Taiwanese Manufacturers Look Forward to Strengthening International Cooperation

HPMJ CO., LTD.

From Roadside Rescue to Heavy Machinery, HPMJ Delivers Emergency Power Solutions with V4 Series

■ Kuo Fang-Lin

HPMJ Co., Ltd. has launched the V4-20Ah 12V/24V heavy-duty emergency jump starter, targeting commercial vehicle rescue and high-current applications. The newly developed voltage safety recognition system provides real-time numerical readings on an integrated display, allowing users to clearly identify the required output level. Readings of 12-14V support passenger vehicles, while 24-27V are intended for heavy-duty trucks, delivering an intuitive interface that simplifies operational judgement.

The V4-20Ah is powered by a high-performance 20Ah battery. To extend battery lifespan, HPMJ has engineered a 24V balanced charging system to support dual-battery 12V balanced charging, ensuring stable current delivery, doubling 12V output capacity, and reducing battery degradation. The system incorporates indicator lights and overcharge protection that automatically interrupts charging to prevent overheating. Even after one month of inactivity, the unit retains sufficient residual capacity to start a vehicle.

For functionality, the unit integrates a red LED light that provides both illumination and warning support during roadside emergencies. The V4-20Ah also features HPMJ's proprietary MPP high-current overcurrent protection connector, protected by a Taiwan patent, delivering up to 90% overcurrent protection during engine startup. Additional safety mechanisms prevent current output

when the connector is unplugged, while incorrect clamp connections trigger a beeping warning.

The V4-20Ah supports heavy-duty applications, including tour buses, container trucks, excavators, semi-trailer trucks, military tanks, heavy construction vehicles, and large agricultural machinery. The V4 series is available in two models: a rescue model and a camping model. The camping model adds charging ports, USB, and Type-C connectors to support mobile devices and outdoor equipment. HPMJ also offers emergency power solutions including emergency lighting, USB charging, portable power supply, and roadside assistance. Backed by a portfolio of 94 patented technologies, HPMJ invites OBM and ODM partnerships worldwide.

JOUNING BLOWER CO., LTD.

Various Fan Maker Jouning Blower Targets Diverse Overseas Industries

■ Liu Hsiu-Chuan

Founded in 1968, Jouning Blower Co., Ltd. specializes in blades, fan wheels, and industrial fan production. Known for its high-quality offerings, the brand enjoys recognition domestically and globally, particularly in Japan, Southeast Asia, the Middle East, and Australia.

Notably, Jouning Blower remains committed to developing new turbo fans and jet flow air movers with anti-explosion features. With exceptional de-

Jouning Blower's lineup of air conditioning fan offerings. (Photo courtesy of Jouning Blower)

signs and a collaborative approach to clients, the company is well-equipped to offer excellent services.

Also, Jouning Blower has innovatively crafted large-sized Axial Flow Fans, ideal for diverse environments like mines, ship cabins, textile factories, underground tunnels, and hotel kitchens. Moreover, these fans boast high airflow, easy installation, and adjustable blades for customized settings. Utilizing top-grade aluminum alloy material for die casting, Jouning Blower ensures enhanced structural durability, smoother surfaces, and reduced noise levels, setting their products apart in terms of quality and performance.

CHYN FUH ENTERPRISE CO., LTD.

ISO-9001 Certified Chyn Fuh Excels in Crafting Top-Quality Office Furniture

■ Huang Chi-ming

Established in 1993, Chyn Fuh Enterprise Co., Ltd. specializes in the design, development, and manufacturing of innovative assembled office furniture.

With a strong focus on quality, continuous product research, and the creation of finely crafted in house designs, Chyn Fuh markets its products worldwide under the trademark "RAINBOW."

To remain competitive in the global market, the company maintains ISO 9001 certi-

cation and actively complies with environmental regulations and international factory inspections, while consistently investing in research and development.

Its latest product line responds to the evolving needs of both home and office environments, integrating new usage habits and offering versatile solutions for indoor and outdoor furniture.

Welcome to enjoy early access to our latest designed collections with storage series for office and home furniture. (Photo provided by Chyn Fuh)

TAI CHEER INDUSTRIAL CO., LTD.

