

2024 Hardware Exhibitions Taiwanese Manufacturers Seek New Partnerships Amidst

STAND TOOLS ENTERPRISE CO., LTD.

STAND TOOLS' Telescopic Pick-up and Torque Wrench: 2024's Game-Changers

■ Ralph Yang

Founded in 1988 in Taiwan, STAND TOOLS has established itself as a resilient entity through perseverance, training, proactive measures, a commitment to quality, and continuous research and development (R&D). Despite limited resources, STAND TOOLS has steadily progressed, propelled by the swift introduction of new products to the market and the dedicated efforts of its staff and researchers.

In 1996, facing the challenges posed by the devaluation of the New Taiwan Dollar, STAND TOOLS made a strategic move to relocate and expand its factory. This decision aimed at enhancing manufacturing efficiency, increasing output, and creating an improved working environment.

It can be said that this strategic step contributed significantly to the remarkable achievements of STAND TOOLS throughout the decade. Despite economic challenges, the company not only weathered the downturn but also maintained consistent sales growth. The establishment of a new

6,000-square-foot factory played a pivotal role, empowering STAND TOOLS to elevate product quality, expand capacity, and provide enhanced services.

Nowadays, amidst escalating competition in the hand tool market and the swift advancements in transportation and technology, STAND TOOLS has ventured into international business. In line with this expansion, STAND TOOLS standardized its production procedures, obtaining ISO 9001 approval in March 1999. This move has endowed STAND TOOLS with a competitive edge over other

manufacturers and trading companies.

In 2024, STAND TOOLS unveils two groundbreaking products. The first is the "Telescope Pick-up Tool with Releasing Function," shattering the conventional approach by utilizing a lightweight switch. This innovation allows attachments to fall off effortlessly without manual removal, offering a more efficient solution. In the torque tools series, STAND TOOLS introduces the "Big Display Digital Torque Wrench with Angle Measuring Function." This tool not only boasts an enlarged LCD screen for enhanced torque reading but also incorporates the ability to measure the angle of rotation of the screw, ensuring precision locking.

STAND TOOLS' "Telescope Pick-up Tool with Releasing Function" allows attachments to fall off effortlessly without manual removal, offering a more efficient solution.

Tang Chou Industrial Co., Ltd. the leading company more than 47 years in designing & making innovative hand tools for Safe Work & Save Energy.

Established in Taiwan since 1978, Tang Chou Industrial Co., Ltd. has transformed into a leading service engineering solution provider in the hand tool industry. We are dedicated to pioneering innovative hand tools tailored for woodworking, building construction, auto and body repair, and DIY home improvement applications. Our relentless commitment to research and development has earned us numerous patent awards in Germany, the USA, Taiwan, and China. We own hundreds and hundreds patents on our products. These patents have revolutionized traditional hand tools, making them more versatile and efficient. Our patents have introduced groundbreaking features to our tools, addressing user needs effectively. All our products proudly bear the "Made in Taiwan" label and adhere to German DIN and US ASME industrial standards. We have done many OEM & ODM cases for many worldwide famous brands.

In recent years, we've been dedicated to developing a range of self-rescue and escape tools. A complete entire product will be launched in the near future.

Samsopro offers quality one-stop mold and hand tools solutions

Samsopro is a professional manufacturer for hand tools in Taiwan with an in-house molding and injection section for over 30 years. Being ISO 9001 certificated, the company will continue to adopt specialized technologies and advanced equipment to deliver all round services.

Through professional R&D technology, mold and production ability, Samsopro is capable of designing, molding and manufacturing high-quality products that meet customer needs, and allowing them more convenience and enjoy more innovative options. Their R&D team and in-house molding section study the design feasibility in the first beginning, effectively shorten the lead time of development and reduce uncertainty, greatly improve the accuracy after mass production.

Samsopro has positioned itself as a creative, marketing-capable and environmentally-conscious company, providing a one-stop service from design, molding, production, assembly to packaging.

Samsopro specializes in hand tools products, offering air blow guns, screwdrivers, T-handles, precision tools, tool box sets and tool racks. In recently years, they focus on automated production, investing in energy saving equipment, robotic arms and device networking to increase production capacity and cost down. Create a win-win situation with their customers. It is their goal to be professional above all, contributing to the people and environment by offering the valued and user-friendly products.

TANG CHOU INDUSTRIAL CO., LTD.

