS)

2017-04 Edition

TIS is Taiwan`s most complete listing of manufacturers of industrial parts, components, and accessories, containing around 12,000 suppliers and manufacturers in various product categories. Tap Taiwan’s recognized tradition and capacity in wide-ranging industrial parts production by reading TIS. Taiwan Industrial Suppliers (Annual).

Index of Selected Suppliers

- Industrial Hardware & Fasteners Special

Automating production with robots is regarded by Taiwan's major manufacturing companies as a savvy strategy against rising local labor cost (photo courtesy of UDN.com).

Robots Are Finding Their Way into Taiwan's Manufacturing Industries

By STEVE CHUANG

With robotic technologies continuously advancing, Taiwan's major companies in local manufacturing industries have actively moved introduce robots to production lines as a means to cope with chronic manpower shortages and continuously rising labor costs.

Among these companies, Hota Industrial Mfg. Co., Ltd., one of the largest precision auto transmission component makers by size, confirmed in late 2016 that it will bring in over 1,000 units of various robots to fill job vacancies in production lines, including transportation and packaging tasks, in its factories within four years, so as to minimize the impact of the enforcement of the so-called "one fixed day off and one flexible rest day" policy by the Taiwanese government since December 23, 2016, an amendment to the Taiwan Labor Standards Act, which is widely believed to result in wage hikes.

David Shen, chairman and CEO of Hota, stated that to conform to the new labor policy, his company will likely see an estimated increase of 9.4 percent in annual labor cost, or an equivalent of some NT$43 million (approximately US$1.38 million), based on its overall monthly payroll for the moment, hence being forced to resort to robots and automation.

The four-year investment, which involves the procurement and installation of robots and necessary software, is estimated to cost Hota roughly NT$1 billion (US$32.175 million).

Based on Hota's current manpower resources of some 900 employees, Shen stressed that the company will hopefully attain its annual turnover goal of over NT$10 billion (US$321.75 million) in 2019 after all the robots to be procured become online.

In fact, Hotahas for some time worked on production automation through constant investments, including a brand new factory located in the Dapumei Intelligent Industrial Park in Chiayi County, southern Taiwan, which is scheduled to start up this March and will employ a full line of intelligent manufacturing equipment to not just boost the company's overall output by 30 percent, but ensure a nearly 100-percent yield rate.

Coincidentally, Taiwan Hon Chuan Group, the biggest maker of bottle caps, PET bottles and preforms on the island, has also planned to increase the use of robots in production in the coming years, to respond to the implementation of the "one fixed day off and one flexible rest day" policy.

Presently, the company employs about 1,500 workers in Taiwan, with around 60 percent of its manufacturing tasks beingfulfilled with automation technologies, including robotic arms.

Meanwhile, Hiwin Technologies Corp., a globally known supplier of precision linear motion components and robotic arms, has claimed to step up automating its production and provide more extensive training programs to employees, in an effort to buffer the impact of worker wage hikes in the wake of the enforcement of the said new policy, and enhance overall production efficiency. YO JYI COMPANY, LTD.

Pressed Metallic Items, Pressed Products

Since establishment in 1990, we have been dealing with pressed parts and components for more than 20 years. As an experienced manufacturer and developer backed by continuous product innovation, we have ample, systematic metallic forming, processing to lead the pressed item field. Prioritizing trustworthiness, specialized services and reasonable prices, we continue to progress, providing superior products to enhance customers' product competitiveness. Main services and products: 1. Pressed automotive parts. 2. Pressed metallic leaf-springs, parts and components. 3. Locks and pressed metallic parts and components. 4. Pressed items5. Mold development and assembly6. Metallic item welding, tapping and assembly.

Hardware Fittings

Founded in 1992, Shyang Meng Industry Workshop is experienced in developing precision parts, and always strives to meet customers' every need with its cutting-edge expertise. We have grown steadily by insisting on high-efficiency production and providing superior-quality products. Starting in 1995, we've used compound CNC lathes instead of traditional lathes to turn out high-quality parts to meet customers' most critical demands. Our precision inspection equipment and testing equipment also help to maintain the high quality standards of our products. We have 20 CNC lathes, including compound CNC sliding-headstock lathes, compound CNC Swiss-model lathes, standard CNC sliding-headstock lathes, standard CNC Swiss-model lathes, and conventional lathes, as well as precision inspection and testing equipment