Tai Cheer’s High-Quality Steel Ball Slide Rails Earn International Acclaim

■ Kuo Fang-Lin

Since its establishment in 1985, Tai Cheer Industrial Co. LTD. has been a dedicated supplier of a diverse range of steel ball slide rails. These precision-crafted rails find applications in furniture, kitchen furniture, tool carts, white goods, vehicle seats, ATMs, medical instruments, and various other sectors. Widely employed in drawer stretching, these slide rails are primarily manufactured through OEM and ODM processes, tailored to meet specific and customized requirements.

Tai Cheer offers a diverse range of steel ball slide rails, spanning light-, medium-, and heavy-duty models. Notably, the heavy-duty variants boast an impressive maximum load capacity exceeding 500 lbs. These slide rails

come equipped with various functions, categorized into soft-closing, lock-in & out, and self-closing features. Further classifications include two-stage and three-stage slides, full extension, 3/4 extension, and double slide methods.

Currently, Tai Cheer operates four manufacturing plants strategically positioned in central Taiwan. Three of these plants are situated in Huwei and Tuku townships of Yunlin County, with the fourth located in Tastun of Changhua County. Demonstrating a commitment to quality and environmental standards, the company proudly holds ISO 9001:2015 and ISO 14001:2015 certifications. Spanning an impressive 23,141 square meters across these facilities, a cohesive network of 100 production lines operates tirelessly to fulfill customer demand, guaranteeing the reliable delivery of top-notch products.

JAAN-HUEI INDUSTRIAL CO., LTD.

Jaan-Huei Highlights Patented Hand Rotary Pump for DEF & Oil Transfer

■ Tzeng Lung-nan

Jaan-Huei Industrial Co., Ltd. is a Taiwan-based manufacturer with over 38 years of experience in designing and producing professional hand pump solutions. As an early innovator in plastic rotary hand pumps, the company has established a robust intellectual property portfolio, with multiple patents registered across major global markets.

Manufactured exclusively in Taiwan and certified to ISO 9001 standards, Jaan-Huei delivers consistent quality, product reliability, and long-term performance. The company supports a

highly experienced team that reinforces manufacturing precision and dependable supply partnerships.

Jaan-Huei upholds strict material standards in the process of its product development. The company refuses to use secondary raw materials that may compromise mechanical integrity, ensuring stability and durability across all product lines. Its portfolio includes rotary hand pumps, lever-action drum pumps, high-flow

hand pumps, aluminum and metal rotary hand pumps, piston pumps, chemical hand pumps, oil pumps, and plastic hand pumps.

The company's featured product is a patented Hand/Manual Plastic Rotary Oil Pump, supporting applications such as DEF, oil, and chemical fluid, with a function to rotate freely. Serving key markets across Europe, the United States, Japan, and Asia, Jaan-Huei also offers custom-labeling solutions for high-volume customers, reinforcing its position as a trusted global OEM partner.

HANS TOOL INDUSTRIAL CO., LTD.

From Cold Forging Pioneer to the Digi-Torc Adaptor, The Evolution of Hans Tools

■ Shen Chia-yi

The next decade of the hand tools industry will not be defined by “more tools.” It will be defined by how tools connect to decisions—on the line, in the workshop, and across the supply chain. As digital and AI become standard infrastructure, productivity will shift from pure force and experience to measurable precision, repeatable process, and real-time feedback.

Hans Tools is positioning for this transition with a clear direction: work smarter through digitali-

zation. The goal is not technology for show. The goal is operational outcomes—less rework, fewer failures, faster diagnosis, and higher consistency. Digital torque, traceability, and data-driven workflows are the bridge between human craftsmanship and enterprise-grade reliability.

At the same time, the “future of work” is not

Hans Tools' 6878D Digital Torque Adaptor.
(Photo Courtesy of Hans Tools)

only digital. It is also more conscious. Teams will be expected to operate with stronger awareness of risk, accountability, and sustainability—because every action is more visible, more recorded, and more auditable. In that environment, tools are no longer isolated products; they become systems that guide behavior: setting standards, reducing human error, and turning best practice into daily practice.

This is the new benchmark: precision with intelligence, performance with governance, and efficiency with responsibility. Hans Tools is building for that benchmark—where hand tools evolve into smart enablers of quality, compliance, and long-term productivity.

SHUENN CHANG FA ENTERPRISE CO., LTD.