Tang Chou Boasts Over 100 Patented Hand Tools Renowned Domestically and Internationally

■ Kuo Fang-lin

Established in Taiwan in 1978, Tang Chou Industrial Co., Ltd. has evolved in tandem with global trends and Taiwan's economic growth, establishing itself as an engineering service solution provider for the hand tool industry. The company's diverse manufacturing projects encompass New Launch, Popular Sets, Demolition Wrecking Tools, Innovative Hammers, Carpet Floor Stair Tools, Adjustable Pry Bars, Auto Body Bumping Tools, Interchangeable Chisels and Punches, Double Power Lug Wrenches, and Specialty Tools.

With over 40 years of expertise, Tang Chou is a leading hand tool manufacturer renowned for innovation and catering to professionals. The com-

pany holds a wealth of over 100 patents, recognized by government authorities in Taiwan, the USA, Canada, Germany, the UK, Australia, and more. Featuring a diverse portfolio of over 200 products, Tang Chou remains dedicated to hand tool innovation, providing cost-effective and environmentally friendly solutions on a global scale.

Furthermore, Tang Chou surpasses product diversity by expanding applications and embracing research and development concepts focused on foldable, interchangeable, expandable, and adjustable features. This unwavering commitment highlights Tang Chou's dedica-

tion to delivering cutting-edge solutions in the field of hand tools.

Among Tang Chou's products, the CAR INTERIOR REMOVER, crafted from high-quality CR-V alloy steel, stands out as a notable 6-in-1 multifunctional car repair tool. This product features several distinctive attributes, including an angular design that facilitates operation in delicate and small spaces, accommodating opposite-direction usage. The single-head short-length design ensures a tight grip with both hands, simplifying operations and reducing labor intensity. With 6 types of replacement head options, the tool's versatility extends to functions such as car buckle/interior panel removal, scraping, and window breaking. This multifunctional design underscores Tang Chou's exceptional design prowess and exquisite craftsmanship.

With over 40 years of expertise, Tang Chou is a leading hand tool manufacturer renowned for innovation and catering to professionals. (Photo provided by Tang Chou)

D&D BUILDERS HARDWARE CO.

D&D Builders Hardware-TAIWAN Your Best OEM Partner, 100% Made In Taiwan

■ Lo Shu-hua

With over two decades of expertise, D&D Builders Hardware Co., a Taiwanese company, excels in high-quality OEM manufacturing for globally renowned enterprises. The company's versatile capabilities cover stamping, forging, die casting, CNC milling, turning, plastic injection molding, and rubber molding, ensuring a comprehensive range of manufacturing solutions.

D&D offers a distinctive option to incorporate customers' logos into products, enhancing brand image and brand recognition, creating an endless stream of sustainable business for the customers.

In addition to our OEM services, D&D also provides an extensive selection of standard building hardware. From in-

novative door closers to robust exit devices, glass hardware, door locks, handles, and intricate accessories, D&D provides reliable products designed to meet the requirements of functionality, durability, and aesthetics.

With a commitment to quality and customer satisfaction, D&D Builders Hardware continues to be a trusted partner in delivering exceptional OEM manufacturing solutions and hardware products.

For more information, visit our official website at WWW.DND.COM.TW. Feel free to contact us at DDSALES@DND.COM.TW for inquiries or collaboration opportunities. We look forward to serving you with pleasure. Thank you for considering D&D Builders Hardware Co. (TAIWAN).

YU CHING PLASTICS CO., LTD.

Yu Ching Is Specialized in Toolbox Manufacturing and OEM

Lo Shu-hua

Established in 1979, Yu Ching Plastics Co., Ltd. boasts over forty years of expertise in the development and manufacturing of professional toolboxes. Widely acknowledged as a reliable OEM (original equipment manufacturer) in the market, the company takes pride in crafting products that are environmentally conscious. Utilizing 70% recycled materials, these innovative toolboxes incorporate 30% wasted fishing nets, exemplifying a steadfast commitment to achieving 100% recycled materials in their production.

Yu Ching produces a wide array of products, including toolboxes, medical devices, broadcast equipment, auto parts, outdoor goods, etc. The firm has also collaborated with many domestic and

international brands, making itself the exclusively designated extrusion blow-molding manufacturer of many enterprises.

In the field of toolboxes, the company has developed a wide range of core plates to provide various sizes of toolboxes to meet customer needs.

While conducting R&D in line with customers' demand, Yu Ching would select different plastic materials with various features, such as UV protective, cold-resistant, antiseptic, and recyclable, and provide manufacturing advices to customers.