SCF Specializes in Tailored Fasteners Stuck to Sustainable Codes

■ Huang Chi-ming

Established 42 years ago, Shuenn Chang Fa Enterprise Co., Ltd. (SCF) specializes in tailored standard screws, special long length screws and automotive fasteners mostly with its in-house facilities under stringent quality inspection.

The company has been awarded with multiple certifications, including IATF 16949, ISO 14001, ISO/IEC 17025 and ISO 140464-1, attesting to its commitment to quality management and environmental friendliness.

Well known for manufacturing of quality long screws, SCF has been willing to respond to the Carbon Disclosure Project-Climate Change (CDP) issue with aggressive attitude. Since 2015, the company has assisted its customers

join its CDP practices, including its 2022 outset of Carbon Footprint Verification (CFV) aimed at the examinations on Part I and Part II products as well as its 2023 acquisition of the ISO 140464-1 certificate for greenhouse gas emission management.

Between 2019 and 2024, SCF has conserved at least 257,355 kilowatt/hour of electricity, cutting at least 128.289 tons of CO2 emission thanks to its environmental-friendliness efforts. Originally, the company produced 2,300 to 2,800 tons of CO2 emissions ever year, and has set the goal to reduce power consumption by 1% annually by replacing diesel-powered forklifts with electrical models as well as phasing in solar-power system and source-recycling practice.

SCF's factory is now equipped with fully installed solar panels, capable of generating 1,500,000 kWh of electricity annually, equivalent to reducing carbon emissions by 750 metric tons of CO2e each year. (Photo provided by SCF)

SCF has stuck to ESG framework to push eco-friendly manufacturing at its factories and become one of Taiwan's iconic ESG manufacturers with its awarded ISO 14064-1 certificate.

SCF provides various specs of fasteners in terms of length, ranging from 10mm to 1000mm, to make it a one-stop solution provider for multiple industries.

CHIA CHENG WORLD INDUSTRIAL CO., LTD.

Quality Hardware OEM Manufacturer Chia Cheng Seeks Global Partners

Lo Shu-hua

Chia Cheng World Industrial Co., Ltd. is a professional OEM manufacturer and exporter specializing in metal processing for washroom and bathroom accessories, as well as toilet partition hardware. Established in 1965 in Taoyuan, Taiwan, Chia Cheng offers an end-to-end metal processing from concept development to mass production. For optimal customization, Chia Cheng has integrated a manufacturing system that tailors engineering refinement, design validation, and pre-production sampling.

Sustainability is central to operations. Chia

Cheng is certified with both ISO 9001 and ISO 14001 standards and has installed on-site solar power systems, reinforcing its commitment to energy efficiency and responsible manufacturing.

With more than 60 years of metal processing and product engineering expertise, Chia Cheng has been steadily serving quality-driven markets across Europe and the Americas. Services include laser cutting, stamping, bending, welding, zinc die-casting, aluminum extrusion, surface polishing, chrome plating, galvanizing, powder coating, and final assembly. This vertical integration enables stable quality control, consistent lead times, and

Chia Cheng has earned ISO 9001, ISO 1400 certifications.

flexible production tailored to customer specifications. As a trusted OEM partner, Chia Cheng leverages technical expertise to provide high-quality customizations for global buyers seeking long-term collaboration.

RUNG SEE INDUSTRY CO., LTD.

Rung See Delivers Quality Socket Tool at Shorter Lead Time

Kuo Fang-lin

Founded in 1978, Rung See Industry Co., Ltd. is a Taiwanese hand tool manufacturer with a blended culture of Japanese manufacturing discipline. With extensive experience in production management working for a Japan-based hand tool firm in Taiwan, the founder established Rung See, focusing on the research, development, and supply of mechanical tools. Guided by the philosophy of "high quality, competitive pricing, and short lead times," Rung See provides customers with reliable and cost-effective products.

In its early years, the company established market credibility through consistent quality and disciplined inspection processes, becoming one of Taiwan's leading sup-

pliers of universal clamps and wire clips. Its products range centered on clamping pliers, combination pliers, and needle-nose pliers. In response to changing market demand, Rung See expanded into manual socket tools in the 1990s, positioning its products as Jap-

anese-grade quality at competitive Taiwanese pricing. This second phase of growth quickly gained market recognition, culminating in socket exports that reached a milestone of exceeding 60 million units in 2007.