In addition, from OEM to ODM, Yu Ching can provide customized services through design, R&D, and manufacturing processes, which allow clients to adjust every part of the production process according to

product characteristics and ensure unquestionable quality.

With the rise of the circular economy in recent years, Yu Ching places heavy emphasis on green materials and carbon reduction, as well as to require all products to comply with the European Union's ROHS standards and to be recyclable. Meanwhile, Yu Ching has also obtained the ISO 9001 Quality Management System (QMS) certification to minimize the losses and waste in the process from design to mass production with its over 40 years of professional manufacturing experience.

Crafted from 70% recycled materials, these innovative products utilize 30% wasted fishing nets, embodying a commitment to 100% recycled materials. (Photo provided by Yu Ching)

Kuo Fang-lin

Since its establishment in 1985, Tai Cheer Industrial Co. LTD. has been a dedicated supplier of a diverse range of steel ball slide rails. These precision-crafted rails find applications in furniture, kitchen furniture, tool carts, white goods, vehicle seats, ATMs, medical instruments, and various other sectors. Widely employed in

drawer stretching, these slide rails are primarily manufactured through OEM and ODM processes, tailored to meet specific and customized requirements.

Tai Cheer offers a diverse range of steel ball slide rails, spanning light-, medium-, and heavy-duty models. Notably, the heavy-duty variants boast an

THTMA EXHIBITION TiTE Showcases Central Taiwan's Industry Cluster Advantage

Andrew Hsu

To capitalize on the industry cluster advantage in central Taiwan, the THTMA (Taiwan Hand Tool Manufacturers' Association) has taken the initiative to organize self-organized exhibitions in recent years. The Taiwan International Tools & Hardware Expo (TiTE 2023), held under the guidance of the International Trade Administration, Ministry of Economic Affairs (MOEA), is a pivotal event featuring over 300 suppliers poised to cater to more than 30,000 visitors. This expo marks a significant milestone in Taiwan's post-pandemic era, themed as "TOOLS KINGDOM: The World's Strongest Supply Chain is in Taiwan." It aims to showcase the industrial clusters in central Taiwan to a global audience, with the ultimate goal of fortifying its presence in international markets and emphasizing its commitment to fostering global partnerships.

The exhibition also hosted a summit that delved into strategies for positioning high-end hardware tools in the global market. Exploring AI-integrated manufacturing technologies, addressing the "three-carbon issues" (Carbon Neutrality, Carbon Emissions, and Carbon Footprint Verification), and discussing profit control were key focal points of the summit. Serving as a professional platform, it facilitated discussions among industry experts and specialists worldwide on current international trends, solutions to ESG (Environmental, Social, and Corporate Governance) policies, and networking opportunities.

To leverage the industry cluster advantage in central Taiwan, the Taiwan Hand Tool Manufacturers' Association has initiated self-organized exhibitions in recent years. (Photo courtesy of CENS)

A-KRAFT Tools Manufacturing Co., Ltd.

A-KRAFT Tools: Crafting Success with Precision and Innovation

Alex Lee

Established in 1988 in Taichung, Taiwan, A-KRAFT Tools Manufacturing Co., Ltd. is a quality-oriented company with ISO 9001:2015 certification. Serving as a professional and trustworthy partner in the tool world, A-KRAFT boasts a robust in-house R&D team, ensuring the launch of new products at least twice each year.

A-KRAFT employs a rigorous quality control system, maintaining precision and consistency in product design. With a forward-thinking marketing and sales team,

the company provides clients with top-tier quality service that consistently exceeds expectations.

Meeting the diverse needs of clients and showcasing market competitiveness while understanding global demand trends, the company primarily provides 1/4", 3/8", 1/2", 3/4", and 1" DR sockets, screwdriver sockets, ratchet handles, accessories, and various types of wrenches for the repair and maintenance of cars, trucks, and similar-sized machines. All products adhere to DIN and ANSI standards.

JOUNING BLOWER CO., LTD.

Various Fan Maker Jouning Blower Targets Diverse Overseas Industries

■ Liu Hsiu-Chuan

Founded in 1968, Jouning Blower Co., Ltd. specializes in blades, fan wheels, and industrial fan production. Known for its high-quality offerings, the brand enjoys recognition domestically and globally, particularly in Japan, Southeast Asia, the Middle East, and Australia.

Notably, Jouning Blower remains committed to developing new turbo fans and jet flow air movers with anti-explosion features. With exceptional designs and a collaborative approach to clients, the company is well-equipped to offer excellent services.

Also, Jouning Blower has innovatively crafted large-

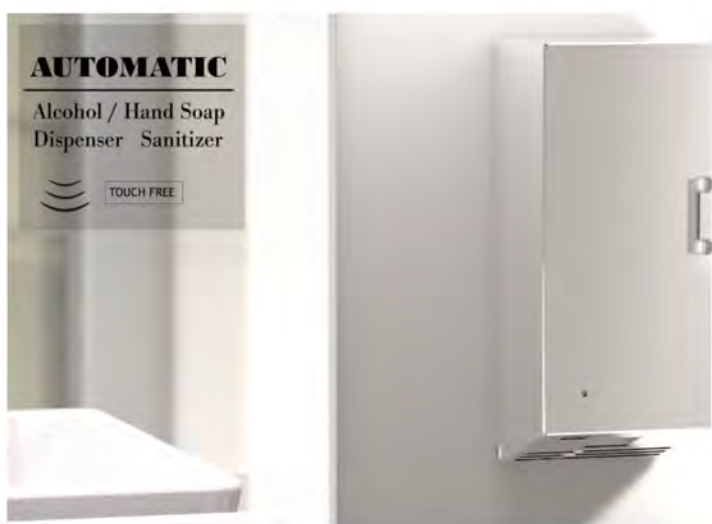

sized Axial Flow Fans, ideal for diverse environments like mines, ship cabins, textile factories, underground tunnels, and hotel kitchens. Moreover, these fans boast high airflow, easy installation, and adjustable blades for customized settings. Utilizing top-grade aluminum alloy material for die casting, Jouning Blower ensures enhanced structural durability, smoother surfaces, and reduced noise levels, setting their products apart in terms of quality and performance.

LEADING TOOLS INDUSTRIAL CO., LTD.

Leading Tools Supplies Construction Tools in a Comprehensive and Precise Manner, Reducing Costs for a Win-Win Situation

■ Kuo Fang-lin

Leading Tools Industrial Co., Ltd. was established in 1982, specializing in the development and production of high-quality craftsman tools and construction tools.

In order to maintain its advantage in the world market, Leading Tools utilizes Toyota Production System, TPM to assist customers in establishing product demand models, emphasizing information communication with customers, and forecasting the future period based on customer requirements. market demand for the product. Leading Tools expertly manages production flexibility to align it with timely, appropriate production quantities. This not only enables effective order control and reduces customer inventory, but also establishes a regular instant replenishment system. These strategic

measures not only help reduce customer spending, but also create a win-win situation for Leading Tools and customers.

In the field of product development, Leading Tools actively establishes cooperative relationships with local schools in Taiwan to create a collaborative environment and continuously improve product quality and functionality. Complementing this commitment to innovation, the factory is equipped with state-of-the-art machinery capable of producing over 10,000 high-end spatulas per day.

Looking ahead, the company plans to build a net-zero carbon emissions facility next year, marking a major step towards environmental sustainability.

HANS TOOL INDUSTRIAL CO., LTD.

HansTools Showcases Enhanced Durability with SNCMVH Screwdriver Tips

Shen Chia-yi

HansTools elevates its screwdriver technology by emphasizing the exceptional durability of SNCMVH (Silicon-Nickel-Copper-molybdenum-manganese-vanadium) steel tips, setting a new standard in the industry.

With a hardness coefficient ranging from 59° to 61°HRC, the SNCMVH steel ensures:

Unmatched Durability: Exceptional resistance to wear and tear, providing extended tool lifespan.

Toughness and Elasticity: Withstanding high torque stresses without compromising structural integrity.

Fracture Prevention: Elastic features prevent fractures, enhancing safety and reliability under stress.

Quality Assurance: Rigorous testing and advanced heat treatment guarantee consistent quality.

Comparison with Other Materials:
Cr-V Bits Steel Blade: (Hardness: 53°~ 55°, Torque: 170~190 kg/cm).

S2-Bit Steel Blade: (Hardness: 57°~ 59°, Torsion: 190~210 kg/cm).

Special Alloy Steel Blade: Superior hardness, torsion, durability, and flexibility compared to Cr-V and S2 steel.

P.S. SNCMVH Hardness: 59°~ 61°, torsion 260~270 kg/cm

About HansTools

HansTools, a leader in tool manufacturing, focuses on delivering excellence, durability, and performance. The SNCMVH steel tips exemplify our dedication to setting new industry benchmarks.

Hans Tool's Triangular form palm-in-power is designed for comfortable grasp and max driving.