To ensure consistent quality, Rung See implemented ISO-certified systems and continues to invest in hardness testing, electroplating thickness inspection, and computerized torque and life testing. Today, its products are marketed across Europe, the Middle East, and Asia, supported by ongoing OEM and ODM collaborations tailored to international market demands.

LENCO ENTERPRISES CO., LTD.

Find Top-Grade Powder Metallurgy Products at Lenco

■ Lo Shu-Hua

Established in 1975, Lenco Enterprises Co., Ltd. is a specialized manufacturer located in Miaoli, Taiwan. With a 5,800 sqm factory and a workforce of 50, Lenco produces high-quality powder metallurgy products.

Drawing upon their approximately 40 years of metallurgical expertise, Lenco has become a trusted name in the manufacturing of P/M products. In addition, the company is a leading exporter of cost-effective precision parts. The company offers an extensive range of powder metallurgy components and operates its own production line while also serving as an OEM/ODM manufacturing partner.

With a highly experienced team, well-versed in

metallurgy product development, manufacturing, quality assurance, and marketing, Lenco is committed to delivering precision and innovative products and services. This dedication to excellence has enabled them to maintain competitive pricing in the market.

Lenco further extends its support through the Research and Development Division, which collaborates with clients to create new products tailored to their specific needs. Customers also benefit from the opportunity to be part of "first-run" products, while Lenco assists in reducing research and development costs. The company places a strong emphasis on short product development lead times, adhering to ISO 9001 and ISO 14001 standards.

Lenco offers an extensive range of powder metallurgy components and operates its own production line while also serving as an OEM/ODM manufacturing partner. (Photo provided by Lenco)

Taiwan Hand Tool Manufacturers' Association (THTMA) Charts a New Course for Taiwan's Hand Tool Industry

At a moment of global manufacturing realignment, the Taiwan Hand Tool Manufacturers' Association (THTMA) has outlined a reform agenda centered on talent development, artificial intelligence, and brand-led growth. The THTMA is prioritizing the current complications within SME manufacturing, of which many family-run businesses are reliant on experience-based management. As global competition continues to intensify, legacy businesses are rendered unsustainable. To address this, Chairman Hsieh plans to launch an executive education program in partnership with National Chung Hsing University starting next year. Designed for business owners and senior executives, the initiative aims to strengthen systematic management and technical training essential to corporate fundamentals. This program helps to enhance leadership decision-making, enabling enterprises to sustain growth and development.

Beyond talent, the THTMA plans to transition as a strategic enabler of industrial upgrading. As member companies confront rising costs of digitization, equipment renewal, and compliance with sustainability standards, the association will take a proactive role in connecting firms with government subsidies, financing

THTMA aims to strengthen SME's systematic management and technical training, as well as the adoption of AI and digitization.

mechanisms, and technology upgrades. The association plans to function as an information hub, offering insights into market trends, policy developments, and global supply chain risk forecasts.

As labor shortages and demand for high-mix, low-volume production intensify, the adoption of AI manufacturing becomes critical to manufacturing production. The association plans to promote AI talent development and encourage AI production management, including production planning, quality analytics, and predictive equipment maintenance. The objective is to make automation accessible to the broader SME ecosystem. Chairman Hsieh also urges companies to move beyond an OEM-dependent model by investing in design, innovation, and brand building. While Taiwan is widely recognized for manufacturing excellence, sustained competitiveness will depend on delivering value-added, system-integrated solutions that align with evolving market expectations. The THTMA is poised to support a coordinated industrial transformation, strengthening Taiwan's position as a reliable, innovative, and forward-looking partner in the global hand tool supply chain.

CHEN HOUSEHOLD HARDWARE SUPPLY CO., LTD.

The Secret Behind Home Excellence – CHH Premium Hardware & Plumbing

Shen Chia-yi

Since 1996, CHH has been the secret ingredient to many happy homes. We're a Taiwanese manufacturer of household hardware and plumbing products from the heart of Chang Hua. We started our journey by partnering with Taiwanese trading companies, but as our reputation grew, we decide to take the plunge and export directly. Fast forward to today, we're now proudly exporting our products directly to US importers and distributors. That means you get all the benefits of our 20+ years of experience without any jet lag.