SCF's factory is now equipped with fully installed solar panels, capable of generating 1,500,000 kWh of electricity annually, equivalent to reducing carbon emissions by 750 metric tons of CO2e each year. (Photo provided by Shuenn Chang Fa)

SHUENN CHANG FA ENTERPRISE CO., LTD.

SCF's Eco-Friendly Screws: A Solution for a Greener Tomorrow

■ Huang Chi-ming

Shuenn Chang Fa Enterprise Co., Ltd. (SCF) renowned as high-quality long-length screws manufacturer and had been actively involved in addressing a critical issue: Climate Change. Since 2015, SCF has supported customers in participating the Carbon Disclosure Project focused on Climate Change. In 2022, SCF initiated Carbon Footprint Verification for both scope 1 and scope 2 emissions and achieve ISO 14064-1 certification by year-end of 2023.

Over the past four years (2019-2022), SCF has consistently worked towards enhancing energy efficiency and reducing electricity consumption. This involved improvements to the air compressors throughout the entire plant, the installation of frequency conversion upgrades, and the replacement of traditional lighting with energy-saving LED

fixtures. These efforts have resulted in significant savings of 153,497 KW, equivalent to approximately 77.6 tCO2e in reduced emissions.

With a 40-years history, SCF maintains a focus on producing customized design screws, specialized long screws, and automotive screws. The majority are manufactured in-house and undergo rigorous inspection at each production stage. SCF has earned certifications including IATF 16949, ISO 14001, and ISO/IEC 17025, attesting to its commitment to quality and environmental standards.

SCF offering a comprehensive range of customized screws from 10mm to 1000mm, and provides customers with a one-stop solution to meet diverse needs.

NEW LUNG CHEN IND. CO., LTD.

New Lung Chen's Four-Decade Dedication to High-Quality Metal Furniture

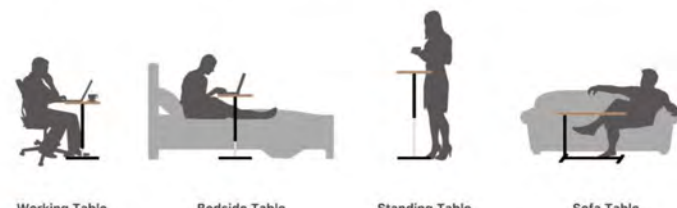

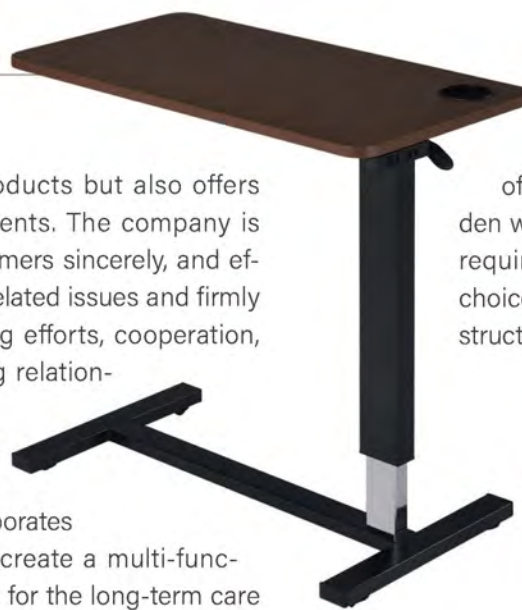

■ Chang Jin-yun

For four decades, New Lung Chen Industrial Co., Ltd. has stood as a dedicated and professional metal furniture manufacturer in Taiwan. The company remains committed to the development and production of high-quality functional furniture, showcasing a legacy of expertise in the industry.

New Lung Chen primarily provides a range of furniture, including height-adjustable tables, bar stools, coffee tables, trolleys, coat racks, and more. With a persistent focus on research and development, the company not only produc-

es high-quality standard products but also offers customization options for clients. The company is dedicated to serving its customers sincerely, and efficiently addressing product-related issues and firmly believes that through ongoing efforts, cooperation, and client satisfaction, lasting relationships are built.

Currently, to address the global trend of an aging population, New Lung Chen collaborates with Japanese customers to create a multi-functional lifting side table tailored for the long-term care

of the elderly at home. This innovative design incorporates hidden wheels for convenient movement and caters to various height requirements. Amid the pandemic, it emerged as the preferred choice for individuals working from home, providing a stable lifting structure that has earned the trust of customers over the years.

NAN SHUN SPRING CO., LTD.