What kind of household hardware & plumbing supplies are we talking about? Think of everything that keeps your home running smoothly: tank levers, pop-ups, handles, repair clamps, flanges, door guards, door pulls, window clips, and window locking handles – you

name it, we've got it covered!

But wait, there's more! We're ISO 9001 certified and have passed the SER/CTPAT audits requested by industry giants like THD and Wal-Mart. We also understand that time is money. That's why we offer vendor-stocked inventory for high-volume SKUs. No more waiting around for parts, we'll get them to you lightning fast, so your projects stay on track.

Last but not least, our experienced engineering team is ready to collaborate in specializing OEM parts and offer valuable insights, ultimately bringing your project to life.

Ready to get started? Head over to our website at www.chh.supply or contact us directly at 886-4-2254-8698. We're always happy to chat and explore solutions!

CHH is a Taiwanese manufacturer of household hardware and plumbing products from the heart of Chang Hua. (Photo courtesy of CHH)

CHANG BING ENTERPRISE CO., LTD.

TAIWAN WINCH INDUSTRIAL CO., LTD.

Procure Quality and Efficient Electric Hoists from Taiwan Winch

■ Kuo Fang-Lin

Taiwan Winch Industrial Co., Ltd. is a renowned manufacturer specializing in a range of electric hoists, including AC winches, compact winches (170kg~500kg), electric chain hoist (250kg~2000kg), and electric wire rope winches with lifting capacities ranging from (200kg to 5000kg).

Leveraging outstanding R&D capabilities and extensive industry experience, the company has crafted a comprehensive selection of electric hoists suitable for applications in construction, households, brick-and-mortar stores,

and factories. Taiwan Winch maintains a strong commitment to delivering the best electric hoists to its customers, ensuring a consistently high level of quality and performance for each product in their lineup.

Taiwan Winch's electric hoists have gained widespread recognition and customer acclaim both domestically and internationally. The excellence of Taiwan Winch's products can be attributed to their unwavering commitment to technological research and development. The R&D department, with a keen focus on market trends, not only introduces new electric

hoists but also strives to elevate the performance levels of existing product lines. The overarching objective is to continually enhance each electric hoist from Taiwan Winch, ensuring the best possible performance and efficiency for their customers.

Maintaining a commitment to quality has been a longstanding tradition at Taiwan Winch since its establishment. The company upholds this commitment by implementing a total quality control system, meticulously overseeing quality at every stage of the hoist manufacturing process.

Stringent and comprehensive quality inspections are conducted before shipment, ensuring that each product from Taiwan Winch consistently upholds high standards of quality and maximum dependability.

Economic Daily News Forges International Partnerships at NHS and EISENWAREMESSE 2026

As global hardware supply chains readjust to rising geopolitical risk and tariff uncertainty, trade fairs are regaining strategic importance as platforms for sourcing diversification. In this context, the EISENWAREMESSE – International Hardware Fair 2026 in Cologne and the National Hardware Show (NHS) 2026 in Las Vegas stand out as two critical reference points for procurement leaders.

The EISENWAREMESSE 2026 is a system-oriented fair emphasizing engineering rigor, lifecycle performance, and supplier continuity, expecting to host 3,200 exhibitors. The product portfolio spans hand and power tools, fasteners, industrial equipment, safety solutions, smart home systems, and building hardware, attracting approximately 38,000 professional visitors from 133 markets. For buyers, Taiwan's integrated supply chains, innovative precision manufacturing, and consistent quality control align

closely with global compliance and engineering expectations.

NHS 2026 continues to connect manufacturers with global sourcing teams. The exhibition spans across hand and power tools, general hardware, outdoor and garden products, safety

equipment, and professional lighting. With more than a thousand exhibitors, NHS emphasizes speed to market and commercial scalability. For procurement buyers, Taiwanese manufacturers have strengthened their competitiveness through agile production structures and diversified distribution channels.

Operating between these two sourcing ecosystems, Economic Daily News / (CENS) serves as a structured intermediary. Through curated supplier profiling and targeted matchmaking, CENS helps buyers streamline supplier discovery and engage directly with manufacturers that meet defined technical, operational, and regulatory criteria. CENS reinforces Taiwan's position not merely as a production base, but as a reliable and strategic partner within the evolving global hardware supply chain.