One-Stop Expert Nan Shun Spring Produces Precision Springs and Industrial Parts

■ Liu Shiu-hua

Established in 1987, Nan Shun Spring Co., Ltd. specializes in manufacturing precision springs, iron wire products, metal parts, fittings, and more. The company has developed a reputation as a professional manufacturer with strong research and design capabilities in the field of precision springs and related industrial parts.

Initially focusing on springs and wire forms on an OEM basis, Nan Shun Spring diversified its operations after accumulating years of experience. The company expanded its capabilities to include stamping, die-casting, punching, and lathing, enhancing its expertise in working with various metals and metal-

working methodologies.

At present, Nan Shun Spring's diverse product lines encompass springs, wire forming, flats, clips, clothes hangers, hooks, rings, clamps, metal hardware parts, CNC processing products, spring leaves/sheets, stainless steel hardware, pins, wire form bending shapes, and more. Leveraging its OEM experience, the company readily accepts customers' design blueprints and 3D design blueprints (auto cad or pro/e 3D files).

Nan Shun Spring makes precision springs and a wide range of industrial parts.

SHIN CHUN ENTERPRISE CO., LTD.

Shin Chun's Patented Winer Screw Upholds High Efficiency, ETA Certification Owned

■ Huang Chi-ming

Since its establishment in 2003, Shin Chun Enterprise Co., Ltd. has emerged as a distinguished Taiwanese manufacturer special-

izing in screws. The company holds certifications in ISO 9001:2015 and IATF16949:2016 (awarded by BSI), reflecting its commitment to stringent quality standards.

Renowned for its highly automated and diversified production processes, Shin Chun is currently engaged in the manufacturing of a broad spectrum of screws. This extensive range encompasses car screws, drywall screws, threading screws, plastic board screws, self-drilling screws, and machine screws, etc., designed for various applications such as drywall, chipboard, tapping, self-drilling concrete, machine, automotive, and special-use scenarios. The company's ver-

satile product line has earned favor among buyers in Europe, America, and Japan, leading to consistent growth each year.

Also, the company boasts state-of-the-art automated production lines, featuring over 50 sets of production equipment. This includes 1-die 2-stroke precision cold forging machines, specialized machinery for feeding and tapping, as well as automatic sorting systems. Leveraging these advanced capabilities, Shin Chun expands its range of screws, offering flexibility in appearance and specification design, and providing clients with adaptable production solutions.

Introduced as the latest innovation, Shin Chun's new patented Winer Screw represents a significant upgrade from traditional screws. This new generation exhibits lower torque, boasting a reduction of up to 30%. Primarily designed for woodwork buildings, users can efficiently drill the screw in, but not easy to remove it, making it a valuable tool to enhance the competitiveness of enterprises.

Revolution! Winer Screw® reducing driving torque by around 30%!

KINGBOLT METAL CO., LTD.

Kingbolt Metal Looks After Clients with Quality Hardware

Chang Shi-hua

Established in 1975, Kingbolt Metal Co., Ltd. stands as a seasoned manufacturer of diverse hardware products, delivering top-notch quality and services to its clients. Specializing in stamping and pressed works for steel, stainless steel, and brass, Kingbolt has expanded its offerings to include stamping products, cabinet hardware fittings, mini latches, auto-latch, welded metal/brass parts, hinges, steel tube hinges, various stainless steel items, etc.

Designed for personal use and as a gift for hotel travelers, the company introduces its latest product, the

Beauty Mirror (Triple Mirror) 3". With one flat side and the other showcasing a three-times enlarged imaging mirror, it is available in steel, chrome plated, or stainless steel.

Beyond manufacturing and designing its products, Kingbolt collaborates closely with associated manufacturers, ensuring the integration of quality parts into their main products while meeting industry standards.

Kingbolt offers a wide range of products, such as steel/stainless stamping/pressing assembling products, fasteners, wire hooks, and hardware. (Photo provided by Kingbolt Metal)

Spearheads Global Hardware Engagement in 2024

Economic Daily News / CENS

Andrew Hsu

To meet the growing demand and capitalize on business opportunities for both top-notch suppliers and buyers, Economic Daily News/CENS is proactively engaging in a range of hardware and hand tools exhibitions in 2024. The initiative involves disseminating the exclusive show express and professional trade magazine, coupled with providing complimentary matchmaking services. This concerted effort aims to expedite the alignment of business opportunities between discerning buyers and high-quality suppliers.

The National Hardware Show (NHS), recognized as the largest and most established hardware exhibition in North America, continues to be a cru-

Taiwan

cial event for numerous high-profile manufacturers, including Taiwan's hardware and hand tool products. Renowned for their consistent innovation and patented designs, these products earn recognition for their quality and cost-effectiveness among international buyers. Given that the U.S. is the largest export destination for hand tools and hardware from Taiwan, the NHS serves as a prime opportunity for Taiwanese

manufacturers to enhance international sales and engage in valuable industry exchange.

Also, scheduled for March 3 to 6, 2024, the Eisenwarenmesse-International Hardware Fair, recognized as the world's largest trade fair for hardware and hand tools, will take place in Cologne, Germany. Spanning six exhibition halls over 165,000 square meters, the event has commitments from major companies in Germany and 45 countries globally. This widespread participation underscores the industry's significant regard for this biannual gathering, making it the most effective venue for global suppliers of hardware, tools, fasteners, and DIY products to expand international business opportunities.

As a longstanding media partner of the shows, Economic Daily News/CENS will actively participate in the upcoming events. The focus is on providing buyers with the latest hardware show express, facilitating a swift update on news related to Taiwan's hardware manufacturers, industry trends, and pertinent industry news.

WIRE PRODUCTS, HOOKS AND HOME HARDWARE

Customer's samples, drawings and OEM orders are welcome. All orders handled in confidence.

From War Demand to Global Leader: The Evolution of Taiwan's Hand Tools

■ Andrew Hsu

Taiwan, ranked as the third-largest manufacturing country globally, boasts an annual production value exceeding US\$4 billion. This substantial output is driven by over 2,300 hand tools manufacturers on the island, securing its position as the world's leading OEM for middle and high-end hand tools.

Originating in the 1970s out of the demand for maintenance during the Vietnam War, the Taiwanese hand tools industry took root. With the geographical proximity to Vietnam, the US Army's presence at the Ching-Chuan-Kang Air Force Base facilitated the emergence of hand tools factories in Taichung, specializing in pickaxes, pliers, hammers, and more.

In the current landscape, approximately 70% of local industry practitioners choose central Taiwan (Taichung, Changhua, Nantou) as their primary production base.

This concentration of interconnected industries in the region provides a substantial industry cluster advantage. Notably, major buyers from Europe, Japan, America, and China praise the accessibility through the Taichung Ring Expressway, allowing them to conveniently access 12 categories of hand tools within just a thirty-minute drive.

Discussing the industry's future, Hsiao Fang-Wei, the Executive Vice President of the THTMA (Taiwan Hand Tool Manufacturers' Association), observes that the current situation presents a unique opportunity for the Taiwan hand tools industry. The ongoing exchange of opinions with international practitioners and domestic manufacturers has led to the conclusion that enterprises rarely have the time to reflect on and summarize their experiences from the past few years while anticipating the upcoming challenges. Hsiao anticipates a complete market revival, likely to occur in Q3 2024.

Taiwan holds the position as the third-largest manufacturing country globally. (Photo courtesy of CENS)

He estimates that, at that time, when buyers' inventory is nearly digested, there will be another peak for the global hand tools industry.

Find Industrial Parts in One Go Through "Taiwan Industrial Suppliers"

■ BY CENS

The Economic Daily News (CENS)-published Taiwan Industrial Suppliers (TIS) is Taiwan's most comprehensive listing of industrial parts, components, and accessories suppliers.

Consisting of around 12,000 suppliers and manufacturers, buyers can source parts from the rubber, plastics, transportation equip-

ment, electronic parts, machinery, hardware parts, medical equipment, molds, and metals industries.

Scan here to obtain the digital file of TIS trade magazine. (Photo courtesy of CENS)

ment, electronic parts, machinery, hardware parts, medical equipment, molds, and metals industries.

Taiwanese suppliers are renowned for their flexibility in both manufacturing varied products and staying relevant on the global stage with their keen sense of industry trends. Whatever product you're looking for, or haven't found, be sure to look through TIS — these suppliers can deliver or work tirelessly with customers to make it happen.

TIS is an annual publication coming in an e-magazine format, which interested readers can look for online on TIS.cens.com, or obtain the e-magazine digital file through the TIS USB by visiting the CENS booth at trade fairs globally.

The inherent strength of Taiwan's hand tools industry lies in its deep-rooted "resilience" ingrained in the nation's fabric. (Photo courtesy of CENS)

Andrew Hsu

Over nearly 50 years of development, Taiwan's hand tools industry, boasting more than 90% of small and medium-sized entrepreneurs, has evolved with a deep technological background. Hsiao Fang-Wei, Executive Vice President of the Taiwan Hand Tool Manufacturers' Association (THTMA), emphasizes that the extensive history has shaped the industry's prac-

Resilient Island: Unveiling Hand Tools Manufacturing Culture in Taiwan

tioners. The current "Manufacturing Culture" in Taiwan is notably influenced by both Japan and mainland China, with Hsiao explaining, "That is to say, we not only extracted the strengths of both but also addressed the shortcomings."

Taiwanese manufacturers have inherited production efficiency and flexibility from China, coupled with Japan's unwavering commitment to impeccable quality. This blend discards the hasty production methods of the former and the rigid production approaches of the latter. Consequently, with competitive pricing, Taiwanese hand tools products have long been favored by international buyers.

Hsiao also underscores the indispensable strength of Taiwan's hand tools industry—the in-

herent "resilience" deeply ingrained in the nation's fabric. Describing Taiwan's history as a narrative of colonial influences, from the Dutch and Spanish presence to the Qing Dynasty and Japan, Hsiao emphasizes the enduring resilience of the Taiwanese people. Despite various rulers and challenges, the nation has cultivated a spirit of tenacity, facing adversity without fear.

Proudly noting the 1999 Jiji earthquake, where Taiwanese manufacturers swiftly resumed operations within a few weeks despite equipment disruptions, Hsiao underlines the industry's resilience. Despite facing the 1997 Asian Financial Crisis, the 2008 Financial Crisis, and the 2019 COVID-19 pandemic, Taiwanese manufacturers consistently maintained production, showcasing stability and unwavering quality.

TAIWAN WINCH INDUSTRIAL CO., LTD.

Procure Quality and Efficient Electric Hoists from Taiwan Winch

■ Ralph Yang

Taiwan Winch Industrial Co., Ltd. is a renowned manufacturer specializing in a range of electric hoists, including AC winches, compact winches (85kg~300kg), longer rope compact winches (170kg~500kg), and electric wire rope winches with lifting capacities ranging from 170kg to 3000kg.

Leveraging outstanding R&D capabilities and extensive industry experience, the company

has crafted a comprehensive selection of electric hoists suitable for applications in construction, households, brick-and-mortar stores, and factories. Taiwan Winch maintains a strong commitment to delivering the best electric hoists to its customers, ensuring a consistently high level of quality and performance for each product in their lineup.

*Taiwan Winch features electric hoists of various types.
(Photo courtesy of Taiwan Winch)*

Taiwan Winch's electric hoists have gained widespread recognition and customer acclaim both domestically and internationally. The excellence of Taiwan Winch's products can be attributed to their unwavering commitment to technological research and development. The R&D department, with a keen focus on market trends, not only introduces new electric hoists but also strives to elevate the performance levels of existing product lines. The overarching objective is to continually enhance each electric hoist from Taiwan Winch, ensuring the best possible performance and efficiency for their customers.

Maintaining a commitment to quality has been a long-standing tradition at Taiwan Winch since its establishment. The company upholds this commitment by implementing a total quality control system, meticulously overseeing quality at every stage of the hoist manufacturing process.

Stringent and comprehensive quality inspections are conducted before shipment, ensuring that each product from Taiwan Winch consistently upholds high standards of quality and maximum dependability.

HPMJ CO., LTD.

HPMJ Unveils Innovative Solution for High Current Environments

■ Kuo Fang-lin

In light of the increasing prominence of electric vehicles in the global market, the heightened frequency of construction and maintenance within high-current environments has emerged as a significant concern. In response to this trend, HPMJ Co., Ltd. has innovatively developed a patented MPP high-current overcurrent special connector, offering a strategic solution to address this pressing situation.

HPMJ's MPP high-current overcurrent special connector stands as a reliable solution, ensuring stable and safe electricity supply and distribution for various vehicle power connections. Furthermore,

the product boasts the capability to carry over 300 amps of DC overcharge, exhibiting an impressive overcharge rate exceeding 90%. Addressing various needs, the copper-made stylus can be customized with different hole diameters, including Dia. 38 square meters, Dia. 22 square meters, and Dia. 14 square meters. Its thoughtful design ensures easy installation for staff, and the patented spring design caters to satisfying customized user requirements. Notably, the product's cost is lower than Anderson connectors, establishing a substantial competitive advantage in the market.

HPMJ specializes in the professional manufac-

turing of batteries, emergency car starters, and MPP high-current overcurrent special connectors. With numerous patents and certifications, including CE and FC certificates, the company ensures high-quality products. HPMJ welcomes OEM cooperation from various industries and sectors.
